RELATES HOW HER DAUGHTER'S LIFE WAS SAVED.

ANAMIA AND GENERAL DEBILITY HAD GRAVE-PHYSICIANS HELD OUT NO HOPE OF RECOVERY-DR. WILLIAMS' PINK PILLS AGAIN PROVE A LIFE

From the Ottawa Free Press.

A personal paragraph in the Free Press simply stating that Miss Sophie Belanger, 428 Cooper street, Ottawa, by anæmia and general debility, had apand pleasure among her relatives and acreporter of the paper found it extremely inesting to visit the family and enjoy a chat with Mrs Belanger on the recovery of her daughter after she had for two years been considered irrecoverably a victim of this Mrs. Belanger is a very intelligent Frenchwhose wall paper and paint and glass establishment is at 146 Bank street. Miss Sophie Belanger, the whilom invalid, vacillating gen death and life, is a promising young

She lay on a couch like one dying. under the nuns in St. Jean Baptiste school on Primrose Hill. Over two years ago she the family as they looked upon the once

hope, as her own words will denote.

"It was a terrible time," she said. "We could be done to save Sophie, and had almost been forced by appearance to believe it. I have now to say that but for Dr. Williams' Pink Pills she would have been in her grave instead of attending school every day the liveliest of the lively. It began like this; es his worn-out, half-curried, half-fed and the poor girl was coming to me three or four times a day exclaiming, "Oh, ma; I have the pain of it." This went on for a long time, weeks in fact, until we began to look at it in a very serious light. We had almost every French doctor in the city called in. but with no result. Sophie got worse and orse. Her face was small and yellow while her lips were as white as your collar tless and apathetic, and so weak the flesh from her bones. Her skin became that she was going to die. It was agonizing to look at her, but we became partially resigned to the fate that appeared to be overtaking us. She was watched day and night, the cures by the use of Dr. Williams Pink Pills, and about this time I noticed a description published in the Free Press somewhat similar to Sophie's case. Something seemed to urge me to give them a trial, and now I restored her health or rather snatched her | be almost, if not quite, exterminated. from the brink of the grave. To Dr. Williams Pink Pills is due all the credit, for we

bors to use this wonderful medicine. Just as the reporter was leaving Miss Belanger returned from school. She was the picture of grace, health and beauty, her lithe picture of grace, health and beauty, her lithe all milk vessels. It is the only material into while her face showed the warm, ruddy mony. Happiness now abideth in that home re misery held sway too long, and Mrs. ailing girls what they did for her daughter. blem would be settled.

How to Retain Health.

If you wish to have health it is necessary that you should be regular in your habits, the I use sweet oil, and it is a sure cure. The have a stated time for your meals, eat sparingly of plain, nourishing food and leave pastry alone, abstain from ardent spirits and the head, spine, root of tail, and anywhere tobacco, retire from the dinner table feeling the lice are found. It is a sure cure and a little hungry; bath often and exercise in perfectly safe. It not only kills the lice, the open air when you can, as breathing the pure air gives life and strength; retire to hair nice and clean." bed early, as a good night's rest gives the lost during the waking hours. There is no only precaution necessary is to see that it does not lie in water. A strong box with a digestive organs and faculties. The duration of the human life may be ascertained by pulcific the human life may be ascertained by the h of the human life may be ascertained by pulsation of the body. Say a man lives to 70 years, his heart beating 60 to the minute, the pulsations in that time foot up, 2,207,520,000. If by intemperance or any other cause he raises pulsation to 75 a minute, the same number of pulsations is less in a sleeping than waking state; it stands to reason that a long sleeper has a much better prospect of long life than a person who is satisfied with naps. It is well known that the great cause of our bodily ailments is replepletion—that is, eating a larger quantity of food than is wanted to supply the necessaries of the system.

-The fact that Hood's Sarsaparilla, once fairly tried, becomes the favorite spring, medicine, speaks volumes for its excellence

—What a young man earns in the day time goes into his pocket, but what he spends in the evening goes into his character. -Minard's Liniment Cures Colds, etc.

Agricultural.

Business Methods in Farming.

Every crop planted on the farm, every animal bought, and every hired man, is an in-BROUGHT HER TO THE VERGE OF THE vestment, involving sound business judgment in both the planning and the management, to insure a profitable outcome. Too often crops are planted or stock raised simply because other farmers raise them, with-out regard to the cost, the market, or the adaptability to the particular farm and its equipments. When planted no account is kept of the expense, and not even an estimate is made of the cost, but the crop is sold as soon as harvested for what it will bring, and the crop repeated next season. While it would sometimes cost more than the crops changing its treatment. Many parts of the to beat occasionally. This diversion proved estimates made for one year or field would a "mind cure" for fifteen minutes on the not answer for other years and fields.

Whether accounts are kept with particular

Anoth fields or crops or not, there should be an account opened with the farm, and others with the household and personal expenses. By taking stock each year it can be determined whether the farm has been profitable; whether the improvements have exceeded een too extravagant, and whether the ount for every person with whom a credit usiness is transacted, for memory utterly ails in keeping an accurate record of such Treat the farm as a person, and see whether it can be credited with a farming is a busines, then the keeping of farm accounts will pay.

Feeding a horse principally on grain and driving it five hours is like giving a man salt mackerel for dinner and not allowing him to fell sick and rapidly wasted away. The nature of her disease appeared to be a profound drink before supper-time—very unsatisfactory for the man. If you know anything mystery to the physicians as they were called about the care of horses and have any symin one after the other. Despair fell upon pathy for them, water them as often as they want to drink-once an hour, if possible beautiful, spirited girl, lying day in and By doing this you will not only be merciful on her couch, to your animals but you will be a benefactor simply slowly vanishing and they powerless to yourself, as they will do more work, look parents to prepare for the worst. However, else, you are positive that the foregoing is langer is not one of those women wrong, because you have had horses die who give up in despair while there is still with watering them too much, and boldly say that the agitators of frequent watering are fools in your estimation, and you would had been told again and again that nothing not do such a thing. Just reason for a moment and figure out whether the animal would have overdrunk and overchilled its stomach if it had not been allowed to become

overthirsty. A driver who sits in his waggon and lashhalf-watered team deserves to be punished as a criminal.

Garden Walks.

As many persons have at this time large heaps of coal ashes, they can dispose of them in no way to better advantage than by hauling them into garden alleys. Remove from four to six inches of dirt; and having screen ed the ashes, or separated the cinders, first she could not raise her hand to her head. A apply the coarse stuff, then oyster shells, if leading doctor forced her to take a certain you have any on hand, small stones, glass, kind of powders, which seemed to be taking or pieces of bricks, and top-dress with the ashes. Roll it, and you will have one of the head and she lay on that couch as one dead, es become very hard, and are never wet, taking no interest in things whatever in things going on around her. Then it was water the least chance to get away. In tomg on around ner. Then it was me confirmed to the popular belief summer, in five minutes after a shower, there will be scarcely enough moisture to dampen the sole of your shoes. If there is not sufficient ashes for all the walks, commence with the principal ones, and in a couple of years but we could detect no change unless for the the garden will be complete. Then, each worse. All hope had gone. I had read of spring after, give them a slight top-dressing of ashes, which will about consume your a nual stock.

Dipping Sheep.

There is no time of year that tick-killing thank God I did. I sent for some and began giving them to her one at a time. Before on steep can be so effectively done as soon giving them to her one at a time. Before long we saw an improvement, and gradually much less dip then than when the wool i creased the dose from one to two and then long. It is important to put all the lambs to three at regular intervals. It was in- through at the same time, as the ticks leave credible to note the change. Her color the ewes and go upon the better protected came back, a different look in her eyes, her and more tender bodies of the lambs at that general health and appearance gave us all season. If a flock is thoroughly dipped, new interest in her. Before the fourth box and again gone over in a couple of weeks, was gone Sophie was able to be up and around again, and a further use of them fully when the eggs are all hatched, there is no around again, and a further use of them fully

-Any person who grows celery can easily had stopped doctor's medicine, and simply produce large and white stalks, but the gave her these, following the directions | main point is to have them crisp. Good ound the box. My daughter's life was saved | celery should break into two or three pieces by Pink Pills and no one knows it better when bent, and should be very brittle. The than her mother. I wish to tell everyone of way to secure the brittleness is to begin the cure, as it is almost impossible to believe | blanching the stalks from the start, and also that the poor thing that lay there, and the grow them rapidly. If the blanching is happy rosy-cheeked girl who goes regularly | done later in the season, as is usually the to her classes are one and the same person in such a marvellously short space of time, and you may be sure I am advising ailing neigh. ing is done gradually during the whole sea

WOVEN WIRE FENCE Has the Highest Award in the World!

In the World!

Is the unequalified approval of every customer. Our fence has won at every Fair or Exposition where entered. But what does a practical farmer care for that! The fighting qualities of a soldier are proven on the field of battle, not on dress parade.

Don't fail to keep it before the people that ours is the only perfectly self-regulating fence offered. Don't loose sight of the great saving in posts, as with some other fences the posts alone. It is not to be self-regulating fence of the money on earth. I base my belief on the fact that one string of fence sells lots more. Page fence has proved itself by far the best for farmers' use, and we know from the orders already received that our business will boom with that of the farmers. farmers.

A variety of fences suitable for all purposes:
cometeries, school grounds, hen yards, barn
yards and hog yards, orchards, gardens.

Our Lawn Fence is just right.

The Household.

OME THINGS THAT SHOULD BE WATCHED BY ALL HOUSEWIVES. In face of the frequent accounts of accounts dental poisoning, the following facts may prove both interesting and useful. In the first place, all copper vessels should be re inned directly the surface shows signs of being worn. Neither acid, salt nor fatty bodies will attack well-cleaned copper vessels; vinegar may even be boiled in them with safety, but should it be allowed to cool in the vessels, it will dissolve enough copper to become dangerous. The advantage in become dangerous. The advantage in copper poisoning is that one of the first was going to point out the man that stole

symptoms is vomiting, that is to say, the poison is rejected from the system.

Zinc, though it conceals itself so often galvanized vessels. Lead, from a culinary point of view, is the least to be recom-mended of all the metals, as it poisons slow-

But it is not only the vessel used in preparing food which is dangerous; many foods in for food when it has commenced to germinate, or when it is green from having been brudders, I 'pears before you to-day in the role of the same David. Brudders and sistence of the same David. Brudders and sistence of the same David. The green parts and the "eyes" contain an ters, they's a Goliath among us here to-day; andoubted poison, which has a sharp taste, he's been pestern our coops and he's been and is capable of producing paralysis or even pickin' our pockets, and he's here with us death. At the end of the winter many pigs are unhealthy through having been fed on these green potatoes or on potatoes from the product of the series of the

not been carefully cut. Mushrooms should always be carefully verified by a person thoroughly acquainted this rock and throw it, and hit the nigger with their peculiarities. Some cooks put a that stole that razor; and, brudders an' sis with their peculiarities. Some cooks put a silver coin with them when cooking; if the coin turns black they rejects the mushrooms. When I throws this rock they needn't none coin turns black they rejects the mushrooms. This is really no test at all as many of poison fungi will not blacken silver. It animal food in a state of decomposition is more or less poisonous, for this reason tinned fish is never to be trusted, as fish are often the state of the sta should be careful as their taste is often not ger that stole that razor. Look out, there, so fine as that of a non smoker and they are consequently less likely to detect a tin of doubtful fish. Mussels, again, are always

e poison has never been discovered. Chilaren's Rights.

It never occurs to some people that chilren have rights which may be trampled on, and that the poor little victims of oppression have no way of retaliating, as older persons have. A mother said the other day: "I don't believe in vacations for children. Mine never have them. As soon as school closes me far toward believing anything that I may I engage a governess for the summer, and I stipulate that their plays shall be instructive as well as amusing. I don't intend them to lose a moment, and thoroughness I insist port. I was one of a party of four that had

despotic, but she is none the less tyrannical, as it was a long drive over there, that and foolishly so, for her children, under the forcing process on which she is bent, will either develop too rapidly, and then reach a and half past 6 for the rising hour, so we

nied them.

Another right of childhood is to have its word implicitly believed, accepted at its face value, so to speak. "My little boy is very the control of the contr truthful," exclaims a mother, as though truthfulness were rare among children. It "Who's there?" I cried.

"Who's there?" I cried.

"Shure, it's me, sor," answered the waitthe child has had only truth spoken to him, and before him, and has always bee believed, his word never doubted, though the past sex?" statement he was making seemed improbable, he will speak the truth as naturally as he breathes. Little children have vivid imaginations, and sometimes, limited vocabularies; they do not always comprehend what we may ask them, nor know the names of things, and in consequence they are unjustly accused and unjustly punished. To a letter to a German lady and this postcript cause a needless wound to a little heart is a was added:

shame, and almost a crime.

Points on Pastry Making. Here are a few points usually overlooked in regard to pastry making. First of all it my left a cigar. - Yours ever, Adolphe." should be prepared in a cool place; in winter and early spring, or at times when the temperature is decidedly low, it is not imperative to be very careful, but as soon as the hermometer rises, in nine cases out of ten, failure is the result of too great heat. The flour, too, should always be absolutely dry, advisable, especially in summer, to wash the butter that is needed for the preparation of the pastry in fresh water over night, to roll it tightly in a clean dry cloth, to beat it gently with a wooden roller, and to place it on a slab in a cool larder till the time when it is to be used. The knife or cutter must be perfectly sharp, to avoid jagged, untidy edges; and, when the pastry is brushed over with egg or water, as the case may be, care should be taken that none is dropped on any ther part of the pastry than that on which it is needed as a gloss; for experience distinctly teaches that even a little thing is etrimental to the proper rising of the dough. Lastly the oven should be kept well closed to insure a perfectly even heat, otherwise

heat is not so great, and present an unsightthe lecturer, said: ly appearance. -A good object lesson can be learned by allowing an uncovered pan of water to remain over night in a newly-painted room In the morning, if you taste the water, you will imagine that turpentine has been put into it, so much of that odor will it have ab "No, "What I want to know is, have you any. sorbed. Now, milk absorbs taints much foreign stamps to give away?" more readily than water; which at once explains the cause of the often accounted-for flavors in butter and cheese.

the pastry will fall in on the side where the

-A very simple, but little-known method of keeping ice is to draw a piece of thick their say, "because she was different from flannel tightly over some deep vessel, like a ice is placed on top of this drumhead and covered lightly by another piece of flannel. In this condition the ice keeps cold, and even freezes to the flannel. Thus a small piece of ice can be kept near a patient all night, so as to avert many weary marches up and down stairs to the refrigerator. bowl, for instance, and fasten it there. The

-To make boiled icing; put a teacup -10 make boiled leing; put a teach of sugar in a small saucepan; moisten with half a teacup of boiling water, and cook until it threads. Beat the white of one egg, put a pinch of cream of tartar in the boiling sugar, pour over the egg. Beat until cold and thick. Flavor.

—Lace collars are no longer regarded as xuries—they are considered economical vestments. One lace collar, if ingeniously teated, and is capable of varying the effect half a dozen different waists.

—Arrange these hot days so as to spare yourself. Take life easily, make haste slowly, keep calm. Arise with the dawn and do all that is possible of the day's work before the sun is high. Every mother should set up in her household one standard of morality for sons und for daughters. There is no sex in guilt. It is as bad for a man to be immoral as for a
