ed, and she would be hampered in doing her own resources in her own... Because after some years of reciprocity under the proposed agreement, the values of Canada's trade would have been changed, that a termination of the agreement and a return to the United States would cause a disturbance of trade... Because the agreement as proposed would weaken the ties which bind Canada to the empire, and because the unrestricted reciprocity which would naturally follow, would still weaken these ties and make it difficult to avert political union with the United States.

ENGLISH WORKMEN CONTRACTED

(Industrial Engineering.)

America has long been regarded as one of the most progressive countries in the world. The development of labor-saving machinery, the willingness to scrap that machinery when something better was available, and the general rearrangement of our workshops so as to make for economy of production, have marked the progress of the country for the last 75 years.

AMERICAN BREWERY FEED IS BETTER FOR COWS

New York Board of Health Rules That Milk Produced from Fermented Grain is Unhealthful.

(New York Herald, Feb. 18.) Milk from cows fed on brewery grains is under the ban of the board of health, according to recent decisions of the department. Complaints have been made concerning the quality of milk from animals which have had such feeding, and some physicians hold that the acid reaction in the milk is the cause of the acid eruptions observed on children on the east side and in the Brownville district.

NATURE FAKING

(The Green Book.)

When some celebrated artists of Adam and Eve were seen on exhibition, Mr. Mc-Nab was taken to see them. "I think no great thing of the painter," said the gallery attendant, "but I think the picture is a pippen of a variety of things known until about twenty years ago."
