## CHURCH BASEMENT **USED AS SCHOOL**

Morality Inspector Discovers Children's Classes Amid Unsuitable Surroundings.

MOVED TO A STORE

Institution Later Found Settled in Inadequately-Ventilated Small Shop.

A case which should prove of unusual interest to those concerned with the future welfare of "young Canada" came up before Judge Boyd in the children's court on Tuesday last. Two years ago a vigilant official of the

morality department discovered a day school being carried on by the "Seventh Day Adventists" in the basement of a little church on the corner of Dufferin itle church on the corner of Dufferin and Orde streets. This so-called school was held in a This so-called school was held in a small room in the basement, not more than seven feet in height from floor to celling. The size of this room was only 20 feet long by 12 feet wide, and the only means of ventilation and light, two small area windows under eight inches below the level of a lane that paralleled on the

sils and a bed.

On the immediate entrance to the west

of the door were the sanitary conven-lences, only separated from the school loom by a thin board partition, not more than half an inch thick and very lightly

untitiogether.

In these cramped and unsanitary surroundings 19 children were confined, with one male teacher. No separate accommodation was provided for the girls in any natter whatever, everything being caried out in the one place and with but ne convenience.

matter whatever, everything being carried out in the one place and with but one convenience.

As the place was supposed by the promoters to be a centre of education, the matter was reported to Chief Inspector Cowley, who referred the complainant to the department of education. The department of education, the department of education, the department of education in the only redress would be to apply to the medical health department.

The matter was then reported to the health department.

The matter was then reported to the health department.

The matter was then reported to the health department.

The matter was then reported to the health department.

The matter was then responsed to the time being dropped out of sight, so far as the vigilant official was concerned.

It is interesting to note that the male teacher then in charge of the school had no pedagogical standing whatever, as far as could be discovered. He was not a graduate of either public school, collegiate, college or university in Ontario.

He called himself a "professor," but had not attended any college or university of standing in the United States. He had been educated in a Seventh Day Adventist school, and had attended for a short time a training school under this sect at Ottawa.

In September of this year E. W. Hannock of Cariton Public School reported that a school was being carried on under unusual circumstances at 428 St.

Wiss. Margaret Law, housekeeper, in recognition of her longs and faithful had removed soon after the last will service," was bequeathed \$15,000; Mrs. Wm.

Mrs. Margaret Law, housekeeper, in recognition of her longs and faithful had removed soon after the last will school. Mrs. Amanda Ponter, sister of Mr. Pearcy, received \$15,000; Mrs. Wm.

Government regulations regarding public buildings require that sufficient air space be given to exhaust the foul air four times every hour. It takes one-tenth of the floor space to eliminate the poleonous gases exhaled by the breath, and given off by fumes, etc.

The cubic air space in this building was less than half that required by law. Sanitary conveniences were situated in the basement and reached by means of a trap door thru the school room floor. They were most unsanitary in arrange-

ment and leaking; the some disinfectants were used which the medical health man said would improve conditions. In this case 18 children and one woman teacher were concerned.

The case was reported to Dr. White of the medical health department, who sent Dr. Phair of his staff to investigate.

# FOR THE EMPIRE

sent Dr. Phair of his staff to investigate.

The premises were reported to be totally unfitted for the moral or physical development of the children, and the matter was taken into the juvenile court on Oct. 2. Before the court case was completed, the building was vacated as a school and new quarters found at 218 Concord avenue.

The management have also engaged a new teacher, in order to attempt to satisfy any public opinion which may arise in this respect, as Mrs. Richards, the teacher in charge three weeks ago, was unqualified, having no academic or pedagogical standing whatever. The teacher at present in charge claims to have a second class professional certificate, according to the laws of Ontario.

In referring to the above startling case a prominent public official stated: "Legislation should immediately be sought for the governing of all classes of schools, as there are at least three other sects which might follow suit in other sects which might follow suit in the contingent battalion in July, 1915, going overseas for a commission with an early drait of the University Training Company. He went to France with 12th battelion of the East Surrey Regiment in January, 1917, serving at the front with them until May. ## GO WITHOUT FOOD AT NORMAL WEIGHT

Belgian Children Must Show Physical Deterioration Before Being Fed.

Mr. Hoover, chairman of the Bel gian Relief Commission, has just had an astounding experience in Belgium according to George Barr Baker, a member of the cor ing this continent.

"Mr. Hoover went to Belgium," he said, "and saw 1200 children standng in line in a district near Brussels FOR UNION OF PARTIES waiting for their food to be doled out to them. They are all school children, none of them being much over 14 years. All of them very happy— the poor little things had their food tickets in their hands and were facing the pleasant prospect of getting something to eat. Their mothers something to eat. Their mothers and others of the woman relatives were standing by watching them. "Suddenly Mr. Hoover saw one of the Belgian women who was work-

ing with the commission step over to The child screamed and fought to get back into the line, but the woman sindly but firmly forced it to one side. This was followed by other women doing the came thing, which was always accompanied by the screaming of the child.
"Puzzled by these extraordinary in-

cidents, Mr. Hoover questioned one of the women workers about it. Must Starve First.

"They are of normal weight," she said, "and cannot have a meal today. They must wait until their weight is reduced before we can supply them with food. This may be perhaps one or two or three days. who are under weight and are actually starving to death under our eyes may have food. There is so little food compared with the need that only those in need most have it.

"Mr. Hoover was astounded and overcome, and asked the woman if it was possible that the children must be really starving before they could be allowed to have a meal. "'Yes, it is so,' she said sadly. 'We cannot feed so many little mouths with so little. If we had the food we could give it to them, but what can we do? Those who do not show actual signs of starvation must stand

aside for those who do." The scene thus described, which is now being repeated all over Belgium. explains why Mr. Hoover is making a special appeal to the people of this continent for increased subscriptions so that every child in Belgium may have enough food to keep it up to Subscriptions will be gladly comed by the Belgian Relief Com-
