CANADA'S WELCOME

THE announcement made on Sunday in the city churches at morning service, that their Excellencies had arrived in CARTWRIGHT knew well that his sucsafety at Halifax, was hailed with gen-nine satisfaction by all our people. There were no serious apprehensions There were no serious apprehensions for the safety of that floating palace which the Messrs. ALLAN had furnished for their use; still suspense is the that they were prepared to leave office parent of anxiety, and it is always more or less painful to be kept waiting for would be found in the trimmest order, those whom we eagerly expect. In-deed, as it turns out, there was abun-yet in what condition did Mr. TILLEY dant reason for something more than mere impatience in the boisterous voyage, during which H. R. H. the Princess Louise served a rough apprenticeship to the sea. It was all for the best, ne doubt, that there were no bystations on the watery way, from which a Royal mother, so devoted to her adopted children as her Majesty, could have learned the distress and suffering of a a passage, and utter our sincere good for the speedy recovery of her Royal Highness' wonted health. Of one thing, both the Marquis of the financial disasters of Mr. Cart-LORNE and his distinguished consort are WRIGHT'S "brilliant" administration well assured in advance-a hearty and were owing to that convenient refuge generous welcome from a loyal and conented people. Their attachment work miracles by a re-adjustment of the intelligence. In older lands, the pre-sence of the Sovereign and the pomp and pageantry of a Court give to royalty

a personal charm, of which Canadians know nothing ; but, on the other hand, their byalty is free and spontaneous, and never, in the slightest degree, make the "crooked straight, and the feigned or sycophantic. It is true that the absence of privileged castes here, and the substantial equality of all classes of the people; may strike a European with surprise, and at the outset, appear bizarre and sunnatural. But a representative of the Crown who can at once throw himself into the feelings of Canadians, and comprehend those inevitable less extravagance and want of prescience Arifferences in the tone of society pro-duced by the gradual development of a new country, will never be led far astray by traditional tastes or habitudes. attempt a reformation from every point The Earl of DUFFERIN, it always seemed of view ; and, unless the absurd cla to us, was trained for the viceroyalty of which the ignorance of a portion of the Canada, when he became simply a warm-hearted and open-handed Irishman in the famine of 1845; and, if we mistake

TEMPERANCE AND LEGISLA-TION.

THE evils caused by intemperance are many and great, both to individuals and society, that we cannot be surprised if sundry philanthropists and reformers. with the mass of varied misery thus caused continually before their eyes and in their thoughts, grow impatient of the slow process of moral suasion, or educational advancement, and betake themselves to legislative action, under the loud in their denunciation of civil servants idea that they can thereby promote an who loyally support the Government of the immediate and summary extinction of drunkenness. While everybody must respect the motives and intentions of those who seek to promote temperance, we cannot shut our eyes to facts, and facts we cannot shut our eyes to facts, and facts elections. appear to be dead against the theory that the vice of intemperance, so largely prevalent in all civilized communities, can be put down by restrictive legisla-Mr. THOMAS LIVESEY, of Preston. formally show us 'the injurious effect of America's protective policy on British trade.' Those who have had at heart the best interests of this country never so much as dreamed of alleging that a pro-tective tariff would benefit British trade. On the contrary, they argued that even a moderate protective tariff, such as is now in force, would inure greatly to the advan-tage of the industries of the United States — industries that needed only a partial pro-tection against unfair foreign competition, in order to assert their supremacy in a prac-tical way, by providing the home markets with articles that had not been purchased abroad, and becoming the rivals of English manufactures in other lands.
