The bills and by-laws committee Tuesday afternoon decided to approve the water supply bill which seeks to give the city power to acquire lands or water for increasing pumping power. It has special reference to the improvement of the Silver Falls station. At present the city has power to expropriate lands or waters to increase the supply of water for purposes of consumption, and the idea of this bill is to give the same authority for increase of pumping power. The committee will recommend the bill to the council and it will be discussed today.
