BENEDICT ON DIET.

DIET IN HEALTH AND DISEASE. By A. L. Benedict, A. M., M. D., Buffalo, N. Y., Member American Gastro-Enterological Association, Medical Society State of New York, etc.

The important subject of dietetics has heretofore received scant attention at the hands of medical men, not because they lack interest in it, but because practical, scientific books of convenient size and containing the essentials of the subject were not to be had.

Dr. Benedict's book will make good this deficiency. It simplifies the subject, laying down certain well-defined, underlying principles, and is couched in simple, straightforward language; yet it is thoroughly scientific and up to date.

It includes a discussion of the chemistry of foods and the physiology of digestion, the diet in health, the diet of infant and adolescence, and the dietetic treatment of all manner of diseases, general, local and digestive. It is confidently believed this will be found an invaluable work by the practitioner.

The author is one of the best known of gastro-enterologists, an able investigator, and a facile, entertaining writer.

It is essentially a practical book, written for practical men and is free from theorizing, yet shows a strong individuality and decided opinions.

Cloth, Gilt Top, \$1.00.
