The [XXX] SAW GUMMER & SHARPENER HAS NO RIVAL

***** FOR *****

Variety, Capacity or Quality of Work,

OR FOR

Simplicity, Durability Cheapness.

Will take saws from 6 inches to 6 feet diameter; sets the saw forward one tooth at a time automatically; sharpens any saw (rip or crosscut) perfectly giving the teeth any desired pitch or bevel, and making all the teeth exactly alike. Will sharpen 30 teeth in an ordinary mill saw in one minute, or 100 teeth in a shingle saw in four or five minutes. The cut shows outline of mill saw 54-inch diameter.

GILMOUR & CO.
Lumber Manufacturers and Dealers.

THENTON, Ont., 26th August, 1891.

F. J. DRAKE, Belleville, Ont.:

Dear Sir,—Your patent Saw Sharpener is giving us good satisfaction. We average about 1,000 shingles per day and sharpen the saws for both automatic and hand-fed machines with your sharpener. As it keeps the teeth all perfectly uniform it must be easier on the machine and sawyer too. It causes also a great saving in floor. We now only use about one ten-inch file per week. Before putting in your machine we used up at six per week. As regards your improved "XXX" Shingle Packer—it works first rate and is the only machine we could get that would prove tight enough. We consider it the best we ever had.

Yours truly,
GILMOUR & CO.
