DEATHS. MCKINNON—At West Cove Head, P. E. I., June 23rd, Mrs. John McKinnon, of tuberculosis, in the 23rd year of her age.

MCKINNON—At Fredericton, P. E. I., June 11th, William McKinnon, aged 82.

CORAM—Suddenly, on June 19th, at the residence of her brother, Geo. Kimball, Sutton, Grand Bay, N. B., Mrs. Lillie Coram.

THE ST. JOHN STAR is published by THE SUN PRINTING COMPANY (LTD.), at St. John, New Brunswick, every afternoon (except Sunday) at \$2.00 a year.

ST. JOHN STAR.

ST. JOHN, N. B., JUNE 25, 1908.

AN OBJECT LESSON.

The annexation of Porto Rico to the United States has been of great benefit to that island. The change has given the people stable government and guaranteed the protection of property and investments. But the greatest advantage has been the closer trade connections and access to the United States market on better terms than are allowed to the islands not under the stars and stripes. Five years ago the exports from the United States to Porto Rico were valued at \$1,604,000. In 1903 they increased to \$3,656,000. This trade has now grown to about \$12,000,000, since during the ten months, ending in April the sales from the United States to Porto Rico came to over \$10,000,000. Porto Rico sent to the United States in 1908, goods to the value of \$2,418,000. It is estimated that the value in the fiscal year, ending this month will be \$2,000,000. That is the sales to the United States have been multiplied by five and the purchases from that country by eight during five years.

Unless the British empire can do for the British West Indies what the United States is doing for Porto Rico, that island will be the envy of all its neighbors. It is not good imperial policy to make loyalty so unprofitable as it will be in the West Indies under present conditions.

Great Britain and Canada together can find a remedy. There is a market within the empire for all the sugar, all the fruit and all the other products of the British West Indies. The British empire is able to supply all the needs of the British subjects in the south. But if the British people in the mother land and in Canada choose to purchase foreign goods and leave their fellow citizens without a market, unless they can find it in the United States, the nation should be prepared for the consequences.

A happy and rich Porto Rico, able to sell everything at the highest prices, beside an impoverished and disheartened Jamaica, with no profitable market would be a great object lesson. This lesson would teach that while British citizenship is splendid it does not pay.

Petersen and Tate, who contracted with Sir Richard Cartwright for the fast Atlantic service, put up a deposit of \$40,000 that they would carry out their agreement. They got extensions of time and other concessions. Some years ago they threw up the job, saying that they could not do it for the money. Now the government is kindly returning the deposit and paying interest on it for the full time it was retained, some six years. What are these deposits for anyway?

Among the items on the supplementary estimates at Ottawa is a vote of \$3,000 for the cattle guard commission. George Robertson, M. P., will please accept congratulations. It is not announced whether the commissioners discovered or invented a cattle guard that satisfies the long felt want of the one-eyed steer.

Mr. Chamberlain's preferential policy has the aggressive support of ninety-eight unionist members of the house of commons. Doubtless there are many more who support Mr. Chamberlain without attending special meetings to deal with the question.

The latest suggestion is that a vast number of Italian husbandmen are available for immigrants to Canada. This country has no particular need of Italian settlers, but they would count in Mr. Sifton's returns, and the number will be used to show that the country is prosperous.

The war in Africa closed some time ago but the Philippine war goes on still. One hundred and fifty Moros were killed in a recent fight at Lake Lano, where a native position was attacked and taken. The United States troops had two wounded but none killed.

There is a vote in the supplementary estimates for the drill hall at Brockville and the armoury at St. Thomas. No sign of a vote for St. John is visible, but there are other estimates to come.

The president of the People's Bank of New Brunswick says that no negotiations have taken place concerning the absorption of that bank by the Alliance Bank of Canada.

Newspaper men are again to the front. The editor of the Monitor has been appointed government representative on the St. John board of revisors.

The governor of Delaware says that the lynching was done in a frenzy of excitement. This is what the Russian authorities say of the Kishineff massacre.

Ottawa Journal: Miss Howland (England), who is visiting Mrs. Toller, expects to leave for St. John, N. B., on Friday. She will join Lady Tilley there.

Bishop Casey is in Montreal attending the unveiling of the statue of Bishop Bourget.

MORNING'S NEWS

LOCAL.

J. A. Gregory's mill at Leppouze is not in operation. More water is needed in order to get the logs in.

Ship Triton, now Philadelphia, has been fixed to load deals at St. John for Swansea at 26.

Tug Springhill brought to port last night a coal loaded barge from Parrisboro.

The big Russian ship Imperator Alexander II, reached St. John yesterday. She loads deals for Australia.

Box 117 called out the north end firemen for a slight blaze in the house of Harry Mason on Bentley street yesterday. The damage was trifling.

The Allan-Furness str. Carthaganian, with goods from Glasgow and Liverpool for this city, arrived at Halifax at 8 last evening. The goods will be forwarded here by rail.

Inspectors Olive and Esdaile returned yesterday from Fredericton, where they looked after the steamers requiring inspection there.

Tug Lord Kitchener left yesterday afternoon for Yarmouth with the Italian bark Annita-Minotti, which has spent some days here in the vessel.

Will take in lumber there for the River Platte.

Bark Inverurie, deal laden, towed out to Partridge Island yesterday, but came to an anchor, struck at Halifax and she has filled up her cargo in the pletement and is probably now on her way to Londonderry.

Early last evening a fire was discovered in an ash barrel in the rear of the American steam laundry, on Charlotte street. Word was sent to No. 1 fire engine house, and the permanent men hurried up to the place, and little difficulty was experienced in stopping the fire. No damage was done to the main building.

The case of White against Officer Hamm for false imprisonment was again decided yesterday against the policeman who was ordered to pay \$500 damages.

In the afternoon Mr. Belyea addressed the jury on behalf of the plaintiff. Judge McLeod's charge favored the defendant, and after less than half an hour's deliberation the jury returned with a verdict in favor of the plaintiff to whom they awarded \$500 damages. It is unlikely that the case will be again appealed.

H. C. TILLEY RETIRES.

To the Editor of the Sun: Sir—In retiring from my position as president of the Seamen's Mission Society, I feel it only just to those who have from its foundation financially and otherwise supported the institution, to say that it was with feelings of the deepest regret that I was obliged at the last meeting of the board of management to ask that I might be allowed to retire from the position of president on account of my health and also my business, which is now taking up a great deal of my time. This request was granted me.

The board of management have been most fortunate in securing the services of Rev. E. H. Roper and his wife, who have been in charge of the work for some months past. Mr. Roper is laying a good foundation for the future of this institution, and I can conscientiously state that he deserves all the support which is given him in his work among the sailors. The vice-president, S. L. Gorbell, will fill my position until a new president is appointed.

During the eight years that I have filled the above position I have learned much about the lives of sailors and the hardships through which they have to pass, and can only ask that the citizens of this city do all in their power to support an institution which has been doing during the past nine years a noble work among the men of the deep. I can assure those who are interested in the welfare of the sailor is appreciative of kindness shown.

Thanking you, Mr. Editor, for allowing me this opportunity of stating my case, I remain, Very sincerely yours, H. C. TILLEY.

St. John, June 24th.

N. B. CHURCH OF ENGLAND SYNOD.

Following is a statement of the services and meetings of the Synod of the Church of England, which meets in Woodstock on Tuesday, July 7th.

Tuesday, July 7th—Holy Communion at 8 a. m., in St. Luke's church. Offertory for Synod expenses. Opening sessions of the diocesan synod in the parish hall at 10 a. m. Evening prayer at St. Luke's church at 7.15 p. m.

Wednesday, July 8th—Holy Communion at 8 a. m., in St. Luke's church. Evening services in St. Luke's church at 8 p. m. Offertory for diocesan missions. (The clergy are requested to bring their robes, and to meet for this service in the parish hall at 7.30 p. m.)

Thursday, July 9th—Holy Communion at 8 a. m., in St. Luke's church. Missionary meeting in Grand Falls, operated by the Rev. L. Norman Tucker, general secretary of the board of missions, as well as by other speakers.

Friday, July 10th—Holy Communion at 8 a. m., in St. Luke's church.

FREDERICTON NEWS. An outing party, consisting of C. B. Foster, district passenger agent of the C. P. R.; J. D. McCready, F. B. Ellis, R. P. Allen and H. F. Albright, C. P. R. photographer, leave here tomorrow morning for Grand Falls, accompanied by Guides Allen Moore of Scotch Lake, and Harry Allen of Penniac at Grand Falls. They will be joined by George E. Armstrong of Perth, N. B., president of the New Brunswick Guides' Association, and a number of canoeists, and at that point will embark in canoes for a trip down the river as far as Fredericton. Mr. Albright will take views of the various beautiful spots along the course of the river, and the newspaper men will gather material for a grand write up of this section.

The trip is promoted by the C. P. R. and the Tourist Association, with a view to developing tourist traffic and with the idea of bringing this beautiful section of New Brunswick more prominently before the eyes of the summer tourist. The party will probably reach here Tuesday.

The Fredericton Park Association has decided to hold a two days' meet here during exhibition week and offer purses aggregating \$1,500.

WANTED—A case of Measles that KUMFORT Powders will not cure in from ten to twenty minutes.

THE FIRE ALARM.

Full Description of the New System to be Installed Here.

The safety department of our city government at a special meeting on Tuesday afternoon recommended the acceptance of a tender for the installation of a system of fire alarm telegraph of the most up-to-date and serviceable kind. In recommending the acceptance of this tender it is believed that the safety department made a wise move.

The Gamewell system of fire alarm telegraph commends itself to the consideration of the community, not only on account of its direction and serviceable merits but from the fact that today it is the only system used in all the large cities of the United States and Canada. No stronger evidence could be given of its effectiveness and practical usefulness than by providing St. John has been behind the times in her system of fire alarm.

Smaller cities, both in the United States and Canada, have exhibited a more progressive spirit in this respect by providing themselves with the most improved and modernized system of fire alarm telegraph. Even some of the cities of conservative England have shown an advance in this direction and have furnished themselves with the best systems of fire alarm, among them the Gamewell system.

The system of fire alarms now in use in this city undoubtedly serves its purpose, but only at the expense of constant vigilance on the part of the official in charge. So defective is the system in mechanical working and detail that it is likely to be thrown out of order at any minute and jeopardise the whole community.

DEFECTS OF PRESENT SYSTEM.

Among the most important defects in the present system are: First, one continuous circuit; second, interfering boxes, and third, iron wire.

First—The first defect is the most serious. A break or cross in any part of the circuit throws the whole fire alarm service out of gear, and days often elapse before the trouble is located and remedied. The superintendent of the fire alarm is often obliged to travel the whole circuit, a distance of some thirty miles, in search of a break or cross. Such a circumstance can never arise under the new system.

Second—The second defect is hardly less serious and is likely to bring about the demoralization of the city's entire system of fire protection. Under the present system an alarm sent in from two boxes at the same time in occurrence quite frequent—gives no indication to the fire department as to the location of the fire, and often valuable time is lost before the fire is discovered.

Under the new system the signal boxes are to be non-interfering.

Third—The third defect is not quite so serious as the two previously enumerated; nevertheless it has been the cause of frequent loss of expense. In the city the life of iron wire is often about four years; in the country it is somewhat longer. The causes of such rapid deterioration in the city are smoke and salt water fog. At the end of every three or four years the iron wire has to be replaced, at a great cost, and if it is not replaced in time frequent breaks in the circuit are the result. All this will be avoided by the use of copper wire which will last for a life time.

ADVANTAGES OF NEW SYSTEM.

The advantages of the new system as compared with the system now in use are strikingly apparent.

The specifications for the new system call for the installation of separate box circuits, besides two bell or tapper circuits, the latter to be so arranged as to be operative from any or all of the box circuits. The circuits are to be connected by an automatic repeater, with room for two additional box circuits whenever the needs of the city may require them.

The automatic non-interfering repeater itself does not require the use of any circuit; it is instantly repeated on all the others; but if that signal is caused by a break of the wire, the repeater, after sounding one blow on the other circuits, throws the one disabled out of service, leaving the others intact. As soon as the broken circuit is repaired, the repeater automatically takes it into service.

This system of automatic telegraph does not require the use of almost sleepless vigilance which the present system imposes upon the superintendent of fire alarm, not to speak of the worry caused by the slightest disorder in the circuit.

The perfect working of the new system may be further exemplified by the fact that if a battery becomes too weak to work efficiently, or an accidental interruption occurs to any part of the wire, in an instant notice is given by one blow on all the alarm bells and gongs, calling attention to its temporary disabled condition; thus not only keeping watch over the city, but actually watching itself.

SWITCH-BOARD.

The most important feature of the new system will be the controlling and testing board to be set up in No. 3 engine house, where the new storage battery will also be located. Upon this board will be mounted the various switches and devices necessary for the proper control of the charging and discharging circuits. The board can be so furnished as to operate either automatically or manually, as may be desired. It will be provided with ammeters and voltmeters for the convenient reading of the charging and discharging currents. It will also be provided with rheostats for each of the six box circuits and two bell circuits, besides annunciators for giving visual indication of the condition of the different circuits, lightning arresters and ground testing apparatus. The board will also have a gong switch, by means of which all batteries charging can, with one movement, be thrown to discharge and vice versa, without opening, or in any way interfering with, the working circuits.

STORAGE BATTERY.

Another important and essential feature of the new system will be the new storage battery. The batteries now in use are of the gravity type, which have to be replenished every few months. A complete double set of storage batteries of sufficient capacity to run the entire system will be installed. The cost of maintenance of the storage battery is

Manchester, Robertson, Allison, Limited.

Flags for Dominion Day.

ALL WOOL HUNTING FLAGS, best English manufacture, re-entranced ends and corners—Union Jack, British Ensign, Dominion Ensign, St. George's Ensign. Sizes 11-3 to 61-3 yards long. Prices from \$1.50 to \$12.00.

Silk Flags, Cotton Flags, Tri-Color Ribbons.

much under regular prices. Sale at Centre Counter, ground floor.

LADIES' NEW BLACK SEPARATE DRESS SKIRTS. In Cloak and Costume Department, Second Floor, we are now displaying the most complete range of Separate Dress Skirts we have ever shown in mid-summer. The styles and values leave nothing to be desired.

Thoroughly reliable cloths, \$2.75, \$3.50, \$3.75, \$4.50. BOYS' THREE-PIECE NAVY AND FANCY TWEED SUITS. Single or Double Breasted. Unapproachable values, \$3.75, \$4.75, \$5.00, \$6.00.

Sale of Waist Lengths and Remnants of Silks—Under Price.

We have placed on sale in Silk Room a large number of Remnants and Waist Lengths of Black and Colored Silks—the season's most desirable styles at prices that will be appreciated. It is one of the best remnant collections we have ever featured. Sale in Silk Room.

M. R. A'S. UNRIVALLED \$10.00 SUITS FOR MEN.

Manchester, Robertson, Allison, Limited.

about one-third that of the gravity cell.

The advantages of the storage battery, as compared with the gravity, are obvious. The space to be occupied by it is one-third less than that at present taken up by the gravity battery. There is not the disagreeable cleaning incident to the gravity battery, and, most desirable of all, the electro-motive force and internal resistance are practically constant and the discharge of current is regular and uniform.

NON-INTERFERING BOXES.

All the new signal boxes are to be of the non-interfering kind. There are already in different parts of the city fourteen non-interfering boxes, but to complete the necessary complement forty-eight new boxes will be placed in service. These boxes are the most improved in mechanism and construction, and are operated by simply pressing a starting lever downward once, thereby throwing into motion the whole fire alarm system.

So perfect is the mechanism of these boxes that it is utterly impossible for any other than the correct signals to be transmitted, and when once started it can in no way be interfered with until it has performed its entire work of sending the alarm—either by the repeated pulling of the hook, or by starting another box on the same circuit. It also cannot be interfered with by the starting of a box on another circuit, as this contingency is provided for by the use of the automatic repeater spoke of above.

The advantages of the new system are too obvious to require any comment. Its operation is instantaneous and sure, enabling the department to respond to an alarm in the first few minutes after the discovery of a fire—minutes which are most precious in the fighting of fires and which, if lost, frequently entail irretrievable damage.

It has been said that the best fire protection is the cheapest insurance, an axiom the wisdom of which can be well appreciated in St. John.

The Gamewell Company, whose tender for the installation of the new fire alarm system has been accepted, is an old and well established concern. The company has furnished more than ninety per cent. of all the fire alarm apparatus in the United States and Canada, and is now extending its business to Europe.

St. John was about the fifth city in America to adopt the old style of Gamewell fire signal box. That was in 1857. Since then the signal box has been greatly perfected, passing from the interfering to the non-interfering, and all the large cities in America have long since discarded the old style for the latest and most approved.

Mr. and Mrs. Walter Fairweather returned yesterday from a three weeks' wedding trip to New York. Mrs. Fairweather will arrive on Monday and Tuesday next at 127 Douglas avenue.

Premier Tweedle, R. Murdoch and F. M. Tweedle of Chatham are at the Royal.

The Attractions of Our Stores are Their Low Prices.

D.A. KENNEDY

(Successor to Walter Scott), 32-36 King Square, St. John, N. B.
