the Public Health Nurse at Colling-wood:--This year 52 clirics have been held, 572 babies have been weighed, .neas-ured and examined, and 2037 calls made, over 100 of the cases called up-on being prenatal. A number of bab-les were visited regularly who lived either too far away or were too sick to bring to the clinic. A number of defects were found and the babies so affected were found and the babies so affected were referred to the family physician. was supplied to fifteen babies,
