THE GARDNER PATENT
Sewing Machine

MANUFACTURED BY
GARDNER SEWING MACHINE COMPANY
Nos. 61, 63, 65, 67, 69, 71 and 73, James St.,
HAMILTON, ONT.

F. A. GARDNER, Mechanical Supt. F. M.
WILLSON, Sec. Treas. GEO. LEE, Business
Supt.

THE GARDNER PATENT SEWING MACHINE

READ THE FOLLOWING DESCRIPTION.

In design, the machine resembles the Family
Singer; but the principle of the working parts
is entirely different, having no gear, and being
as nearly noiseless as it is possible to make a
Sewing Machine.

The UPPER tension is on the face-plate. The
discs between which the thread passes are at-
tached by a stud to the tension spring, which
is flat and placed on the inside of the face-plate,
its upper end secured to the arm, and is regulated
by a thumbscrew in the face-plate.

The SHUTTLE MOVEMENT is obtained from
the shuttle-cam on the shaft, which is desig-
nated as a "ball cam," working between the
prongs of a fork which is pinned to the shaft of
the shuttle-arm. This shaft is also made of
steel, and securely fastened to the shuttle arm,
which in the face of the shuttle-arm, describing a
radial movement which is conceded by all to be
the best movement to prevent skipping stitches,
the centrifugal force always keeping the shuttle
firm to the face of the race.

The FEED derives its motion from the "feed
cam" placed on the same shaft, the motion be-
ing transmitted through the eccentric rod and
feed lever under the machine to the feed, which
is made of steel, having a bearing its whole
length, thereby preventing any twisting move-
ment. To the end of the feed lever is attached
a screw, which serves to give any required lift
to the feed that may be necessary for light or
heavy goods. The feed spring is also attached
to the bed; it is flat, made of steel, and very
durable.

The DURABILITY OF THE MACHINE cannot be
questioned; the movements being all hardened,
are not likely to get out of repair. The whole
of the works are enclosed in the arm, which is
finely secured to the bed-plate, and set upon a
walnut top or enclosed in half or full cabinet
case, as may be ordered.

It will be observed that there is no gear of
any kind, and that all the motions are derived
from the same shaft,—all the usual complicated
shuttle and feed movements being avoided.

The TREADLE is adjustable, working upon
"centres" in brackets which are fastened to the
treadle-bar, giving a light easy motion without
any noise or looseness, and can be adjusted to
give any required "dip" to either toe or heel of
the treadle, besides taking up the wear or loose
motion.

The WHEEL BEARING. The wheel runs upon
a tapered stud or bearing fastened to the side
of the stand by a nut with the bearing end
turned to a centre; the wheel is bored tapering
to fit the stud; upon the front side of the wheel
a steel plate is fastened by two screws, which
bear against the centre of the stud; the plate
is adjustable, and screws to draw the wheel
upon the tapered stud, taking up the wear and
yet running easy.

The GARDNER PATENT is fitted with all the
latest and most improved attachments, com-
prising the following, which are furnished
without extra charge:—

One silver-plated Sewing Gauge, with thumb-
screw. One silver-plated Corder. One silver-
plated Tucker. One silver-plated Friller.
One silver-plated Hemmer, which will hem to
any width. One Quilting Gauge. One
Braider. One Screw Driver. One Oil Can.
One Bottle Oil. One Spool Thread. Seven
Cloth or Leather Needles. Six Bobbins. Ex-
tra Spring for leather work. Printed Directions.

Address,
GARDNER SEWING MACHINE CO.,
71-6-6m HAMILTON, ONT.

The King of Sewing Machines

THE MACHINE FOR THE FARMERS
OF CANADA.

THE MACHINE FOR THE ARTIZANS
OF CANADA.

THE OSBORN
LOCK STITCH
Sewing Machine

Has now been tested beyond all question, and the
verdict of the public is that to-day it stands with-
out a rival. It is the most substantially built, has
the fewest working parts, and is beautiful in design
and finish. Has the best design of a shuttle, and
by far the largest bobbins. It is capable of per-
forming a range of work hitherto thought impos-
sible for Sewing Machines. Is sold at about one-half the
price of other Machines doing the like work, and is
equally at home on leather as on fine goods. A per-
fect machine guaranteed or no sale. It is the best
made, simplest, more durable and reliable than any
other single thread Machine. Larger and works
with greater ease. Will do all kinds of domestic
Sewing in a perfectly satisfactory manner. Has
taken first prize wherever exhibited.

Agents wanted everywhere. Splendid Inducements.

Music. 11

NOTICE.

MR. WM. WEBB manufactures and keeps con-
stantly on hand the Patent COMBINED PEA
HARVESTER AND HAY RAKE, a complete im-
plement. Price \$20.

Extract from Certificate:—
We, the undersigned, take great pleasure in re-
commending to the Farmers your Pea Harvester and
Hay Rake. Having used your Machine and seen it
used, would say we can pull from eight to ten acres
of peas per day with it as well as it can be done with
the scythe.

Yours respectfully.

in every town.

PRICE 25c. per lb.

Wholesale by C. GARLICK, 138 St. James
Street, MONTREAL.

11-371 W. WELD, Agent, London.

PRIDE OF THE DAIRY!

THOMAS FORFAR, - Patentee.
WATERDOWN, ONT.

THE COMMON DASH CHURN, when made to
work easily, is undoubtedly the favorite among
Butter Makers, and this attachment is certainly an
advance in that direction. It can be worked either
with the lever or cross head on the shaft. The up-
ward motion is the hardest of the work in the usual
mode of churning with the common churn, but with
this attachment the dash is raised by the spring,
making the labor lighter. The dash is concave,
and a cup on the staff for the purpose of forcing the
air down through the cream, producing the butter
much sooner. Also, the double cover, to prevent
the cream from flying out on the floor, and on the
clothes of the churner. By shifting the connecting
rod, the power of the spring can be changed to suit
the quantity of cream. It is the most simple, dur-
able, and complete Churn of any now in use.

Agents wanted to sell Township and County
Rights in the Dominion on reasonable terms.

THOMAS FORFAR,
MANUFACTURER OF
Clothes Wringers & Churns
WATERDOWN, ONT.

The above articles carried off the First Prize at the
Great Central Fair held in Hamilton, competing
against several of the Churns that took First Prizes
at Kingston. Sent free to any R. R. Station in On-
tario, on receipt of retail price, until territory is
sold. Also, 1st Prize at Guelph Central Exhibition.

PRICE LIST.

TIME AND LABOR SAVED

THE OSCILLATING
WASHING MACHINE

Patented on the 18th of July, 1870, by
WILLIAM MATHEWSON,
OF BROOKLIN, ONT.

THE Patentee challenges any other Washing
Machine now in use to compete against his, for
any sum they may name. The Machine has been
thoroughly tested, and used by nearly all the prin-
cipal hotels and leading farmers in the County, who
pronounce it the best now in use. It will wash from
a muslin pocket-handkerchief to a bed-quilt. A
trial will satisfy any person as to its merits.

County Rights and Machines for sale

Apply to WM. MATHEWSON,
Brooklin, Ont.

This Machine can be seen and procured at the
Agricultural Emporium Waterdown, London.

Brooklin, March, 1871. 3-1y
