

## A Circle of Good Friends of Yours

Good game shooting days are scarce enough without anyone wanting to take chances on either arms or ammunition. No need to. Just remember Remington

UMC prestige and Remington UMC fine performance in the hands of the average man. That will help you to a wise choice.

# Remington UMC

### The Remington Pump Gun

The Remington UMC Pump Gun—"that good old stand-by," six shots, bottom ejection, solid breech, hammerless, easy slide action, safe. We take time to do things right, so every gun is inspected at over 1,200 points and thoroughly tested on our shooting grounds. We know exactly what every arm can do before we sell it. We know it's Right.

The name Remington UMC stands for more than 100 years of skilled manufacturing experience.

If you want fast, clean sport any day of the year get a hard hitting little **Remington UMC .22 Rifle**. The "Autoloader" streams its 16 shots as fast as you pull the trigger. The **Slide-Action Repeater** is a velvet-smooth shooter—15 shots, solid breech. The **Single Shot** is a rugged, accurate little weapon, too.

**Remington UMC .22 Cartridges**, short, long and long rifle, are made with the same care as our famous high power metallics. Get a box or two and be ready for an hour's fun any time.

### Remington Shells Get Results

A quicker, harder drive with less "lead" and less guesswork. The "Arrow" shell is the highest development of the steel-lined shot shell ever marketed. The "Nitro Club" is a famous steel-lined "speed" shell, and the Remington is very popular for field or trap. All three smokeless and made in all standard loads.

Then there's the "New Club," a yellow fellow, that wins the black powder user's heart.
