

MUNICIPAL ENGINEERS, CONTRACTORS, AND MATERIALS.

ious forms seems best adapted for handling large quantities of brick can usually be dried in from one to five days if dried in five to ten days if dried in the open air. Outdoor drying is a certain for practical use in the drying of bricks. Clays vary in the amount of silica with which they may be combined. Silicious must be dried with great care and often very slowly, otherwise they warp, while those with much silica will stand forced drying. Thorough drying greatly facilitates the burning of the brick.
