

THE
Faculty of Medicine

OF THE
UNIVERSITY OF BISHOP'S COLLEGE

Will open their seventh session, in Montreal, on Monday, the first day of October, 1877, with an introductory lecture by

PROFESSOR KOLLMYER.

With the exception of a short vacation at Christmas, the session will continue till the end of March next.

The rapidly increasing number of students attending this College shows that the practical method of teaching adopted by the Faculty is attended with the most complete success. The subjects taught and the methods of imparting information are based upon the requirements of the Medical Colleges of Great Britain, and of the various acts regulating the study of medicine in Canada. Each department, where it is possible to illustrate practically, is furnished with the most modern and improved appliances. The College contains, amongst others, two large lecture rooms, with comfortable seats for the accommodation of the students, a museum, library, and laboratories, which last are fitted up with every modern convenience for practical chemistry and the study of microscopy. The dissecting room is large, airy, well-ventilated and well-lighted, both by day and night, affording students every opportunity for prosecuting their work with comfort and health. The physiological laboratory in connection with this College is furnished with the most important and improved scientific apparatus for physiological experimentation, and, at present, is the most complete in Canada.

Students who have attended this University, and completed their course of four years study, desirous of securing the diploma either of the Royal College of Surgeons, England, or the Royal College of Physicians, London, will not be required to attend further lectures, but may present themselves at any time for examination for either of these diplomas (provided they have sufficient hospital attendance), this College being recognized by both of these British Colleges.

During the present summer increased facilities for acquiring knowledge have been afforded the students of this University by establishing a "Summer" course of Lectures.
