

free of cost to reliable farmers, and when the crop from the plots has been harvested, the farmer submits his report, these being afterwards published.

The results of these experiments in different parts of the Dominion during the past two seasons as graphically illustrated at the Potash Syndicate's exhibit, show the value of a well balanced fertilizer containing phosphoric acid, nitrogen and potash. Many of these results have been published in pamphlet form and can be obtained from the Potash Syndicate's offices in the Temple Bldg.

This year Mr. R. S. Duncan, B.S. A., a graduate of Guelph, was appointed superintendent of experimental work for the Dominion offices of the Potash Syndicate in the Maritime provinces.

Mr. Emslie, the manager, left on Monday, 9th Sept., for the Pacific coast, where he will visit the Victoria and New Westminster exhibitions and obtain photographs of some results of experimental work in that province.

The Nova Scotia Government is importing another shipment of pure-bred stock for that province, consisting of eighteen Clydesdales, two Ayrshire bulls, and eighteen Black-faced Highland sheep for the hilly districts of Cape Breton.

## Cost Less than Stoves

A Hecla Furnace, installed on Hecla principles, will keep your house comfortable throughout the winter at less fuel expense than it would cost you for stoves. It is the old story, of course, of concentration meaning

power. In a Hecla, you get all the heat from the coal you burn and where you want it. The whole house is comfortably, and evenly heated and ventilated.

## Hecla Furnaces

are equally adapted for mild or severe weather—always ready for any demand made on them. They are the only hot air furnaces that are absolutely healthful and sanitary.

No other furnace is made with the Fused Joints that patented feature of the Hecla which makes the escape of gas, dust or smoke into the house an impossibility. Let me tell you about these Fused Joints and about other features of the Hecla in which you will be interested.

See your nearest dealer or write "Clare's Furnace Builder" for new illustrated catalogue and estimates.

# Tudhope Sleighs

need no recommendation to men who have bought Tudhope Carriages.

The name "Tudhope" is the only guarantee that those men require.

They know the Tudhope standard of quality. And they know that Tudhope Sleighs are just as good, in their way, as Tudhope Carriages. Both have been Canada's best since 1855.

The man, who does not ride in a Tudhope Carriage, will do so after he uses a Tudhope Sleigh this winter. The way a Tudhope Sleigh skims the ice—and stands up against hard driving and heavy jolts—is going to make him a convert to Tudhope quality.

## Tudhope No. 80

This is probably the most popular sleigh in Canada. Because it appeals to the greatest number of men. It makes a stylish appearance on the road. It is easy and comfortable. And it gives excellent service. No. 80 has steel braces throughout, and flanged channel steel shoeing on  $\frac{1}{2}$  inch runner. The body is black with striped scroll panels. It has high sprung back and spring cushion, and large roomy seat and drop bottom.

The shafts are full trimmed with silver tips. All mountings are nickel plated on brass.

No. 80 is only one of the many styles illustrated and described in our new catalogue. If there is a new sleigh to be bought this winter, send for a free copy of the catalogue to assist you in deciding just which Tudhope Sleigh you prefer.
