Chicago Gossip.

J. P. Bickell & Co. say at the close:
Wheat-Firmer, shorts becoming uneasy owing to the continuance of the excellent demand for cash wheat. News from the Argentine was, as usual, very conflicting, but outside of this feature the market is in a very strong and healthy condition. Outside trade, however, still remains light, but there is a large sleeping short interest, and any stimulating news will cause a sharp raily. We are builts. Buy Chicago May on all slight declines.

Corn-Firmer, in sympathy with wheat, light receipts and slightly better cash demand. New crop offerings are not heavy, and old corn arrivals light. We feel friendly to May corn, and believe ultimately purchases at this level and under will net good returns.

Oats-Firm; shorts good buyers to-day on light receipts and improving cash demand. Nothing new to say about oats. We believe that under 50c they are in a trading position on the long side for fair returns.
