

HEAT AT GREATEST COLD
HYDROGEN AND RADIUMProf. Curie Makes Another
Discovery With the Newly
Found Marvel.

London, Aug. 16.—Another discovery of the extraordinary property of radium was communicated last week to the French Physical Society by Prof. Curie. It was only in March last that eminent men of science refused to accept the statement so irreconcilable with scientific experience that radium possesses the property of maintaining a temperature at a point three degrees higher than that of its surroundings. But the fact that, in addition to the marvelous radio-active properties already described, radium has this unique and unprecedented power of the emission of heat has been established beyond the possibility of question. Strenuous efforts have been made to obtain accurate measurements of this heat production and determine the effects of external conditions in promoting and retarding it.

Prof. Curie found that heat emission remains unchanged thru a very wide range of temperature, there being no perceptible variation in the temperature of a summer day, or that of liquid air, but if a long downward stride is taken from the temperature of liquid air to that of liquid hydrogen, radium shows that it is not always unaffected by the external temperature. And here comes the amazing new fact that the change in the rate of heat emission of radium within the comparatively short distance of absolute zero is in exactly the opposite direction to what might be expected in view of the effect of low temperatures on ordinary chemical action, for the temperature of liquid hydrogen, instead of being reduced, is augmented.

In simple language, the substance which does not change its heat at all temperatures, from that of an ordinary room to that of liquid air, gives out a greater heat when subjected to the greatest cold that scientists have yet reached.

These experiments with liquid hydrogen have led to the curious discovery that freshly prepared radium, the solution of radium has a comparatively feeble power of giving off heat at all temperatures, but the power steadily increases for about a month, when it reaches its maximum activity, which it then maintains apparently indefinitely. These remarkable results have failed to throw any light upon the process whereby radium maintains a constant emission of heat radio-activity.

3. The rates to be fixed by the Railroad Commission.

4. The increased value of the land to be taken by taxation for the building and maintenance of the road.

Resolved, That it is the opinion of this assembly that strong efforts should be made by all the labor organizations to induce the Municipal Committee of the legislative assembly at their meeting to be held in October next to insert in their report a clause in favor of local option in taxation.

Resolved, That this assembly strongly objects to the attempt now being made in the Dominion parliament to take from municipalities the control of their own highways.

TO ESCAPE LYING.

Many Negroes of the South Seek Refuge in Canada.

Ottawa, Aug. 16.—It would appear that the negro of the Southern States is beginning to turn his eyes toward Canada as the land for refuge and settlement, where he can escape the perils which menace him in his present home.

From the Southern portions of the United States negroes are reported to be coming to Canada in increasing numbers, and it may be that some day this country also will have an awkward problem to face.

A few days ago a party of healthy, well-developed negroes arrived at the Canadian Pacific Railway station in Montreal. When questioned as to their plans, they said they were seeking a home in Canada.

They said that they fear the negroes of the South were being driven north into Canada, where they had been told they would be safe from the terrors of lynch law.

It is said that large numbers of these negroes have found their way to this country during the last two or three months and are sending favorable reports back to the South.

These newcomers are seeking employment in different portions of the Dominion, and many will go to Western Canada, where work and good wages are readily obtainable.

FARMERS PAY \$45 A MONTH
WITHIN 5 MILES OF GALT

Galt Board of Trade Will Memorialize Governments to Change Policies.

Galt, Aug. 16.—At the last meeting of the Board of Trade, Andrew Elliott brought up the question of the scarcity of farm labor in Ontario.

"The most important question affecting industrial interests in the present generation is the labor question," was a statement made by Mr. Elliott. Mr. Elliott held that the subject was one not only of provincial but national importance, affecting chiefly and primarily the farming community, but ultimately injuring all classes of trade. It had come to this that the farmers were now beginning to reduce their croping area as creators of the necessities of the times. The agricultural trade would be reduced. The income from agriculture would be lessened, and it was evident that manufacturing and commerce would be forced to retract and the general business of the country would be lessened. The number of farm labor would thus be turned from urban to rural channels and thus would be the cause of the building of trade. But great efforts should be used to avoid this course.

Mr. Elliott, continuing, advocated a change in the methods now in vogue in the Immigration Department. It was the man from rural England and Ireland who was wanted for the west and not for New Ontario, but for Old Ontario where farms were starving for laborers.

WITHIN FIVE MILES OF GALT \$45 A MONTH. There was not a farm in Ontario as a field for farm labor. Mr. Elliott moved, seconded by J. Murray, that the governments at Ottawa should be memorialized to change the immigration policy so that the rural population of Great Britain be thoroughly informed as to the desirability of Ontario as a field for farm labor. This was unanimously carried.

R. G. McLean's Annual Picnic.

The fourteenth annual picnic of the employees of R. G. McLean's Printing House was held at Long Branch on Saturday. The event proved probably the most successful in the history of the picnic, all the employees and their families being present. After a long program of games and sports had been run off, the great event of the day was introduced, in the shape of the annual baseball match between Mr. McLean's employees and the Long Branch baseball team. The game was very exciting and about six hundred people lined the grounds around the diamond and saw the Leafs win by a score of 6 to 3.

The Rist brothers were the battery for Long Branch, and Wood and Bryden for the Leafs. In the evening a program of songs, recitations and plays was given. The program was very successful and a draw was held, every employee present receiving a prize. A vote of thanks was tendered the committee by the employees and three cheers for Mr. McLean, the gathering dispersed.
