# Allies May Advance Into Germany.

## Revolutionists Paying Big Wages-- About to Abandon Russia--Mine Disaster in Colorado.

**MARSHAL FOCH'S AUTHORITY.**  
LONDON, March 31.  
The Evening News says it under-  
stands that reliable information has  
been received in London that in case  
the German delegates refuse to sign  
the peace treaty, Marshal Foch has  
authority to order a general advance  
of the Allied armies along the Rhine.

**REIGN OF LAW AND ORDER UN-  
DISTURBED.**  
BUDAPEST, March 30.  
The plunge of Budapest into anti-  
capitalism continues with feverish  
effect. To show that the reign of law  
and order is undisturbed the city is  
outwardly quiet since the first few  
days in which there was much loot-  
ing, especially of jewelry shops. As  
a result of the looting it is reported  
1,506 persons were executed by the  
new regime, their communistic ideas  
apparently being too violent.

**CZECHS CAPTURE TOWNS.**  
BUDAPEST, March 30.  
The town of Kaschau and several  
other ports in Southern Slovakia  
have been captured by Czechs, who  
are fighting the Hungarian Commu-  
nists. German colonists in Western  
Hungary and Transylvania are hos-  
tile to the Communists and are mak-  
ing an effort to gain their independ-  
ence.

**ALSACE'S GRATITUDE TO FRANCE.**  
STRASBURG, March 31.  
A few days after the entry of the  
French troops into Alsace, a com-  
mittee was formed to raise money to  
assist the devastated Northern Pro-  
vinces of France. The committee to-  
day forwarded 1,000,000 francs to  
President Poincare as a testimony of  
the gratitude of Alsace to France.

**NOT BONA FIDE.**  
LONDON, March 31.  
The publication by the Daily Her-  
ald, the new labor newspaper, of a  
report that those in power in Russia  
had made comprehensive peace pro-  
posals to the Allied and associated  
Powers, caused no stir in diplomatic  
circles in London to-day. Those in a  
position to speak authoritatively on  
Russian affairs, say that if such new  
proposals were made they will be  
doubtless considered as not being  
bona fide as have been other propos-  
als or feelers put forth by Premier  
Lenine.

**WAGES IN BUDAPEST.**  
VIENNA, March 31.  
The daily wages of laborers in  
Budapest have been fixed at twenty  
crowns for men, twenty-five for wo-  
men, and twenty for children. The  
normal exchange value of the crown  
is twenty cents. Thousands of law-  
yers, small business men and officials  
are out of employment as a result of  
the revolution, and are applying for  
work as laborers.

**RETURN OF CANADIANS.**  
OTTAWA, March 31.  
In the House of Commons to-day, in  
reply to a question by Mr. LaPointe,  
of Kamouraska, Minister of Militia  
Mowburn said that arrangements had  
been made for the return of the Si-  
berian Expeditionary Forces. The  
date is being kept secret on the re-  
quest of the British Government.

**GAS EXPLOSION.**  
TRINIDAD, Colorado, Mar. 31.  
Thirteen men are reported embol-  
ed in the Empire Mine of the Empire  
Coal Co., near Aguilas, Colorado,  
which was wrecked by an explosion  
of gas this morning.

**AGAINST GOVT. TERMS.**  
CARDIFF, Wales, March 31.  
At a conference of the South Wales  
miners to-day, a resolution was  
adopted advising the Miners' Federa-  
tion to reject the Government's terms  
of wages and working conditions for  
the coal miners, based on the recent  
report of the coal commission, of  
which Justice Sir John Sankey is  
chairman.

**REACHED A DECISION.**  
LONDON, March 31.  
The department of the German  
Foreign Office having charge of the  
peace negotiations, has reached a de-  
cision as to its attitude towards the  
negotiations, a German wireless mes-  
sage says. The department has de-  
cided the German Government should  
act only in accordance with President  
Wilson's fourteen points.

**Unprofessional Men  
As Inventors.**  
That so many inventions have been  
made by men not of the profession,  
nor previously engaged in engineer-  
ing work, seems convincing proof that  
the class of mind best suited for re-  
search and discovery differs largely  
and fundamentally from that which  
in other men succeeds in directing  
successfully all kinds of work, men  
and other operations. Hence the dif-  
ferentiation indicated above. Bra-  
mah was a blacksmith and maker of  
locks; George Stephenson was a fire-  
man; "Screw-propeller" Smith, the  
man who patented a good workable  
propeller and got the Archimedes  
built was a farmer; Samuel Hall was  
in the lace trade; Goldsworth Gur-  
ney a doctor. The inventor who ex-  
hibited an internal-combustion en-  
gine a hundred years ago at Cam-  
bridge was a parson, as was also  
Ramus, the inventor of the hydro-  
plane ship; James Watt was an op-  
tical-instrument maker; the inventor  
of the chronometer, and winner of  
the King's prize for it, was a gar-  
dener; "Increasing-pitch" Woodcroft  
was a librarian; Bessemer was an ar-  
tist; Armstrong a lawyer; and even  
in our own days we have had very  
many valuable additions made to our  
knowledge by men outside the profes-  
sion, which all goes to show how  
much more liberal we are than the  
members of those other professions  
who would monopolize that adjective  
for their own.

**Heavy Storm.**  
A very heavy storm raged yester-  
day on the West Coast, but moderat-  
ed somewhat last night. The s.s.  
Kyle which has been jammed for  
some days in Sydney tight, was freed  
by the sea occasioned by the gale,  
breaking up the ice barrier. The ship  
went back to North Sydney.

### Why Raise Your Hat?

Many of the customs in everyday  
life have long since lost their real  
purpose. Take, for instance, the  
practice of shaking hands. When  
two foes were making a truce it was  
deemed necessary to guard against  
treachery. So they held each the  
weapon-hand of the other. Then  
gradually this became the mode of  
greeting friends, as they were friends  
when a truce was declared.  
Why does a gentleman raise his hat  
on greeting a lady friend? In the  
strenuous life of long ago, when men  
wore armour, the helmet was only  
doffed in the presence of friends.  
Hence the raising of the hat is a  
complimentary sign of the wearer's  
regard.  
Courtesy is not now so popular  
as it was years ago. Then the vil-  
lage dames "bobbed" in greeting to  
the squire's lady, but the rising gen-  
eration is above this. The curtsy  
is a relic of the time when women  
went on the knee to beg mercy from  
men of rank, and is therefore a tact  
acknowledgment of inferiority.

### Freak Strikes.

Two examples of freak strikes in  
New Zealand were mentioned in the  
course of a recent speech by Mr. F.  
M. B. Fisher, for some time Minister  
of Customs and Imports in that col-  
ony.  
On one occasion, he said, the crew  
of a boat struck because in the ar-  
ticles it was provided that Worcester-  
shire should be served. As a matter  
of fact, the supply ran short and an-  
other brand was supplied with the  
result that the men declined to take  
the vessel out of the dock.

### New Ship's Propeller.

To increase the efficiency of the  
ship's propeller, it is suggested by an  
inventor to place a smaller propeller,  
but with a steeper pitch, in front of  
the usual propeller, and on the same  
shaft. The smaller radius of the  
auxiliary screw compensates for the  
greater pitch, reducing the resistance  
to the screw.  
The inventor of this double pro-  
peller claims that the auxiliary screw  
causes a better utilization of the en-  
gine's power. The small screw placed  
in front of the usual propeller acts  
upon the water near the shaft, where  
the larger screw exerts but little pow-  
er. He contends that the addition of  
the smaller screw will not increase  
the burden placed upon the engine of  
the ship, and that, with the same mo-  
tive force it will add from 25 to 30  
per cent, to the driving power of the  
propeller.  
There is no doubt that the addition  
of another screw of greater pitch  
would increase the driving power of  
the propeller a great deal, but it is  
by no means clear how this can be  
produced without adding to the bur-  
den of the ship's engines.—Popular  
Science Monthly.

### Shipping Notes.
