

LECTURES.

CLINICAL AND DIDACTIC.

The several Professors and Lecturers will illustrate their respective courses by plates, preparations, models and specimens—including the application of the Laryngoscope, Ophthalmoscope, Sphygmograph, Spectroscope, etc., and the various forms of Electrical apparatus used in medicine. It will, as heretofore, be the constant aim of the Faculty to make the entire teaching of the College as practical and thorough as possible. In THIS COLLEGE, ever since its organization, throughout the entire session, FIVE Lectures have been given each week, on the principal subjects, viz: Anatomy, Physiology, Chemistry, Materia Medica, Medicine, Surgery and Midwifery, thus fully meeting the requirements of the Ontario Medical Council, and all the Boards in Great Britain and Ireland, which require that each course on the main branches shall consist of not less than **one hundred Lectures**.

CLINICAL TEACHING.

Clinical Teaching has always been carried out in every department of this College as fully as possible, and in view of its very great importance, SPECIAL and INCREASING attention continues to be given by the Faculty to this essential department of the course. It includes CLINICAL LECTURES, and teaching the diagnosis of medical and surgical diseases at the bedside, nothing being of more value to those engaged in the study of medicine and surgery than a close and careful observation of the numerous cases in the Hospital wards. Arrangements were made years ago, and are now very perfect, which have largely increased the amount of clinical instruction given in the Toronto General Hospital, and afford to all students who attend it, as great facilities as are enjoyed in any part of Canada in this important part of their studies. Besides this, the number of Hospital patients is very large. The College being CLOSE TO THE HOSPITAL, enables students to avail themselves fully of the many advantages for gaining the practical knowledge which it affords.

In connection with the treatment of the out-door patients applying DAILY for advice and treatment at the TORONTO GENERAL HOSPITAL, an OUT-DOOR patients' Clinic is given every day from 1 to 2.30 p.m. These patients are examined and prescribed for, in the presence of the students. An IN-DOOR patients' Clinic is also given daily, immediately
