The Trade Bulletin's London cable of March 25th re hogs reads thus: "The market is dull, the advance having been checked owing to liberal receipts from Denmark. Canadian receipts to 62a."

live hogs this week. A stronger feeling has prevailed throughout the trade and as receipts were rather light at the beginning of the week with a good demand from packers, an active business was done with sales of selected lots at \$7.85 to \$7.90 a cwt.

Cable advices from London and other points in Great Britain reported stronger markets for Canadian bacon, with higher prices, and this fact probably accounts for the increased interest on the part of the packers.

There is a steady trade doing in dressed hogs, with prices practically unchanged from those current a week ago. We quote fresh killed abattoir stock at \$10.50 to \$10.75 a cwt; Manilla dressed at \$10 to \$10.25 a cwt, and country dressed at \$9 to \$9.50 a cwt.

EXPORT BUTTER AND CHEESE.

Montreal, Saturday, March 27.—The cheese market has been quiet all through this week, and as far as can be learned very little trade has been done. Of course there is very little stock left here to trade with, the few choice left unsold consisting almost entirely of white cheese, which are not in great demand at present. Reports from the other side, however, indicate strong markets there, with colored cheese in great demand, and commanding a premium of three shillings a cwt more than white cheese, equal to about 1-4 a lb.

Some very fair shipments have been made this week, and stocks in store have been considerably reduced. Unless orders come for shipment within the next few days, there will be a considerable quantity left for shipment from Montreal after the opening of navigation.

It is reported that a number of factories offering for sale. In the western townships there are a large number of creameries operating, but wherever possible there is no doubt that cheese will be made in preference to butter.

The butter market is dull, and holders are easy, and inclined to force prices somewhat to make sales. There is a large quantity of butter in store here that is not desirable in quality, and on this class of goods a sacrifice will have to be made to dispose of them before new butter comes on the market in quantity. There is also a sacrifice being made on some in, and it is meeting with a good demand and is selling at more money than the white butter. Quotations range from 20c to 22c according to quality, with undermost 22c according to 1c. Dairy is quoted all the way from 15c to 18c.
