LETTER FROM CARIBOO.

FROM AN OCCASIONAL CORRESPONDENT. Barkerville, Sept. 8, 1865.

WILLIAMS CREEK. Though mining operations have assumed here a rather gloomy appearance of late, there are still a few companies taking out good pay.

The RABY Co. declared on Sunday last a dividend of \$200 to the interest. This shows that there is some good pay still left in this old claim.

THE CAMERON CLAIM still continues to pay remarkably well, say 40 ounces daily, on an average. This company, though they have not struck spots as rich as the Herd Curry, the Caledonia, the Ericson, &c., have still been one of the luckiest on the creek on account of their claim paying so regularly and so long.

THE FOREST ROSE Co. have struck a good prospect in their new shaft at the back of the hospital buildings, but they have not washed up so far any gold to speak of; they continue to get pay from their front drift.

THE RANKIN Co., who have made fair wages during the most part of the season, have stopped working, being unable to compete with underground water.

THE CALIFORNIA AND NEVADA Co.'s are in a fair way of getting good prospects in their respective tunnels.

THE LAST CHANCE CLAIM still yields its average of gold, though not as formerly; the pay is found in an upper strata, four feet above the bed rock.

THE BRAUERGAARD and CONFEDERATE CLAIM is one of the very best claims on the creek, yielding most regularly from 30 to 50 ounces daily. This company get their pay too from an upper strata, very little gold being found on the bed rock.

THE OLD MOFFAT CLAIM has not yielded anything this season, but most likely will ere long.

THE MORNING STAR CLAIM is a most promising one, and pays as well as ever. The company washed up 30 ounces the day before yesterday, and just as much the day before. It is one of the best claims now in the Cariboo district.

THE CALDONIA Co. took out \$600 above expenses the week before last; I did not hear how much they got last week.

THE CARIBOO Co. make small wages.

THE YELLOW VINDY alias DAVIS Co. levied an assessment of four hundred dollars last week to the interest, being greatly behindhand owing to their long costly prospecting. Now they have commenced to take out some very good pay—over 100 ounces per week.

THE RYAN Co. have been very unsuccessful so far in their prospecting; they are however continuing to pitch in like brave fellows.

THE HIT or MISS Co. are not making expenses just now.

THE AUSTRALIAN Co. are taking out a little above wages.

THE WELCH Co. make about the same.

THE AURORA and SAWMILL Co.'s have at last adjusted their difficulties in an amicable manner in regard to a very rich piece of ground which had been for a whole year in litigation. The two companies have agreed to work it together through the Aurora incline. This is most fortunate for the two companies, as law would have eaten up in the long run the whole proceeds of the ground in contention. It is to be hoped that other companies who may have some difficulties of the same kind will take the hint and do away with expensive law proceedings, resorting to the more reasonable means adopted by the wise owners of the two above mentioned claims. They have just commenced washing. They took out 50 ounces the day before yesterday out of the gravel alone, the bed-rock being untouched. This is most encouraging.

THE SHEPHERD Co., who have been working most unsuccessfully for the last three years, have at last got into what is supposed to be the creek lead. They took out on Sunday morning 22 ounces and \$4 from the bottom of their new shaft. This is a most promising prospect.

CONKLIN GULCH. The ERACON Co. have struck pay dirt on the high ledge, which will yield two ounces daily to the man. It seems to be a continuation of the Aurora lead.

THE RED Co., who have spent during the last three years over \$50,000 in prospecting their claim, fell in with good pay last week, finding nuggets weighing two and three ounces. They washed up forty ounces the day before yesterday.

GROUSE CREEK. About 7 or 8 companies (in the aggregate 60 men) are working on this creek, making small wages.

ANTLER CREEK. I am sorry to state that a party of Frenchmen, who found a good prospect in one of the flats of this creek last spring, some 20 miles from the old deserted town, have not realized their sanguine expectations.

LOWHEE CREEK. has failed to yield this season as largely as in previous years. There are still in that locality a few claims that will pay well so soon as water can be had from Crane's new ditch. This work will prove a great boon to that section of the country.

LIGHTNING CREEK. Very little gold is coming out of this creek.

CUNNINGHAM CREEK. on which some hopes were centred at the beginning of this season, turns out to be a regular "fizzle," to use a miner's phrase. Two companies only are reported to be making wages, and this is even doubtful.

BURNS CREEK. The excitement in regard to this creek has commenced to abate, for the very simple reason that the whole ground supposed to be worth anything is all staked off, and no new strikes have been since reported. So far two companies are taking out pay. The one composed of three men make \$100 per day above expenses, and expect to do a great

deal better when their claim is pretty well opened. The latter one is doing well too, although taking out less gold. The creek is a small one, being situated eight miles from Williams Creek, and two and a-half miles from Nelson Creek, with which it runs parallel into the swamp forming an outlet into Clubs Lake, the whole forming an outlet into Willow River. Some twelve companies are now prospecting on this creek.

SAD CASUALTY. I much regret to have to relate that on Saturday last two miners, while excavating the bank on the hill side below Richfield, were buried by the ground falling suddenly on them. When extricated the one was badly bruised, the other unfortunately was a corpse. The man who was killed (Louis Rock) was a German by birth. In a country like this, where the ground is more or less impregnated with water, it is a very dangerous business to undermine high banks, as miners are used to do in California. This, however, the first instance of such an accident happening in Cariboo, and let us hope it may be the last.

ACCIDENT. A man by the name of Spralle had his leg fractured by falling down the Hart Co.'s shaft, one day last week. An unlucky claim this one is. Mr. Hart, who gave his name to the claim, met with a premature death two years ago by falling down a shaft on the very same ground.

A VICTORIA VISITOR. I shook hands yesterday with Mr. Rueff, of the firm of Spobog & Rueff, merchants in Victoria. Mr. Rueff does not look any the worse for his trip to our mining region.

THE WEATHER. has been unusually stormy for the last two days, raining almost incessantly. The creek has raised to a fearful extent, and it is to be feared that some damage may be caused by the water to some of the shafts.

FIGHTS. I shall not regale your readers with minutes of the fights which are of daily occurrence on this creek. Such scenes are a disgrace to any civilized country, and ought to be stopped at once by the law visiting the offenders in a most stringent manner.

TELEGRAPHIC.

[Dispatch to the Oregonian.] CALIFORNIA NEWS.

SAN FRANCISCO, Sept. 13.—The Overland Telegraph was working at 5 o'clock, P. M., to-day.

The opposition steamer America which sailed this morning, carried a large number of passengers. Among the passengers looked for in the next Panama steamer are Chief Justice Field, D. W. Cheeseman, Assistant U. S. Treasurer, and Gen. H. W. Carpenter, President of the California State Telegraph Company. The latter gentleman goes East with a view towards arranging for increased telegraphic facilities with the Atlantic States.

Assistant Treasurer Cheeseman goes at the invitation of Secretary McCulloch, who desires to consult with him personally relative to revenues and fiscal matters generally on this coast.

The Opposition Telegraph Company have contracted for all their poles from San Francisco to Austin, Nevada Territory. A portion of their material is expected by next steamer, and they will commence the work of construction upon its arrival.

Alonzo P. Kirkland, the boy incendiary who set the office of the Lumber Dealers' Association on fire three times, was to-day held for trial on three charges of arson.

Judge Shepherd resumed his seat on the police court bench again this morning.

The proposed Merchants' Exchange promised to become a success despite the strong opposition against it.

Sailed—Sept. 12th, bark Kutsoff, Puget Sound.

James H. Rickeson died suddenly at the Washington Lodging House, on Washington and Sansome streets, on Monday evening, of cholera morbus, of a type so malignant that it would have passed for the genuine Asiatic cholera.

The screw steamer Montana, now on the way from New York to this port, it is understood, will be employed by the Pacific Mail Steamship Company in the freight business between this port and Panama.

The New York Journal of Commerce states that several first class steamers are soon to be constructed on the Atlantic coast for the coasting trade of California and Oregon.

SAN FRANCISCO, Sept. 11.—We have already noticed the arrival of the Colorado with the Fourteenth Regiment United States Regular Infantry, numbering nearly 800 men. They are to be joined speedily by the Second Regiment of United States Artillery. In explanation of the move of these troops, the New York Post of Aug. 15th says, nearly all the regular troops on the Pacific coast were withdrawn during the rebellion, and the men now going forward will assist in subduing the Indians if necessary.

A number of passengers from San Francisco via Panama to New York, are out in a card in the New York papers, denouncing the treatment of passengers by the Atlantic Mail Steamship Company, between Panama and New York, as an infamous, burning shame, and a national disgrace.

Hon. J. M. Ashley, member of Congress from Ohio and Chairman of the Committee on Territories, who recently made the overland trip to Utah, Idaho and Oregon, arrived in this city by the steamer Sierra Nevada, yesterday.

The steamer Sierra Nevada arrived yesterday from Portland and Victoria with \$480,000 in treasure.

SPECIAL DISPATCH TO THE "COLONIST."

EASTERN NEWS.

New York, 8th.—The Meteor, from New Orleans, brings dates to September 1st. The papers contain the following: Governor Hamilton, of Texas, has ordered the necessary steps to call a Convention.

Judge Barnett, President of the Republic of Texas, has consented to go to Washington to make an appeal in behalf of Jeff. Davis, at the request of men, nearly all of whom struggled for the Independence of Texas.

A. Houston, of Texas, in a letter to the Delta gives an account of the opening of the port of Galveston, it gives life and vigor to every branch of Trade. All the troops, except a provost guard of 300, have left. Gov. Hamilton's appointments give general satisfaction. A year of unexampled prosperity for the State is looked for.

OMAHA, Nebraska, Sept. 9.—The Overland Telegraph Line to California is in excellent working order. No Indians are on the route, and no further troubles from that source are expected. News is daily expected of a battle between General Connor's forces and the Indians on or near Big Horn River, a branch of the Yellowstone.

Boston, Sept. 8.—Ex Governor John Page died this morning at his residence at Haverhill, N.H.

The freedmen give some trouble by violating contracts, leaving the planters at the commencement of the harvest.

A Mason, G., correspondent of the Augusta Transcript says, judging from the numbers taking the amnesty oath in that county, a large vote will be polled next election. Nearly all the white troops have been removed from Mason. The city is comparatively quiet.

New York, Sept. 8.—The steamer Ariel has arrived from Aspinwall with later dates than the Costa Rica. She carries out troops for California.

New York, Sept. 7.—The Times says that A. D. Calver, our Minister, has obtained from the Venezuela Indians a convention for settlement of all American claims. The Government has by this means obtained 10 years for payment, except in some cases of trivial importance. General Falcon, who is the head of affairs, retains command. [The above item is somewhat mixed.—Op.]

ENGLISH NEWS.

New York, Sept. 8.—The Fenian fever is spreading rapidly in Great Britain, and their agents in Ireland in a very short time have created great excitement throughout the entire kingdom. The greatest alarm prevails among the priesthood, the majority of whom, though opposed to English rule, denounce from the pulpit the Fenian Brotherhood. The secret of their opposition lies in the fact that the order alienates the people from the priesthood. They favor any movement against England, either moral or physical. We now hear of drilling all over the country. In some places they are in squads, and there have been entire regiments. The Constabulary here have had a very hard time of late. The authorities have in many instances sent them out in places where Fenians were drilling. They are closely on the watch, but it is seldom they meet with their enemy. Only a few collisions have thus far taken place, some of them resulting in loss of life. The young men in and around Dublin have subscribed money, and, as they can't afford to go into the country and encamp every day, they have hired halls where they are taught mili-

tary drill. The Constabulary here are aware of these secret assemblies, but they dare not or will not interfere, and pretend not to know the location. [We think this is rather sensational to be true.—Ed. Col.]

MEXICO.

New York, September 5th.—The Tribune's correspondent at Matamoros, Aug. 14th, had a long conversation with General Delon, [?] of the Liberal army. The latter says that he wants assistance so urgently that unless it is given in some way the cause will be lost. They have no money, arms, ammunition, clothing, and even no provisions. The last want is so much felt that large bodies of men cannot keep the field. It is only by entreaty that the chiefs can hold them together for short periods. Delon told the writer that he and others had to beg them by all they held dear to keep together; that he has seen men lying on the ground moved to tears by the words of their leaders. The bodies of men yet in the field are: Gen. Negrete's 5,000 men, Gen. Garcia's 5,000, Gen. Delon's 2,000, Gen. Riva Palacio's 1,300, General Hingos's 800, with President Juarez 300—total, 16,200. This is the total force that can be said to be acting under orders of the Government. The first of these corps in importance is that of General Negrete, which holds the state of Chihuahua; the second is that of Gen. Garcia, which operates on the line of the Sala.

Some correspondent says: About two o'clock A. M. to-day a dash was made by a small body of men, under orders of Cortinas, against a point of the defences of this city. It was easily repulsed. The firing in the dark was very brisk. The Commandant Neas, with his special arm of mounted rifles, has marched upon Caderola. A fight between him and a part of Delon's force is looked for in the environs of Tabasco.

COMMERCIAL.

VICTORIA MARKETS. SATURDAY, Sept. 16. No marked change has characterized the flour and grain market during the week, and trade generally continues much about the same, with slight variation in prices. The supply of flour and wheat is still limited. Several small lots of Island grown wheat barley and oats have realized very fair prices. Considerable shipments were promised in the course of a week or ten days, but the recent heavy rains will, no doubt, prevent their coming in so early. The Orizaba and Crosby brought from Portland 286 qr sacks flour and 205 bags middlings.

Holloway's Ointment.

Contracted or Stiff Joints. All the medicines in the London Dispensary would hardly benefit a case of contracted or stiff joints; whereas this invaluable ointment, being rubbed into such parts twice a day, the effects will be immense. Paralytic patients even can derive advantage from this fine remedy when other means fail.

Scorbatic Humours.—Scald Head and Skin Diseases. Scorbatic humors arise from an impure state of the blood, and in most cases the liver and stomach are the organs at fault. The Pills will speedily restore these to a healthy action; while the Ointment, if well rubbed in at least twice a day, will soon cure any case of skin disease. Soldiers, sailors, and miners, use this famous Ointment in all parts of the world.

Disorders of the Kidneys, Stone and Gravel. In any of the above complaints more benefit may be derived in twenty-four hours by adopting the following simple means than is frequently brought about in six months by any other treatment. In such cases if the Ointment be rubbed into the small of the back over the region of the kidneys, it will quickly penetrate, and in most instances, give immediate relief. Six or eight of the Pills should be taken nightly according to circumstances.

Diphtheria, Sore Throat, &c. These maladies are of so serious and dangerous a nature that the Ointment would not be recommended unless the Proprietor was sure of its effects. It will cure them every other means have failed, if applied immediately, and not delayed until the patient is beyond recovery. It is a sovereign remedy for sore throat. Settled Coughs or wheezing will be promptly removed by rubbing in this unguent. Mothers should rub it into the chest of their infants whenever there is any hoarseness, tightness, or other affection of breathing.

Rad Legs, Bad Breasts, Old Wounds, Sores and Ulcers. It is surprising how quickly a sore, ulcer, or wound, deprived of its vitality, strength, and unity for the duties of life; but it is no less wonderful to watch the effect of Holloway's Healing Ointment when it is used according to the printed directions, and assisted by appropriate doses of the Pills. The pain, inflammation, and other morbid manifestations, soon disappear from the affected part and health and strength return. This treatment creates sound flesh, and therefore makes its cures complete.

Gout and Rheumatism. Will be cured with the greatest certainty if large quantities of the Ointment be well worked into the complaining parts. This treatment must be perseveringly followed for some time and daily assisted by powerful doses of Holloway's Pills. The essence of these diseases lies in the blood, which has floating through each vessel the painful poison which vitiate and inflames every tissue it comes in contact with, and produces the hot, swollen, elastic enlargement about the joints so characteristic of gouty and rheumatic maladies.

Both the Ointment and Pills should be used in the following cases: Bad Legs, Ulcers, Gout, Rheumatism, Sore Throat, Contracted or Stiff Joints, Scald Head, Skin Diseases, Scorbatic Humours, Sore Breasts, Old Wounds, Sores and Ulcers, Rad Legs, Bad Breasts, Old Wounds, Sores and Ulcers, Diphtheria, Sore Throat, &c.
