ELECTRIC POWER BILL.

Municipalities Want More Control of

Toronto, May 19.-A number of representatives of the west-Ontario municipalities which are interested in the question of developing electric power at Niagara Falls held a meeting in the Parliament buildings yesterday, to discuss

Falls held a meeting in the Parliament buildings yesterday, to discuss the Premier's power bill and to frame some amendments which they will suggest. Those present were: W. Cowan, Galt; W. B. Burgoyne, St. Catharines; F. S. Spence and J. S. Fullerton, K. C., Toronto; H. L. Rice, St. Mary's; S. Chant, ex-Mayor of St. Thomas; J. O. Thorn, Toronto, and J. F. M. Stewart, representing Toronto branch of the Canadian Manufacturers' Association; C. H. Waterous, Brantford; J. P. Downey, M. P. P., Guelph; Wm. Snider, Waterloo; Jos. Orr, George McLagan and Wm. Hepburn, Mayor, Stratford; J. F. Gross, M. P. P., Welland; John Barr, M. P. P., Shelburne; J. W. St. John, M. P. P.; Mayor John H. Hamilton, Guelph; John White, Mayor, Woodstock; E. W. B. Snider, St. Jacob's, O. B. Detweiler, Berlin; T. H. Preston, M. P. P., Brant; J. C. Haight, Waterloo.

They will suggest that tie commissioners who inquire into the cost of any proposed power plant need not employ hydraulic and electrical engineers, but that practical business men be appointed members, who may emplow such engineers if they wish. The time within which a municipality must make complete payment for its power plant is recommended to be extended beyond twenty years. Certain alterations are suggested in the provisions for the appointment, tenure of office and removal of the commissioners to manage the works, which would place such matters more entirely within the control of the municipalities operating such plants to sell power to other municipalities, through which the supply passes, in certain events should be made permissive instead of compulsory. A committee was appointed which will lay these proposals before the Premier. compulsory. A committee was ap-pointed which will lay these proposals before the Premier.

KENT'S PUNISHMENT.

Sentenced to Twenty Years in Auburn Prison.

Rochester, N. Y., May 19 .- Leland Dorr Kent was yesterday sentenced to Auburn Prison for twenty years by Judge Sutherland for aiding and abetting in the death of Ethel Blanche Dingle, the young and beautiful Canadian nurse. In sentencing Kent, Judge Suther-

land said :- "For myself I will say that concur entirely in the conclusion which the jury arrived at as to the manner by which Miss Dingle met her I cannot conceive how it death. I cannot conceive how it would be possible for her to present the appearance which she did had she cut her own throat and it seems probable from all the evidence in the case that she was not conscious when she received the mortal stroke at your hands. The statute making the act of aiding another in the commission of suicide manslaughter in the first degree is the statute under which your gree is the statute under which you have been indicted and convicted. Unhave been indicted and convicted. Under that statute the supposition is that
she was the principal actor, and that
your part in it was subsidiary and incidental only. But I have no doubt
that her wish to die, her consent to
die and her participation to some extent in the preliminary preparations for
death would not have necessarily
absolved you from the graver charge
of murder, if you had been indicted for
that offence, because you wilfully,knowof murder, if you had been indicted for that offence, because you wilfully,knowingly inflicted the mortal wound. Her wish and consent do not necessarily relieve you from the charge of murder; but the Grand Jury, considering all the circumstances in the case, were doubtless brought to the conclusion that an indictment for manslaughter would permit full justice to be done. I will leave for others the duty of pointing out for others the duty of pointing out the moral lesson that is written all over this case. The few weeks prior to this tragedy may have had for you some temporary allurements and pleasures, but that kind of life inevitably leads down to disgrace, dishonor an! death."

Mr. Raines, counsel for Kent, will immediately ask for a certificate of rea-sonable doubt. If success the Kent will sonable doubt. If succes ful, Kent will then be entitled to his berty under bail. Kent responded to the questions in court to-day smilingly, not appear-ing to be at all impressed with the gravity of his position.

Birds Plant Trees.

An old time Arizona woodchopper says the bluejays have planted thou-sands of the trees now growing all over Arizona. He says these birds have a habit of burying small seeds in have a habit of burying small seeds in the ground with their beaks and that they frequent pinon trees and bury large numbers of the small pine nuts in the ground, many of which sprout and grow. He was walking through the pines with an eastern gentleman a short time ago when one of these birds short time ago when one of these birds flew from a tree to the ground, stuck his bill into the earth and quickly flew away. When told what had happened, the eastern man was skeptical, but the two went to the spot and with a knife blade dug out a sound pine nut from a depth of about an inch and a half. Thus it will be seen that nature has her own plan for forest perpetuation.

Nodd-Old man, I really believe you warrying. What have stopped your worrying. What brought about the change? Todd (cheerfully) My troubles are more real than they used to be.

ato Paper Sums Up Neatly Life of Late Sir Oliver Mowat.

With the exception of Sir John A.

Macdonald no man played so active,
a part in the history of what was
once Upper Canada, and is now the
premier province of Ontario, as Sir
Oliver Mowat. Moreover, the paths
of the two men curiously intertwined of the two men curiously intertwined at certain times during their long careers, and at times widely divergent. Like the great Macdonald he was politically fortune's favored son and was privileged, as the founder of federated Canada was not, to spend his latter years in peaceful enjoyment of one of the highest honors his sovereign could bestow, happily removed from the turmoil of party conflict. In one respect moreover his career was unique. As Premier of the Province of Ontario he remained in office uninterruptedly mier of the Province of Ontario he remained in office uninterruptedly for nearly a quarter of a century—"a period of continuous office," to quote Morgan, "which has never been accorded to any public man by the people of any province, colony, or dependency within the British Exercise."

Empire."

His full list of titles embrace those of Kings Counsel, Doctor of Laws, Privy Councillor, and Grand Cross of the Most Distinguished Order of St. Michael and St. George. First, a barrister, then a Bencher of the Law Society of Upper Canada, Vice-Chancellor of the province, an officer of the Canadian militia, an alderman of the City of Toronto. erman of the City of Toronto, a member of the old Parliament of United Canada. thrice a Minister in Cabinets of the old regime, "a Father of Confederation." Premier and Attorney-General of the Province of Ontario, first Minister of Justice in the Laurier administration, and finally Lieutenant-Governor of Ontar-io, this constitutes a career which few Canadians can parallel.—Toron-to Mail and Empire.

The late Mr. Justice Lount, it is recalled, was one of the "nine mar-tyrs," a political phrase dating back to 1867, and now almost forgotten. When Lord Monck (acting, of course, on the suggestion of his Prime Min-ister. Sir John Macdonald), selected a leading Liberal statesman, Hon. John Sandfield Macdonald, to form a Ministry for Ontario, the latter formed it of a coalition basis, half Liberal and half Conservative. By so doing he secured the support of the Conservative members in the Legislature and nine Liberal members. The latter were hotly denounced by The Globe and the official Liberal parly as recreants, threatened with defeat at the next general elecwith defeat at the next general election, and so sternly assailed for supporting Sandfield Macdonald that they were dubbed the "nine martyrs." Mr. Lount had been elected for North Simcoe in 1867 as a Liberal. When the elections of 1871 came round neither party would adopt him. The Conservatives ran W. D. Ardagh, who was elected, and the Liberals, H. H. Cook, and Lount came in at the end of the poll.

LOSING FLESH.

Are you losing flesh? If so, better consult your doctor at once. He will tell you the cause. We can provide the remedy, which is Scott's Emulsion of cod-liver oil.

A young woman in Batavia writes us she had lost twentyfive pounds in three months, and her lungs were seriously affected. She took three bottles of Scott's Emulsion and gained fifteen pounds, and was able to resume her work

NEW ERA IN EDUCATION.

Proposed Changes in School Curricut Nature Course Study-Outline of Studies in a New Field.

The Education Department of On-tario recently issued the tentative draft of the new Public School and High School regulatiors, which came up for discussion at the Ontarie Educational Association meeting during the week ending April 18. Below is given a detail of some of the new courses of study proposed, with spe-cial reference to the course of studies

courses of study proposed, with special reference to the course of studies in manual training, household science and nature study. It is in these subjects that the most portentious changes are being made in our present educational system, and a glance at the courses proposed will give some idea of the marked trend of the times in matters educational. In the literature prescribed for Form I. of the Public School course an innovation is made which may have some influence in checking the undue materialism of the age. The course prescribed calls for myths, fairy stories and fables, stories and poems illustrating nature-study lessons and appropriate to the time of year and to the various holidays.

In drawing for Public School students a new feature is the introduction of color. The spectrum with the six standard colors and their shades and tints will be called into play.

Nature study for Form I includes

Play.

Nature study for Form I. includes the habits of pet animals, their care and food; domestic animals on the farm, their care, habits, and use; farm, their care, habits, and use; birds, their preparation for winter, their development; economic fruits, dissemination of seeds, roots and stems, etc.; plant life, life on the farm, observations of rain, snow and frost; effects of sun and moisture on the soil, etc.

In Form II., III. and IV. the regulations for drawing, manual training and nature study provide for a continuation of the studies as begun in Form I. In Form II., for in-stance, in nature study, the student advances to a study of the form and uses of trees; activities connected with forestry and lumbering, and connected with the study of pionear life and present conditions on the prairie. In manual training the student advances to clay modeling of natural forms and common objects.

In Form III, the course in nature study develops into studies of the adaptation of different kinds of animals to their respective habits; Jite histories of moths, butterflies, beetles, and grasshoppers; useful in-sects, as ladybird and dragon fly-harmful insects and methods of des-harmful insects and methods of destroying them, etc. In plant life the student now comes to study the culture of farm and garden crops and orchard and shade trees; the observing and distinguishing of the common forest trees, etc. He also proceeds to studies of local minerals and rocks, their properties and uses; tests and methods of purification of water: sources of heat ventilation. water; sources of heat ventilation of water; sources of heat ventilation, methods of transmission of heat, causes of winds and ocean currents, etc. Finally, in Form IV., the pupil is led up to comparatively advanced studies in the processes of nature, such as combustion, practical upon such as combustion, practical uses of heat, steam and electricity in con-nection with the study of indus-In the departments of drawing,

In the departments of drawing, household science and manual training there is a similar gradation in the courses of study. In household science the Public School girl of Form IV. will be expected to study the uses, selection and care of kitchen equipment; the proper care of the house; the human body as a machine for doing work; foods, their function, necessity for variety, effects of cooking, etc.; practical work in the economical preparations and serving of vegetables, cereals, fresh and dried fruits, soups, eggs, meat, bread, etc. bread, etc.

Duties of Citizenship.

In the subject of history there will be no departmental examination and teachers will be allowed great free-om in dealing with the course. The hief object of the course as laid at is to arouse an interest in his-torical reading and to give an ac-

nief object of the course as laid at is to arouse an interest in historical reading and to give an acquaintance with those leading points in our history which every citizen should know. In Form IV. a brief outline of the duties of citizenship and of the provision for civil government in Canada is prescribed.

The High School curriculum is based upon these main divisions: The lower school (a two or three years' course), the middle school (a one or two years' course), and the upper school (a two years' course). The program of studies has been prepared for the general student in particular. To all pupils the lower school courses (now Form I. and II.) are obligatory in geography, arithmetic and mensuration, English grammar, penmanship and reading, with English composition, English literature, history and physical education, throughout their period of attendance. This ensures for all pupils, whether they specialize or not, in languages, household science, manual training, art, etc., a good fundamental course of general knowledge. In any locality where there is more than one High School building, the board may make such a differentiation of the courses taken up as it may deem expedient. This clause at presont effects Toronto only, and refers to the optional courses. ill school Entrance.

ly, and refers to the optional courses. At the different examination in literature, history, art subjects, physiology and hygiene, or nature study. In these subjects candidates must have a certificate from school principals or inspectors to the effect that they have satisfactorily completed the courses.

No candidate who shall not have completed the seventeenth year of his age before the close of the examination shall be admitted to any of the non-professional examinations for teachers.

At the different examinations a more exact knowledge will be required than heretofore, and the examination papers will be constructed as cordingly.

OSS OF APPETITE
