

**Don't Sell the Young Calf**  
**BLATCHFORD'S CALF MEAL**  
 Will Raise It Without Milk

There's big money and little trouble in raising your calf the Blatchford way. You save all the milk of the cow for market. As soon as the mother cow's milk is ready to sell, the calf is ready for **BLATCHFORD'S CALF MEAL**. For over a century the recognized milk feeder for calves, at one-fourth the cost of milk. Composed of eleven different ingredients carefully apportioned and thoroughly cooked, producing a scientifically balanced ration for the young calf. Successfully used on thousands of American farms for over 30 years.

**The Only Milk Equal Made in an Exclusive Calf Meal Factory. Unlike any of the So-Called Calf Meals Made of Raw Cereal By-Products.**

**Questions and Answers.**  
 Miscellaneous.

**Holidays.**

Can hired man engaged by the year claim pay for the eight holidays he is entitled to?  
**SUBSCRIBER.**

Ans.—Yes.

**Timothy Killed.**

Sowed a field of timothy in 1911, had a good crop of it in 1912, and in 1913, and has since died entirely. There is not even a weed growing on it now. It is perfectly bare. Could you tell me the reason for it?  
**W. C.**

Ans.—We do not know what the trouble is unless it may be due to white grubs.

**Abortion.**

Will you please answer, through the veterinary column of "The Farmer's Advocate," whether inoculation for abortion in cattle has proved a success or not. I noticed some time ago where they were experimenting, but did not notice the result.

**A SUBSCRIBER.**

Ans.—See article by E. S. Archibald in our issue of December 17.

**Feeding Out Silage.**

1. This is my first year's experience in feeding silage. I have a 14 x 33 ft. silo, which was filled with well-cared, almost ripe, Yellow Dent corn. When I commenced feeding, I had about 25 feet of good silage. I am feeding about 15 inches per week, and have now (Dec. 7) 20 feet. At the present rate of feeding, 800 lbs. per day, how long will it last?  
 2. Are the tables of contents of silos based on the cubical contents of silos at filling-time, or after the silage has settled?  
**F. W. R.**

Ans.—1. About five months.  
 2. Usually on settled silage.

**Buying Shock Corn.**

Editor "The Farmer's Advocate":  
 Dear Sir,—In last week's issue an article was published on buying corn. The following ideas may interest some of your readers: From my own experience, I find that corn varies in price according to the district. Buying corn in the shock, buyer drawing it away, all that the horses can draw, at about \$7 per load, and silage from the silo \$4 per foot.  
 The following also came under my notice: A farmer had a 30-foot silo he wished to get filled. The seller used his own team; hired three other teams, and buyer also supplied a team and drew six acres of corn to buyer's place. He paid all the expenses of putting corn in buyer's silo, and sold same to buyer for \$3 per foot after it had settled.

**School Fairs Successful.**

Reports received by the Ontario Department of Agriculture indicate that the Rural School Fairs, held by the District Representatives under the direction of the Department, this fall, have been remarkably successful, and have taken a firm hold on the interest of the people, both young and old. Starting three years ago with 25 Fairs, they have increased so rapidly that 148 were held during the past season, taking in 1,391 schools, having 75,602 entries, and having 23,872 plots. The children utilized 4,072 settings of eggs. The attendance of the Fairs totaled 95,310. The interest shown by the youngsters in the plots and the poultry, and in their colts and calves, indicated that this plan was having a real influence in developing an interest in agriculture in their young minds. The School Fairs are held under the management of a local organization of boys and girls, and under the general supervision of the District Representative.

A young man who needed false teeth wrote to a dentist ordering a set as follows:

"My mouth is three inches across, five-eighths inches thick the jaw. Some hummocky on the edge. Shaped like a boss-shaw, toe forward. If you want me to be more particular I shall have to come that."

CLEAN YOUR STABLES  
**The Superior Way**

The Old Way

Is it your daily experience to push out a wheelbarrow over a plank through a sloppy, muddy barnyard, taxing your strength and your patience, taking four times as long to do the job as it should?

**THIS IS THE OLD WAY. GET POSTED — LEARN HOW A BOY CAN CLEAN YOUR STABLES THE SUPERIOR WAY.**

The Superior Litter Carrier Outfit is the most complete on the market, embodying the most modern practical ideas of the leading stock and dairymen of Canada.

There are 23 special features in my Superior Carriers that I want you to know about before you install a carrier. Every man who keeps stock should have a Superior Carrier Outfit. If you are interested I want you to write to me, and I will tell you how reasonably you can install my Superior Carrier, that will pay for itself before the winter is over in time saved alone.

Look at the comparison, the Old Way and the Superior Way, the same man taking out five times as much manure at one time and doing it quicker and with very little exertion.
