#### ST. SWITHAN'S DAY

Sunday was St. Swithan's Day, and as rain, fell the forty-day infliction will come, according to the superstitions.

#### GOING STRONG

A postcard from Mr. S. W. Dimock from Augusta, Me., says his party are having a glorious time, and are being also proving very satisfactory. No car trouble. They are now in the White Mountains as they left Augusta July 12th.

#### NOTICE

Dr. H. Brennan, Dentist, wishes to announce that he will be in Moncton attending the Dental Convention on Tuesday and Wednesday, 17th and 18th and will return on Saturday, the 21st.

#### RAIN ON ST. SWITHAN'S DAY WAS WELCOME

Fredericton, N. B., July 16.—St. Swithan's Day which fell on Sunday, passed with rain in many places in the province. This was a boon to the country. The Ronous fire had crossed Orchard Lake, and began to burn north into green forests.

#### NOTICE

### AVERAGE CROPS OF HAY AND OATS

Minister of Agriculture Says Conditions Are Better Here Than Reported.

Fredericton, July 16.—Average crops of hay and oats for New Brunswick, this season, were predicted today, by Hon. D. W. Mervaseau, Minister of Agriculture. This prediction was made following an inspection of field crops, particularly in York County, by the Minister, who is in the city today, on departmental business.

The present prospects in New Brunswick, are much better, than elsewhere, in Quebec and Ontario, and also in the State of Michigan, where drought conditions have seriously hampered the progress of the various field crops. Red clover, along the St. John Valley, is said to be much heavier than in former years.

Potato prospects in the province are somewhat unsettled. Much will depend on the week and conditions, which come, and which have during the week-end, been of considerable benefit to crops in general.

### GOVERNOR COX PLEASUED WITH N. B.

Massachusetts Executive Says He Will Come Back Again Soon.

St. John, N. B., July 16.—"I'm going to get a red and gun and come back here sometime soon, for I like the country," said Governor Chandler M. Cox of Massachusetts, this morning, as he was making preparations for leaving for Pictou. "I can only say that Mrs. Cox and I are more than pleased with the warmth of our welcome here and the general way in which we have been received, and I wish to express my gratitude for the many acts of kindness which have been showered upon us and upon our party."

The morning was spent in a motor trip to points of interest, including the Reversing Falls, Martello Tower and the plant of the St. John Dry Dock & Shipbuilding Co. at East St. John.

The Governor and his party left at 2 o'clock this afternoon for Pictou, en route to Pictou for the "Hector" celebration. A private car was placed at their disposal by the C. N. R.

### ARRIVED HERE AFTER LONG TRIP

Will Meet Here Next Month—Programme As Arranged For That Meeting.

G. C. Master, wife and son of Fort Worth, Texas, arrived here last Thursday night in an auto bungalow, spent the night here, and then proceeded up the Metapedia valley on his way to Quebec, and thence right through Toronto and the west.

The car was a Ford ton truck, upon which was built sleeping and living quarters, and the party drove out to the roadside at night, and were quite comfortable. The night at Campbellton was spent in front of the Graphic office.

Mr. Master was a good talker and had much to talk about. He had visited about every state in the Union and was out to see all Canada, starting at Nova Scotia.

One thing Mr. Master noticed here was the difficulty in procuring reliable information. At Moncton he was informed that the road north of Campbellton was impassable, and that Chatham was as far north as he could go, having to proceed west from thence to Fredericton, and thence up the St. John river. Fortunately, he met some one at Chatham who knew the Metapedia road was open, and he was directed to call at the Graphic office where all information would be cheerfully given.

At Bathurst he met a Campbellton man who endeavored to turn him back to the Fredericton route, but he kept on and left here about 9 o'clock for Quebec, via the Metapedia Valley, and as he has not returned we assume he got through safely.

### SUNDAY SERVICES AT BAPTIST CHURCH

Rev. Thomas S. Roy, pastor of the First Baptist Church, Brookton, Mass., will preach in the Baptist Church, Sunday morning and evening. In the morning he will preach on the subject: "Calling up the Reserves" and in the evening on "The Preacher Who Lost His Head."

### BOND ISSUE FOR

Ottawa, Ont., July 16.—Arrangements are being made for the issue, in Canada, of \$22,500,000 bonds of the Canadian National Railway Company. It is announced by Hon. W. S. Fielding. The bonds will be guaranteed as to principal and interest, by the Canadian Government, which owns all the stock of the company. These bonds are to be issued for equipping the railways with necessary rolling stock.

### ACCOUNT OF STRIKE

Chatham World—S. S. Edward Munch arrived in port on the 9th inst., several days behind her due date, and her charter was cancelled by her charterers Messrs Mackay, St. John. They however, offered to recharter her at a reduced rate of freight. Her owners, in view of the strike, decided not to charter her to load here, and accepted a charter to another port where there is no holdup and the steamer sailed out Thursday evening. She would have carried three million feet of lumber.

### ARE CONTINENTS ADRIFF?

We often speak of the solid earth, but scientists are beginning to wonder whether all the land portions of our globe are not in a state of movement.

It was discovered some years ago that part of Greenland was slowly changing its position. It is not exactly a rapid movement—a yard or two a year—still it is movement. Observations made recently seem to show that all continents may be drifting like sticks on the surface of a lake.

### Why do cigars have hands?

In their native home—Cuba—cigars are smoked semi-moist, the "dry" brands are not so popular. They are prepared by the local people, and are not so good as the ones imported from the United States.

### A NEW ALPHABET FOR RADIO

Establishment of a Universal Telegraphic Alphabet is Now Being Urged.

New York, July 16.—The establishment of a universal telegraphic alphabet is urged in a statement issued today by the Engineering Foundation. Radio Engineering is leading the peoples of the earth toward a common language, the foundation asserts.

Methods to simplify and expedite the electrical transmission of messages should be evolved through national legislation and international conferences. Science an commerce will not hesitate to statecraft ready to perform its function? the foundation asks.

"There are ship lanes in the northern Atlantic," the statement continues. "Crowding automobiles in city streets has necessitated traffic lanes. Aviation is establishing lanes in the air. Allotting of lanes in the ether has become urgent.

General Squier in 1913 commenced investigations for improving transmission to the telegraph alphabet, according to the foundation, as the Morse system failed to meet the needs of present day transmission. In the Morse code the current is interrupted between signals; with the redesigned system the current flows uninterruptedly.

### LEFT PORT ON

Chatham World—S. S. Edward Munch arrived in port on the 9th inst., several days behind her due date, and her charter was cancelled by her charterers Messrs Mackay, St. John. They however, offered to recharter her at a reduced rate of freight. Her owners, in view of the strike, decided not to charter her to load here, and accepted a charter to another port where there is no holdup and the steamer sailed out Thursday evening.
