

Survey Finds Majority Dislike New Library

By Lawrence Samuel
 "What is that?" The visitor to the campus was quite astonished.

"It's only our new post-graduate library," she was told. "Oh? Is it the front or the back?"

In a recent survey many of the students weren't too sure what to make of the newest addition to our campus. Most of the students were not in favor of the appearance of the library. Some were waiting to see the inside.

A common complaint was: "It looks like hell." Others were more or less violently opposed. Their range of complaints covered everything, starting with its blending with the rather picturesque surroundings such as the labs and the cafeteria.

TASTEFUL FIRE PLUG

Others objected to the way the fire-plug was so tastefully stuck beside the front door. But the main complaint was its generally oriental look. "It adds a little of the orient to the campus," was a common criticism.

One humorist thought that while this is supposed to be a cosmopolitan university Chinese architecture was going a bit too far.

The library, however, was not without its supporters. Even though they were fighting against the majority some were convinced of its beauty. Those supporters not in favor of the library for reason of beauty liked it because of its difference and because it gives a little color to the campus.

SOME APPROVE

One of the people actively supporting the new library is Wayne Hope, sci 1. He is the student who wrote the letter to The Journal recently, approving new buildings on campus and in particular the new library.

Hope thinks the new library is

quite good looking. "Naturally," he says, "it looks out of place beside the dairy services building and the arts cafeteria. When these buildings are replaced it will look much better." He thinks that it is more important for buildings to look modern, exciting and functional than to have them all looking the same.

When he was asked if his name could be used instead of the usual "please don't use my name," he said, "Why not? I can only have 9,000 people jump on my back."

Social Sciences Complex Named After H. M. Tory

Although the plans for it are still in the drawing-board stage, rapid progress is being made on our new Social Sciences building.

It will be called the Henry Marshall Tory Building in honor of U of A's first president.

J. L. Thorton, assistant campus planner, told The Gateway that the building will be L-shaped in basic design, comprising two classroom wings of three storeys, and a fifteen-storey office tower.

Intended to house five faculties—geography, political economy, sociology, philosophy, and history—the building will provide 260,000 gross square feet of space. The faculty of commerce will also share this area, but only temporarily.

Mr. Thorton said that he could not give a idea of the general appearance of the building, as its architectural style had not yet been definitely decided upon. He added, however, that the plans should be ready for the approval of the Board of Governors some time early in

Wanted By CUSO

Graduates Needed Overseas

Do you want to help developing countries? Do you want to travel?

Canadian University Service Overseas needs graduates to go to Africa or Asia. Grads in engineering, nursing, education, agriculture, and home economics are urgently needed.

CUSO, in its third year of operations, is asking for dedicated persons

who are vitally interested in helping others to develop healthy, and progressive countries in the world's underdeveloped countries.

TOURISTS NOT WANTED

This is not a chance for tourists. R. B. Wishart, administrator of student awards, stressed this point in an interview. He said persons chosen will live in the local manner and be paid prevailing local wages for a two year commitment.

CUSO is an organization of Canadian university groups who joined together to send graduates, usually recently graduated, to help other countries. It was formed in 1961. Headquarters are in Ottawa, with 44 or 45 local committees in universities across Canada.

To date, CUSO is supported solely by volunteer workers and donations from interested persons. The federal government has shown interest in supporting the efforts of the group.

NO GOVERNMENT CONTROL

If they do contribute funds they will be asked to give no more than

dollar for dollar. The universities feel that any more will place the government in a controlling position which is not wanted.

At present the yearly cost is about \$100,000.

So far the University of Alberta has sent two students. In 1962 Angela Sawchuk was sent to Nigeria. This summer Gordon Panta, an agriculture graduate, went to India and should be now settling down to work on his two year stint. Mr. and Mrs. Liddel from Calgary soon will be going overseas.

The local controller is R. B. Wishart, administrator of student awards. Interested persons should contact him for further information and application forms.

In connection with CUSO, David Carmichael of the British Overseas Appointments Bureau, a connected group, will be in Edmonton on Saturday, Nov. 30 to speak to persons interested in working in Africa. A preliminary time for the short talk has been set at 12:15 p.m. in Pybus Lounge.

Aluminum Company of Canada Limited

Openings will be available in 1964 for Graduates and Post Graduates in:

- CHEMICAL ENGINEERING
- METALLURGICAL ENGINEERING
- MECHANICAL ENGINEERING
- HONORS CHEMISTRY
- HONORS MATHEMATICS
- HONORS PHYSICS

Interviewers will be on your campus on

December 16th, 17th

Please ask your placement officer for an interview appointment and literature describing career opportunities.
