

VICTORIA

COMPOUND FLUID EXTRACT OF

BUCHU & UVA URSI

A Positive and Specific Remedy for Irritation, Inflammation, or Ulceration of the Bladder or Kidneys, and of every complaint incidental or appertaining to those organs; Dropsical Swellings in Men, Women or Children; all Complaints incidental to Females; Weaknesses arising from Excesses, Habits of Dissipation or Early Indiscretion; Non-retention or Incontinence of Urine; Stone in the Bladder, Gravel, &c.

Buchu is an extract prepared from the leaves of plants growing at the Cape of Good Hope; they are collected there by the Hotentots, who value them greatly for their medicinal qualities, and have long used them.

Uva Ursi, or trailing bearberry, is chiefly indigenous to high latitudes, to the Pyrenees and to the Alps; it was known to and much used by the ancients.

This genuine medicine, the

VICTORIA BUCHU AND UVA URSI, is a combination of these two ingredients prepared from the formula of Dr. Rubini, (one of the most eminent Physicians on the European continent), and is a Specific Remedy for all diseases of the Bladder or Kidneys, and all affections of the organs appertaining thereto, from whatever causes arising. The learned European Physician, Dr. Rubini, for many years was celebrated for his

WONDERFUL CURES

Of disorders in those organs. Two of the ingredients entering into this celebrated Medicine, viz., Buchu and Uva Ursi, are now used by all physicians for the cure of such disorders. But the great secret of Dr. Rubini's peculiar and eminent success lay in the combination of these two ingredients with certain other vegetable productions; these are all combined in this Medicine, which is prepared with the utmost care from his formula; and wherever used, the

VICTORIA BUCHU AND UVA URSI Has invariably given the most decided and unequivocal satisfaction. Numerous testimonials have been received certifying in the highest terms to its value, and to its superiority over all other preparations for the purposes for which it is recommended.

The Victoria Buchu and Uva Ursi, now so well known, is prepared only by the Victoria Chemical Company, Toronto, bears the name of the Company with their Trade Mark, and is for sale in all parts of the Dominion. Price, \$1 per large bottle.

RECEIPTS FOR DYING.

Continued from page 13.

Scarlet.—No. 2.

Take soft water sufficient to cover the cloth or yarn you wish to colour, bring it to a boiling heat in a copper kettle, then add 1½ ozs. cream of tartar for every pound of cloth; now boil a minute or two, and then add 2 ozs. of powdered lac, and 3 ozs. of madder compound (the lac and the compound must be previously mixed in an earthen bowl), boil five minutes; now wet the yarn in warm water and wring it, and put it in the dye; then boil the whole nearly an hour, take the cloth or yarn out and rinse it in clean cold water.

Scarlet (Very Superior).

One-and-a-half ounce of cochineal, 1 oz. cream of tartar, and 1½ oz. sol. of tin; powder the cochineal and rub it through a bag into blood-warm water sufficient to cover the yarn; when it is a little warm put in the cream of tartar and simmer, then add the solution of tin. Your yarn must be wet with clean water; steep in the dye until the yarn is properly dyed. Dye your yarn before you wash it. This will colour one pound.

Madder Red.—No. 1.

Take 1 lb. madder for every 2 lbs. of yarn or cloth; soak the madder in a brass or copper kettle one night in warm water, enough to cover the yarn you wish to colour; next morning put in 2 ozs. madder compound for every 1 lb. of madder you have so soaked, then wet your yarn or cloth in clean water and wring it out; afterwards put in the dye; now put the kettle on the fire and bring it slowly to a scalding heat, which will take about half an hour if a light red is wanted, and longer if a dark one; the colour depending upon the time it remains in the dye. When the colour is made, rinse the cloth immediately in cold water, and it will then be finished.

Wine Colour.

1 lb. of wool—redwood, ½ lb.; madder compound, 1 oz. Soak the powdered wool in warm water all night, mix the madder compound with about half pint of water (in a glass) and add it to the rest; rinse the wool in warm water and put in the dye, boil about half an hour, take out the wool and rinse in cold water.

Pale Pink.

1 lb. wool or cloth, ½ lb. good red wood, and ½ lb. of alum. Soak the wood all night in warm water, add the alum, and boil the cloth with these ingredients for about an hour; take it out and rinse it in water. A cheaper yet handsome pink may be obtained by substituting nickwood for madder, in the receipt for madder red.

Yellow.

For each lb. of wool or cloth, fustic, 1 lb.; alum, ½ lb.; put all into an earthen vessel and pour on sufficient hot water to cover the wool, and keep it warm all night; give it half an hour's boil in a brass kettle, and then rinse in cold water. A much deeper and richer yellow may be made by using turmeric powder instead of fustic, and proceeding in the same manner.

Green.

For each lb. of goods, fustic 1 lb., with alum ½ ozs.; steep, but do not boil until the strength is out, and soak the goods therein until a good yellow is obtained; then remove the chips, and add extract of indigo or chemie, one tablespoonful at a time until the colour suits.
