The Union Trust Co., Ltd.,
Real estate Dept.
174-176 Bay St., Toronto, Ont.

Electric Insect Exterminator

The only practical dry powder sprayer—no water required. With this sprayer, one pound of Para Green will cover an acre of potato plants. Our patented device regulates the quantity of powder and prevents waste. Machine works up, down, and sideways, so every part of the plant is reached and every bug killed. This machine sprays vegetables and flowers from the ground out trouble, when you have the Electric Insect Exterminator.

Illustrated catalogue of Sprayers, Seeders, Planters, Drills, Waggon Boxes, etc., sent free on application. The Eureka Planter Co., Limited, Woodstock, Ont.

Save Time, Money and Labor With These DAIN Implements

The DAIN ALL-STEEL SIDE DELIVERY RAKE **The EASY-RUNNING DAIN HAY LOADER**

won't whip or toss hay. Won't break off tender, nourishing leaves. The three sets of revolving teeth move slowly and handle hay gently. Shakes off water (after rain) and leaves hay with plenty of air space, so it is cured scientifically. Works around field, like the Dain Mower, leaves 2 swaths of hay upside down in loose continuous windrow, producing quality hay at its best, of the right color, retaining the rich nutritive juices. Rakes cleanly because the reel is on an angle from main frame when raking with the swath—the raker teeth stand straight and point toward ground. Draw straight out of hay, which prevents it wrapping around reel. The Dain All-Steel Side Delivery Rake goes over stumps, stones and other obstructions; operates easily; built to last, of best materials. Does more than any other rake on earth.

is built of best material; guaranteed to do as we claim. Construction, simplest in the world, and has the lightest draft on earth. Loads from swath or windrow; works without friction, because principal parts are hammock mounted and swing like a pendulum without binding or strain. Rakes operate at exactly the right speed to require least power when working. Gather hay from swath regardless of width of mower; divides swath at your will. Rakes are malleable with spring trip. Pass over all obstructions, spring back and fly into place. Operates close up to fences or ditches. Goes through ordinary farm gate. Elevator adjusts itself readily to light or heavy hay. Only loader made that is free from twisted chains, cog-gearing, drums, cylinder, return carrier, and long crooked crank shaft. Stays in working order; needs fewest repairs. Lasts longest.

Don't spend a dollar for any hay-making implement until you get the Dain free catalog. Get this information. It will pay you. Write now.

Brantford, Canada.

Build Concrete Silos

Any size, with the London Adjustable Silo Curbs. Wood Silos seem rot and fall down. Steel Silos have a very short life, as the rust from the corn cuts the silo and the silo rusts. There is always a large amount of waste outside around the silo. A CONCRETE SILO will last for ages.

London Concrete Machinery Co., Ltd. 25 Marmora St. London, Ont.
