

**NEW MODE OF MAKING COFFEE.**—Choose the Coffee of a very nice brown colour, but not black (which would denote that it was burnt, and impart a bitter flavour); grind it at home, if possible, as you may then depend upon the quality; if ground in any quantity keep it in a jar hermetically sealed. To make a pint, put two ounces into a stewpan, or small iron or tin saucepan, which set dry upon a moderate fire, stirring the coffee round with a wooden spoon continually, until it is quite hot through, but not in the least burnt. Should the fire be very fierce, warm it by degrees, taking it off every now and then, until hot, (which would not be more than two minutes), when pour over it a pint of boiling water, cover close, and let it stand by the side of the fire (but not boil), for five minutes, when strain it through a cloth, or a piece of thick gauze; rinse out the stewpan, pour the coffee (which will be quite clear), back into it, place it upon the fire, and, when nearly boiling, serve with hot milk, if for breakfast, but with a drop of cold milk or cream, if for dinner.

The foregoing proportions would make coffee good enough for any person; but more or less coffee could be used if required. The cloth through which it is passed should be immediately washed and put by for the next occasion. A hundred cups of coffee could be made as here directed, in half an hour, by procuring a pan sufficiently large, and using the proper proportions of coffee and water, passing it afterwards through a large cloth or jelly bag.—*Soyer's Modern Housewife.*

**A FINE HASH.**—Take any cold game or poultry that you have—you may mix several kinds together—some sausages, of the best sort, will be an improvement. Chop all together, and mix with it bread crumbs, chopped onions, and the yolks of two or three hard-boiled eggs. Put it into a sauce-pan with a proportionate piece of butter rolled in flour. Moisten it with gravy or warm water, and let it stew gently for half an hour.

**THINK AND ACT FOR YOURSELF.**—If you would rise, think and work. By industry and perseverance you can accomplish wonders. If we ask a hundred men of respectability and affluence how they obtained such an enviable position, they will tell you that they commenced the world with nothing, and that their success was the result of being early thrown upon their own resources, by which they were compelled to think and act for themselves.
