It Leaves the Skin Tingling With Health

There is a wonderful difference in soaps. Have you ever noticed how one kind leaves the skin soft and white while another may leave it red and rough?

Both soaps looked alike, perhaps. But the difference was in the material. Let us tell you what we put into Infants' Delight, then decide if you can continue with common soap. Ceylon is an island in the Indian Ocean, and

from there we bring pure cocoanut oil 12,000 miles to our factory. Then we go to France for vegetable oil, and often pay double what we might pay. But our oil is pure enough for your table.

These oils are doubly boiled and then milled by our own special process, after which they fall like flakes of snow into enormous bins.

Then they are crushed under a weight of 30 tons to press out the moisture. Next they pass through granite rollers and come out in miles of silky ribbons. Finally they are dried eight times and then stamped into cakes.

Could you imagine a more delightful soap than this? It lathers into a rich, creamy foam. It wears as thin as a wafer. It leaves the skin as soft as velvet and as smooth as satin. It is the very utmost in perfect soap.

The perfume is the delicate scent of the roses. We pay \$100 a pound for pure Otto of Roses, but it requires 3,000 pounds of rose leaves to make a single ounce. The fragrance is simply exquisite-it brings the breath of a million flowers. Use a single cake and learn how delightful it really is—it costs no more than the common, so why not have the best?

Shave some Infants' Delight into a tub of hot water and let it dissolve. Then immerse your body and remain in the water several minutes. Lather the body thoroughly with Infante' Delight-rub it right into the skin, for it is so pure it will only nourish and soothe. Massage well with the finger tips and the palms of the hands and you will find a most pleasant sensation after the bath is finished. INFANTS DELIGHT
