Turn Waste to Profit

Recently a proprietor of a large, modern business in a thriving city was heard to remark "my twelve months' trade shows, after allowing myself a low weekly income, not one cent of profit, on all the capital, risk and worry." He distinguishes closely between income and profit for the year.

Does the average dairyman consider his farm business in the same light, each department of its many activities, grain, poultry, lumber, pork, hay, milk? Further does he distinguish between income and profit when dealing with the herd? If (and much depends on that "if") each cow makes a good profit he is indeed well off. Even if each cow is responsible for a good income, things are not too bad. If some of your cows waste good feed because they are not possessed of ability to

make milk economically, find it out; turn waste to profit. Make the cows keep you, that is their job; you need profit on the feed, profit to pay for your investment of capital, risk and worry, the same as any merchant. A letter to the Dairy Commissioner, Ottawa, will bring you free of charge milk record forms, either daily or three days per month, feed records, and a herd record book. When you note down total production and closely estimate cost of feed by occasional weighings, you arrive at individual profit. Make each cow pay a good profit.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it cannot be surpassed in effectiveness.

A MEMORY OF RACHEL

The Great Actress After a Night of Triumph on the Stage.

Lord Glenesk gave me an account of his first meeting with Rachel. He had gone to Paris for the first time as a youth, and for the first time his father had taken him to the Francais to see Rachel act. The entire audience had been stirred to the wildest pitch of enthusiasm and excitement. The next morning early he had ridden to the Bois with his father, and on the way his father had said, "We will turn out of the avenue a moment, down this street; I want to show you the house of the marvelous woman we saw act last night."

It was barely sunrise, and as they pulled their horses up outside a high wall inclosing a small villa they were astonished to hear, proceeding from within, what appeared to be the reacting of the very scenes they had witnessed the night before at the theater, but spoken in dead tones, as if by a somnambulist. Dismounting from their horses, they entered the garden. There they found Rachel, clad in loose garments, dull eyed, with disheveled hair and wan face, utterly void of all the flaming magnetism that a few hours earlier had filled her frame.

To the questions of Lord Glenesk's father she answered wearily that she had been rehearsing there under the trees since it was scarce day, trying in vain to find means of expressing certain passages in which she had "failed at the night's performance"—that performance which had so thrilled those who witnessed it, marking an epoch in their lives.—Princess Lazarovich in Century.

The Daughter's Idea.

Mrs. Brown was in the habit of introducing her big daughter as: "This is Jane. She's only fifteen. You'd never think it, would you?"

At last the girl protested. "It's mean of you to tell everybody how young I am. I could have a lot better time if you didn't."

"Perhaps you could. But I don't propose to have people saying after you've been out in society a couple of seasons: 'Don't tell me Jane Brown is only twenty. Why, she was a grown girl years ago.'"

"Just the same," retorted the daughter, "you wouldn't like it if I introduced you to my friends as: 'This is my mother. She's only forty-eight. You'd never think it, would you?'"

MANY IN WATFORD

TRY SIMPLE MIXTURE

Many Watford people are surprised at the QUICK action of simple buckthorn bark, glycerine, etc., as mixed in Adler-ika. This simple remedy acts on BOTH upper and lower bowel, removing such surprising foul matter that ONE SPOONFUL relieves almost ANY CASE constipation, sour stomach or gas. A few doses often relieve or prevent appendicitis. A short treatment helps chronic stomach trouble. THE INSTANT, easy action of Adler-ika is astonishing.—Taylor & Son, druggist.

Shooting Humming Birds.

To shoot a humming bird with the smallest birdshot made is out of the question, for the tiniest seeds of lead would destroy the delicate plumage. The only way in which the bird can be captured for commercial purposes is to shoot it with a drop of water from a blowgun or a fine jet from a small syringe. Skillfully directed, the water stuns him. He falls into a silken net and before he recovers consciousness is suspended over a cyanide jar. This must be done quickly, for if he comes to his senses before the cyanide whiff snuffs out his life he is sure to ruin his plumage in his struggles to escape. Humming birds vary in size from specimens perhaps half as large as a sparrow to those scarcely bigger than a bee.

Pretty Steady.

Mike Reagan applied to Mrs. Stone for a position as chauffeur and gave the name of a friend as reference.

Mrs. Stone sought the friend and asked:

"Mr. Brady, your neighbor, Michael Reagan, has applied to me for a place as chauffeur. Is he a steady man?"

"Steady," cried Brady. "Indade, mum, if he wuz anny steadier he'd be dead!"

Looked That Way.

"I want a man who doesn't smoke or drink."

"What are the wages?"

"Six dollars a week."

"Guess you want a man who doesn't eat, either."

Not Guilty.

"How many times have I told you that you must not answer me back, Norah?" said Mrs. Housekeeper.

"Sure, mum, an' Oi ain't answerin' yer back," said Norah. "Oi'm answerin' your face."

ONE of the experiments for 1916 and

apply for the same. The material will be

furnished in the order in which the ap-

plications are received, while the supply

lasts. Each applicant should make a

second choice, as the material for the

experiment selected as first choice might

be exhausted before his application is

received. All material will be furnished

free of charge to each applicant, and the

produce will, of course, become the prop-

erty of the person who conducts the ex-

periment. Each person applying for an

experiment should write his name and

address very carefully, and should give

the name of the County in which he

lives.

Oil for Toothache.—There is no pain
