| This tree is said by some growers to be proof against black knot. One grower says, "I have a Prince's Yellow Gage that has never had black knot. It is 20 years old, and has been surrounded by other kinds, some of which have been covered with the knot." |            |                      |                 |                   |   |   |   |   |   |                       |
