

## the Cyberzone

The August 26, 1996 issue of *Connexions* initiated the *Cyberzone* column in which information specialists from the Library identify timely and useful Internet addresses of potential interest to DFAIT business processes. This month, we list three of the current Internet addresses found on the "Surf board" in the Cyberzone, a designated area of the Library where you will find an Internet terminal, a wide range of CD-ROM databases to explore, as well as hard copy documentation on the Internet. Library staff are available to show you the Cyberzone and to help you with your searching.
