

THE CITY.

FROM THE DAILY COLONIST, FEBRUARY 27. THE Council of the B. C. Board of Trade hold a regular meeting next Tuesday forenoon.

A SKETCHMAN in this city the other day received a letter from Warrington, England, New York, the time occupied in transmission from point to point being thirteen days.

THE funeral is to take place next Sunday of Mrs. Saretta Jenkinson, wife of Mr. O. W. Jenkinson of Carris street, Victoria West, who died yesterday in her thirty-fourth year.

PHINEAS MANSON, a native of Wick, Scotland, 64 years of age, and a 44 years of the Hudson's Bay Co. in this province, died yesterday at the Jubilee hospital, from which institution the funeral is announced to take place to-morrow.

THE funeral of Adam Johnson took place yesterday afternoon, the religious services being conducted by Rev. S. Beckett of the Seventh Day Adventist church. The pallbearers were Messrs. C. Alexander, S. Booth, S. Whitley, J. R. Giscombe, J. W. Fryhill and C. H. Sharp.

THE case of George Wilson, charged with the theft of a watch from Mr. Alexander of Fort Simpson, has been remanded for eight days. A second remand will then be required, as there will not yet have been time for the prosecutor to arrive from the North. Wilson stoutly maintains that the watch is his property.

JAMES P. HYDE, of Portland, Ore., is making anxious inquiries as to the whereabouts of his father, Harry Hyde, a bricklayer by trade, who was last heard from in this city about three months ago. Any information concerning him will be gladly received by Chief of Police H. W. Sheppard or James P. Hyde, 128 Eleventh street N., Portland, Ore.

THERE was an impressive burial service at the Masonic Temple last evening, conducted over the remains of Mr. Fred Tombs, of Ottawa, by the Worshipful Master, Victoria Columbia lodge, A. F. and M., Mr. A. L. Belyea. There were in attendance the widow and daughter of the deceased, as well as several friends and a large representation of the craft, who after the services at the Temple escorted the remains to the wharf and placed them aboard the Charmer. The following gentlemen acted as pallbearers: Messrs. D. Wilson, M. H. Thomson, R. Erskine, George Dow, A. McKewen and W. J. Quinlan. Mr. Tombs will accompany the body to Ottawa, where the interment will take place.

WHILE the cold winds are blowing and the snow is drifting high in the majority of Eastern towns and cities, Victoria weather is getting a good advertisement by being in their fur and engaged in the pleasing pastime of thawing out the thermometer by the coal stove, Canadians of the East will find it hard to understand how in a city so far north as this the inhabitants can so fortably gardening in their shirt sleeves or strolling through the park in the evening listening to the building's merry song. Yes that is Victoria. While New York is buffeted by the fiercest storm of years a fortnight ago, the thermometer here was almost stationary in the neighborhood of 50, and one could not ask for more delightful days or more pleasant nights.

At a special meeting of the public school board yesterday, it was decided to hold forthwith the election of the additional trustee created by the legislation of the session just closed, and Mr. W. K. Ball was appointed returning officer. A committee of the board were also named to represent the government in connection with the proposal to include the teaching of vocal music in the regular public school curriculum, the granting of authority to the board to appoint a music teacher to be provided with the usual certificate of qualification as a teacher of the province, and also to impress upon the government the wisdom of increasing the standard of education necessary for entrance to the High school. These three matters—two in reality—were fully discussed, and will form the subject of a report from the committee to the board at the next regular meeting of the latter body.

JOHN T. HOWARD, proprietor of the Howard hotel, Esquimalt, died last evening from the effects of a fourth stroke of paralysis, received two weeks ago last Monday. For the past eight years the deceased has been a victim to the disease and his death was therefore not unexpected. He was at the time of his death 71 years of age, and well known to all old residents. The deceased was a native of Manchester, Eng., but for years followed the hotel business in Esquimalt in which capacity he became widely known. The death will be greatly lamented in Esquimalt, where the deceased was known and highly respected by every resident. The arrangements for the funeral are not yet completed, but the interment will be conducted by the Masonic order of which he was a veteran member. The family circle immediately bereaved consists of a wife and two children; James and Miss Macdonald of Victoria are also cousins of the deceased.

A TRIUMPH of photographic art and skill, the subjects being the officers and prize winners of the James Bay Athletic Association, was so far completed yesterday as to be placed on exhibition in Mr. Skene Lowe's studio in a few days, when it has been framed, the pictures will be put before the public in a Government street window. The principal trophies competed for during the four years' existence of the club form appropriate border, and there is also a pretty view of the club buildings. The officers photographed are Mr. H. Dallas Holman, president; Ven. Archdeacon Scriven and Mr. A. C. Finlayson, vice-presidents; and Mr. A. C. Dallas, secretary-treasurer; and there are no less than thirty-eight prize winners—a stalwart and handsome set of men, who would do credit to any athletic club. Great taste has been shown in the arrangement of the component parts of the picture, and the workmanship is of a high order, and the result is of the most pleasing description.

THE case of Comptroler & Mapo v. the City of Victoria was heard by Mr. Justice Drake yesterday in the Supreme court. Defendants are suing for \$7,000, amount of contract for constructing sewers on Fort, View and Yates streets for the city, and also for \$1,800 for extras, making a total claim of \$8,800. Defendants on the other hand claim that \$3,900 is all plaintiffs are entitled to. Defendants hold that the agreement, according to the plans and specifications, called for 2,647 feet to be excavated if necessary, and as only 1,406 feet were really got out, allowance must be made for that. Plaintiffs on the other hand claim the contract was for a lump sum. The difference of opinion is over the specifications and bills of quantities, which are interpreted differently by defendants and plaintiffs. The case occupied all day. Mr. Justice Drake decided that the contract was for a lump sum, and gave judgment for the main claim

of \$7,000, subject to the provision of the contract that the city should hold ten per cent. for six months. Judgment was given for \$1,800 for extras was reserved. E. V. Bodwell for plaintiff; W. J. Taylor for defendants.

A GOOD time was enjoyed by all attending the congregational social in the First Presbyterian church last evening. There was a large attendance. The ladies of the church had charge of the refreshments, of which there was a beautiful supply. The programme was as follows: Vocal solos, Misses Smith, Robertson and Poyser; reading, Rev. Mr. Morrison; and prayer by Dr. Ling and Mr. Alex. Wilson.

Mrs. and Mr. David Spencer's residence, Bridge Street, was where the members of the Y. W. C. T. U. gathered last evening, the occasion being one of the society's periodical "at homes." The affair was a great success. One pleasant feature of the evening was the admission of four new members to the society, Miss Wheeler and the Misses Smith, Johnson and Leach contributed towards a programme of music.

VICTORIANS will have an opportunity of hearing Rev. E. R. Hawley, the eminent English divine, at the next month, arrangements having been made for the most part at the Victoria theatre. On the evening of March 12 he will speak on "Music, the Art of the Ages," with illustrations on the violin, as an instrument upon which he is a remarkable performer. On the following afternoon he gives his famous lecture on "Music and Noise," with experiments on the Chinese organ, penny whistle, tuning fork and violin. There will no doubt be crowded houses on both occasions.

The London "Sketch" of January 23 has an illustrated article on Mr. Southern Macdonald, who is described as the most superb tattooer in the world. Tattooing for the past few years has been a fashionable art in England, and Mr. Macdonald, by means of an electrically worked needle—his own invention—has tattooed intricate designs on the bodies of his patrons, among whom have been many distinguished people. The work is done in a variety of colors and is described as decidedly artistic in design and execution. Mr. Macdonald is a brother of Mr. Donald F. Macdonald of this city.

SPORTS AND PASTIMES. The Victoria Rugby club will meet their donkey opponents, the Wanderers (Association) players at their own game (Rugby) on Saturday next at Colwood park. The game is in aid of funds to defray expenses of the Wanderers travelling to Nanaimo to play off their final tie with the Rangers of that city for the magnificent challenge cup now held by them. It is hoped that the interested in the success of Victoria's champion association football team will patronize this game and also the following one on the 9th March, Wanderers v. World. The teams for Saturday's game will be the Wanderers, Saturday morning's game. The Rugby men will be strengthened in one or two places, while their strongest fitness out to try and retrieve their previous defeat. The Wanderers will be represented by very much the same men, but probably in different positions. Both teams are in splendid trim and a magnificent struggle will result.

TO THE SPOKINGEYERS.—Having noticed an article in the issue of your paper of the 22nd inst., with reference to the meeting of the British Columbia Football Association held at Nanaimo, I find, after careful examination of the same, that there are some very misleading statements, which I think need contradiction. (1) It is stated that the president of the B. C. F. A. is a member of the Nanaimo Rangers Football Club, that is not so, as he is not connected with that club in any way. (2) That the president said he would vote against the motion made for the final cup tie to be played at Victoria, is absolutely false. After the delegates had discussed the motion and seeing that it was only going to be a party vote between Nanaimo and Victoria, it was unanimously agreed that the motion should be withdrawn. (3) With reference to the Victoria Wanderers having to accept any and all of the arrangements that the Rangers saw fit to make, might draw the attention of the Association (as he calls himself) to clause 4 of the constitution of the association, which deals with all matters relating to the final cup tie. (4) The association is not an association of clubs, but of individuals, the Nanaimo Rangers Football Club, and all the clubs of the association are duly notified of any meeting which is to take place, but if the clubs notified do not send delegates to represent them, they follow in line with the majority, which the Wanderers do not seem to want to do. (5) The president did not rule against the voting powers of the delegate of the Barracks Athletic, as the question was never raised.

As to the question of the Wanderers having to travel so much, this is not any fault of the Nanaimo Rangers. All teams are placed in the drawing and such must stand by its chance. The Rangers are very fairly well represented, and everything being done to a close and interesting game. There will be a practice Rugby game at the Hill this afternoon. A large attendance of the Ishmen is requested.

PADDIES PREPARING. Arrangements are being made for the completion of the Irish Rugby football team to represent the Emerald Isle on March 16 next. The Irish contingent are determined to make a great effort to redeem last year's defeat. Vancouver Island will be strongly represented, and everything being done to a close and interesting game. There will be a practice Rugby game at the Hill this afternoon. A large attendance of the Ishmen is requested.

CANOEING. V. C. C. ANNUAL MEETING. The Victoria Canoe Club had their annual general meeting last evening, with thirty-five members present and Mr. W. J. H. Holmes in the chair. The report of the secretary-treasurer was read and adopted, that gentleman being warmly congratulated upon the surplus shown. Officers for the year were elected as follows: Commodore, C. A. Godson, J. H. McGregor, Arthur Robertson and Frank Higgins. Everything points to the likelihood that the coming season will be an exceptionally good one, several very attractive propositions being now under consideration by the leading spirits in this popular institution.

BOARD OF ALDERMEN.

Work on Electric Light Extension Ordered Stopped for Want of Funds.

Civic Employees to Conduct the Elections on Money By Law in March.

The city council held a special meeting last night in the Mayor's room at the city hall, all the members being present with the exception of Ald. Ernie.

The following communication to the City Clerk from the Deputy Attorney-General was read:

Sir:—I have been directed to call the attention of the City Council to the case of the man Home, but who, owing to some disagreement with the contractor, has refused to pay the cost of the work done in this matter. The contractor has been vindicated, and it seems perfectly clear that the contractor should be paid for the work done. The government is in view of the difficulty of the case, and will be prepared to accept Mr. Home's offer to pay the cost of the work done in this matter. The contractor has been vindicated, and it seems perfectly clear that the contractor should be paid for the work done.

ALD. HUNTER moved that an answer be made that Mr. Home's offer to pay the cost of the work done, but left of his own accord, and also that the contractor's action had been vindicated. Carried. The letter was referred to the committee.

Thomas Prescott, foreman of the water works, asked to have his salary restored to \$100 per month. J. L. Rayner asked for an increase of \$20 a month, in accordance with the understanding when he was appointed water commissioner in addition to his duties as auditor.

Both communications were laid over until the submission of the estimates. Mr. John Stewart applied for the position of plumbing inspector, with a salary of \$90 to his present salary in the city of \$80. By being relieved of some of his present work he could attend to both duties. Laid over.

The by-law authorizing the \$10,000 emergency fund to be used for electric light purposes was put through committee. The date for the ratification to vote upon it was fixed for March 19.

ALD. WILLIAMS moved that a clause be inserted explaining that the money was to be used for the extension of the electric light system. Carried.

His WORSHIP did not see the use of inserting such a clause. ALD. WILLIAMS wanted the people to know exactly what they were voting on. That was the reason he had moved the amendment.

ALD. McLELLAN was sure the people understood perfectly well—just as well as the aldermen—how the matter stood. When it came to appointing a returning officer for the election, Ald. Williams asked why some of the city officials could not do the job, and he had to be appointed a city having to bear the expense of appointing an outsider.

ALD. MacMILLAN moved that Mr. Northcott be returning officer. Ald. Williams seconded this motion. This was carried. ALD. HUNTER moved that Mr. Northcott be returning officer. This was carried.

ALD. McLELLAN moved that the people be asked to pay the interest on the loan and to pay the interest on the loan and to pay the interest on the loan. A motion was made that the interest on the debentures be 4 per cent. instead of 4 1/2 per cent. was voted down.

ALD. CAMERON did not consistently support the proposition because he did not think the city could afford to pay the interest on the extension of the electric light system. A resolution was submitted to show where the money would be obtained he could not vote for the proposition.

ALD. McLELLAN replied that the people had it in their power to defeat the by-law when it was submitted to them, but so great a demand had been made on the council for increased rates that the by-law should be placed before the ratepayers.

The by-law was finally put through committee and will be submitted to the ratepayers for their approval on March 19, with the \$10,000 by-law for electric light extension.

It was decided to ask the school board to meet the council next Tuesday evening to consider the school estimates that the interest on the debentures be 4 per cent. instead of 4 1/2 per cent. was voted down.

The council will hold a private meeting this (Thursday) evening to talk over the electric estimates.

ALD. WILLIAMS wanted to know whether or not, in the opinion of the council, it would be better to close down work on the electric light extension until the rate of interest proposed by law was decided. The electric light committee did not wish to not illegally, it was a question if they had any right to go without having the money at their disposal to pay for the work.

THE MAYOR believed the work should be shut down till the required money should be on hand. ALD. WILLIAMS thereupon moved, seconded by Ald. Farbridge, that until such time as money is available, all the men employed in connection with the new electric light works be paid off and discharged, and that only the placing of the line shafts be proceeded with as contemplated.

The council adjourned at 10:15 o'clock.

SHIPS AND SHIPPING. Yesterday R. P. Ribbet & Co., Ltd., local agents of the Pacific Coast Steamship Co., were notified by wire of the latest out in the passenger rate competition. Cabin passage from here to Wrangell, Alaska, on the steamship City of Victoria, which sails March 9, is placed at \$10 and stowage at \$5 while from here to Juneau on the same voyage cabin fare is \$12 and stowage \$5. The fare to Stikine being \$15 and \$10 respectively. The steamer Alki which follows the Tokepa as far as Wrangell, which will not go to Stikine will charge the same as the Alki. She sails from here March 17. Although the rates were charged passengers leaving here for San Francisco on the Olympia last evening, the passengers going south on the City of Poughkeepsie will have the advantage of a reduction, for the rates will then be only \$15 and \$10 respectively. The steamer passengers who left on the Olympia last evening were J. E. Somerville, wife and daughter, F. Fager, J. D. Brunette, Miss L. Gould and Miss Fleet.

MINING ITEMS.

Considerable excitement has prevailed lately over the discovery of a free milling gold lode, or lodes, in Mineral creek, Albert district, and assays have been made by various assayers, some results running very high and others low. This is easily explained by the fact that in such cases the discoverer is tempted to use for assay what looks best, and consequently misleads himself and others. The gold field may be a good one or it may not. Surface indications are of no more or less value, and it is the rule in British Columbia and elsewhere to take the place of free gold as given in this connection it was said that some mills would be immediately erected. Mr. Rose came back from his prospect to the Mineral creek discovery on Friday last and was much pleased with what he saw, but he should be "old" that there are some fears of a new discovery in the same place should be left in the hands of the discoverer. Probably the new finds may be equal to or exceed in value others of this locality.

There are good prospects for the owners of mineral properties. Inquiries have been made by a firm of good standing in the States concerning the amount of available silver and copper in the Mineral Creek locality. These inquiries are of interest to the discoverer, who has also mines would do well to have their interests as it may be that a plant will be erected at Vancouver for the reduction of silver ore. Pure silver in the form of spelter is worth \$60 per ton of 2,240 lbs.

E. W. Newson, of Victoria, proceeds to England in a short time to raise money for re-working the Van Winkle hydraulic mine.

The iron ore found on some of the islands about 150 miles from Victoria resembles that of Cherry creek, near Kamloops, and is equally as good judging from appearance. The ore is a soft, siliceous, hematite coal, and has come in from Queen Charlotte island, and represents some 30 feet wide. The analysis is quite up to the standard and far in excess of that of much of the hard coal supplied to the city. The iron ore is of a high quality and is well adapted for domestic purposes, and by means of light, the percentage being, it is said, between 8 and 10.

The owners of the Homestead mine, Kamloops, are making an advance from the 130 feet level, and expect to strike a rich ore chert within the next month. The output of this mine varies from 15 to 1500 tons. The gangue is barite or heavy spar.

THE CITY MARKETS. Local business continues quiet this week and except for a few small changes in relation to eggs there is little news to report. Eggs seem to be about the price they will get. Imported eggs are selling at the low price of 15 cents per dozen while fresh can be had for but a few cents more. Oranges are selling at a fair price and are of a much superior quality.

Current retail quotations are as follows: Flour—Ogdive's (Hungarian) per bushel... \$4.60. Premier... \$4.40. Three Star... \$4.20. Victoria... \$4.00. Bran... \$3.80. Corn... \$3.60. Potatoes... \$3.40. Apples... \$3.20. Butter... \$3.00. Lard... \$2.80. Sugar... \$2.60. Coffee... \$2.40. Tea... \$2.20. Rice... \$2.00. Beans... \$1.80. Peas... \$1.60. Lentils... \$1.40. Oats... \$1.20. Hay... \$1.00. Straw... \$0.80. Wood... \$0.60. Coal... \$0.40. Gas... \$0.20. Water... \$0.10. Electricity... \$0.05.

LABOR AND THE TARIFF. (Montreal Gazette, Feb. 30.) In his speech at Sohmer park Mr. Laurier made an appeal to the workmen to rally to the support of the Liberal policy of British free trade, on the ground that numbers of them fail to find employment at present under the protective tariff. Assuming the necessity for the tariff to exist, it would be interesting to know how the importation of foreign goods in larger quantity will afford employment for the workmen.

According to Mr. Laurier, are going about the streets of Montreal, asking for bread or work. Will a revenue tariff kindle the fire in a single factory? Will it start the loom in a single factory? Will it start the wheel in a single mill? Assuredly not, because the very purpose of the fiscal policy advocated by the Liberal party is the introduction of more foreign-made goods, more foreign-made cloth, more foreign-made iron, more foreign-made machinery, generally for the dual objects of (1) raising a large revenue and (2) cheapening the cost of the commodities to consumers. Let us briefly consider these objects.

An adequate revenue for the needs of the public service can unquestionably be collected by means of a tariff based on the principle of British free trade, that is to say, a tariff designed solely for the purpose of revenue, and not for the purpose of protection will be eliminated. Under such a system, commodities not capable of production in Canada will be taxed to the necessary revenue-producing point, and every dollar of duty laid on will find its way into the treasury. Coffee, sugar, tea, liquor, tropical fruits, and other foodstuffs not grown in this country will be made subject to taxation precisely as they were from 1874 to 1878. Agricultural products, however, will be admitted free, for the reason that a duty upon them, however small, must operate as a protection to the Canadian grower and so run counter to the principle of free trade to which the Liberal party stands committed. Raw materials, Mr. Laurier declares, are to be made free. They are so at present with few exceptions, but the exceptions are important, and so we are told the duties on coal and iron are to be removed. In the interest of manufacturers in order that industry may thrive and labor find employment? Not at all. The concession of free coal and iron with one hand is to be rendered useless by

SEARCHING FOR BURIED GOLD.

The Cocos Island Experiment Now Being Repeated Nearer Home.

Mayne Island the Scene of the Treasure-Hunters' Present Operations.

A story of buried treasure that is sure to appeal to the lovers of the romantic, comes from Mayne island, in the Gulf of Georgia, where there died, some twenty years ago, an old man by the name of Nicholson, who had come to that quiet spot to end his days in peace after a hard life in the mines of Australia, California and Cariboo. Nicholson was an Englishman by birth, and lived in a rude mud house which he built for himself in the centre of the island. The remains of this humble abode are still conspicuous to pass-by.

Nicholson was miserly in the extreme, depriving himself not infrequently of the necessities of life, and being always apparently in actual want. Besides being miserly he was also avaricious. He had an unreasoning horror of banks, and often expressed the opinion that money buried beneath the ground was money best invested. The neighbors regarded him as a wealthy man though he always pleaded poverty, but the extent of his wealth was never ascertained until one day a friend happening into the cabin took him by surprise as he was bending over a shining heap of gold. There were ten and twenty dollar pieces enough to fill the table, besides many "slugs"—a colonial shaped piece of gold at that time in circulation on the coast and valued at fifty dollars.

The old man after this adventure made extensive alterations in and about his cabin, protecting himself against further intrusion by keeping his place continually locked and key, with a heavy shutter on the inside of the door, and a little window so that he might at all hours of the day or night, unobserved and unnoticed, worship his god.

As the miser's expectations close he was constantly urged by those on terms of acquaintance with him to disclose the secret hiding place of his treasure, for it was generally agreed that it was not put away hidden in the cabin, but buried in some place in the vicinity. Nicholson did not, however, feel that way inclined and acted with constantly growing caution and suspicion toward his fellow islanders.

A neighbor finally found him to all appearances dying, and in his humane desire to aid the sufferer placed him in his bed and hastened to the nearest residence for assistance, without attending any special precautions, they found the old man in his extremity and past speech; by the movement of his lips and the restless rolling of his eyes they knew that he wished to tell them something, but the seal of death was on his tongue and the words were never spoken. The secret was buried in the miser's grave.

Long after the old man had passed away the search for his gold continued, probing his small estate with long bayonet behind the order of the day. Needless to say the treasure is not yet found—the only reward of the searchers was \$450 in silver, found stowed away between the breaks and in the old fireplace. Many attempts have since been made to locate the gold, but all to no avail. Very recently an effort has been made to discover the long sought "mine" by a professor of geology with the aid of a magnetic instrument. The secret is still a secret, however, and no discouragement to the many failures, as the prospectors is now preparing to once again explore the little orchard. The search will commence this week and the slugs and tens and twenties may yet see daylight.

WINNIPEG WILINGS. WINNIPEG, Feb. 26.—(Special)—Fire broke out in the Hudson Bay Company's flour mill at Prince Albert last night, together with the elevator containing about 6,000 bushels of wheat, was burned to the ground. It was newly fitted with machinery which the elevator was completed only a month ago. The company carries its own insurance.

Dalton & Co.'s general store at Carberry was burned this morning; loss \$14,000. The stock was insured for \$1,600 in the Phoenix of London; Sun, \$2,000; and the Quebec, \$3,000. The building insurance was Eastern, \$1,000. Norwich Union, \$1,000. A loss of \$1,000 in the Royal for \$250.

Lieut. Governor Macdonald was given a warm welcome at Edmonton, yesterday being his first official visit.

The two leading stationery firms of O'Loughlin Bros., and Parsons, Bell & Co., have about completed arrangements for amalgamation.

The Free Press says: It is reported in political circles that Ferguson, the Liberal nominee for Macdonald, is likely to retire from the contest on account of ill health. In the event of his withdrawal from the contest Dr. M. C. Richardson, M. P. of Portage la Prairie, will in all probability receive the nomination. The name of W. W. Watson, grain dealer, is mentioned as the probable Liberal candidate in Selkirk constituency.

Mr. Campbell, M. L. A., of Whitehead, Assinibois, has been acquitted on a charge of embezzlement of the Agricultural Society's funds. There are other charges of forgery.

Archbishop Ireland, of St. Paul, and Bishop Shanley, of North Dakota, will be unable to be present at the consecration of Archbishop Langens next month. Archbishop Walsh, of Toronto, has sent his regrets.

The Good Templars have repudiated the action of their grand council last week in endorsing Patron candidates for parliament. They severely criticized the action of the grand council in assuming to control the "patron" votes in the interest of any political party.

SECURITY. It is the most important feature in using condensed milk. You cannot afford to take any chances with milk that is tainted.

"Reindeer" Brand Condensed Milk. It is recommended by eminent physicians as being especially adapted for FOOD FOR INFANTS. EVERY TIN GUARANTEED.

THE VICTORIA WEEKLY COLONIST, FRIDAY MARCH 1 1895.

THE VICTORIA WEEKLY COLONIST, FRIDAY MARCH 1 1895.
