MONDAY, SEPTEMBER 11, 1911.

CHANGED CONDITIONS?

The Antis are now getting into an explaining mood. Unable to deny that from Sir John MacDonald to Mr. R. L. Borden every leader of the Conservative party has advocated reciprocity, they are now casting about for reasons to justify the fact that Mr. Borden, Mr. Bourassa, Mr. Foster and Mr. Monk, with the monopolistic interests of Toronto and Montreal are fighting reciprocity. The most convenient explanation so far discovered is that "conditions have "changed" between the time their party leaders were pressing for reciprocity and the present, and that in this change of conditions has disappeared the necessity and advisability which formerly existed for freer trade arrangements with the Republic. It is pertinent to ask, have conditions changed? If so, when?

Have conditions changed since December 13th, 1910, when Mr. W. H. Sharpe, Conservative member of Parliament for Lisgar criticized the Minister of Agriculture in the following words as to the necessity of find-

ing new markets: "The minister has also been asked time and time again to open up new markets. There are resolutions in this report (report of the second general convention of the National Live Stock association), asking him to open up new markets, and I would like to know if he has done it, if he has ever made any attempt to open a market for the thoroughbred stock of this

country." Have conditions changed since Mr. Glen Campbell, Conservative M.P. for Dauphin, pressed upon the Government their duty to find new markets for Canadian farm products wherever such could be found?

"This trade (cattle) already of such large proportions, is growing year by year, and it must be taken care of. To take care of it in the proper way it is reevery opportunity to find a market for with the United States?

our products." fact that the United States farmers could send goods into Canada on better terms than the Canadian farmers could send goods into the United States?

"In 1908, the United States provided us with a market for \$96,900,000 of our goods, but in the same year our smaller population afforded for the people of the United States a market for \$214,000,000 worth of their goods. There was thus an adverse balance of trade for Canada of \$118,000,000. Hon. Gentlemen opposite say that cuts no figure. But will any man in this House say that he would not prefer to have those figures reversed? Will any man say that it would not be better for Canada if we were selling the United States \$214,000,000 worth while they were selling us \$96,900,000 worth? In 1908 we bought from the United States \$1,254,704 worth of horses. And what market did they afford for our horses. They took \$900,000 worth. Why was this? As I stated last session and repeat to-day, it is largely because our tariff discriminates against the Canadian farmer, that is, under the tariff arrangements, it is easier for the American farmer to bring stuff into Canada than for the Canadian farmer to get his stuff into the United States."

15th, 1910, when Mr. J.E. Armstrong, Con- declared on April 15th, 1910: servative M.P. for East Lambton criticized the Government for not having secured the admission of Canadian products to the Uni-

ted States? "What has the Minister done in regard to opening up new markets? The great boast and cry of the men leading the Liberal party previous to 1896 was: 'Place us in power, and we will open up the markets of the world to the Canadian farmer; we will obtain for you the great market of 80,000,000 people to the south. Let them point to one market that they

have opened up." Have conditions changed since November 30th, 1909, when Dr. Sproule, Conserva-

tive member for East Grey declared:

"Before the Liberals came into power they said that the Conservative party in the world except right at home, at our onto said: very door, where there was a market of 85,000,000 people. They said that if they were returned to power they would secure by their sunny ways and their statesmanship, this market of 85,000,000 people that would be more valuable than any market that could be secured anywhere else in the world. They were returned to power but did not make any effort to secure that market and apparently have no desire to secure it. Have they ever attempted to secure it except on the one occasion when they went to Washington, for which trip Canada paid \$35,000 or \$40,000. They came home with their heads down and we never heard a word about it."

Have conditions changed since Hon. Geo. E. Foster, on December 14th, 1909, repeated his desire for a reciprocal arrangement in this way:

"Where is the reciprocity with the United States that the hon. gentleman

are to this extent forced out of their own compiled by the United States tariff board, the transportation of their products to from original sources of information. This are receiving from this Government all along the line. I remember from my boy-hood days hearing the Liberals when in statistics prepared by a department of their opposition talking about capturing the own Government and issued by order of markets of the United States for the Can- Parliament are taking peculiar means to he is now convinced, to his disgust and re-ship to retire from the field has its adian farmers and having Reciprocity. illustrate their loyalty The Liberals are in power.
