- les principaux clients;
- les principaux fournisseurs;
- les principales associations;
- les principales sources d'information;
- les principales activités à signaler;

Most significant U.S. federal geomatics applications are in the area of environmental restoration, construction or engineering. These projects require geomatics services in order to be effectively carried out. In the geomatics market, the U.S. government is the dominant market. The geomatics market is dominated by services of geomatics such as cartography, topography, and remote sensing. The market is divided into two types of markets: a large market for general geomatics services and a smaller market for specialized geomatics services. The report provides information on the geomatics market in each state.
