

The present Report, which forms the second part of the third volume of "Paleozoic Fossils" now in course of publication by this Survey, consists of two papers, viz.: (2) a revision of the fauna of the Guelph formation of Ontario, with descriptions of a few species, and (3) a systematic list, with references, of the fossils of the Hudson River or Cincinnati formation at Stony Mountain, Manitoba.

The drawings for the seven plates illustrative of the first of these papers, were made from nature by Mr. L. M. Lambe, F.G.S., the artist to the Survey, and reproduced on stone by Mr. O. E. Prud'homme.

GEORGE M. DAWSON.
