clean is a good rule to go by, but if her appetite declines there is something wrong with her digestion that needs instant attention. Very frequently this cause is so simple that one overlooks it. In a nervous cow, a sudden fright, undue excitement or running in a field or anything that will upset the nerves may cause the flow of milk to stop temporarily and upset her digestion so that the full quantity of milk will not be given for weeks. It is to guard against such slight accidents that the dairyman must exercise his supervision and authority. His cows are high strung milking machines that easily give out under abuse or misuse.
