OUR FISHESIES.

We are glad to learn that those of our people who have been engaged in the Fishing business during the season now drawing to a close have met with very general success, and that a remunerative market is accessible to them in England and the United States, as well as in the Provinces, by ships to the old country and steamers to Boston, &c.

We hope that our trade in this branch of industry will be more fully developed next season, and that a larger amount of capital will be employed, in order that our own people may share in the advantages which our American neighbors have been reaping for many years past, whilst we have remained idle spectators.

We learn that Jas. McCraith, Esq., merchant, of this City, has employed labor and capital to a considerable extent, at Robinson's Island, during the past summer, in the fishing business, and has made it pay. Several others of our enterprising merchants in Charlottetown, Georgetown, Souris, &c., have done likewise and we hope successfully.

We may mention the luck of one fishing vessel which came under our own personal observation, as a proof of what may be accomplished in this invaluable source of oliver seed,

The New York Tribune says, "the reason why Drak. Plantation Bitters are so universally used and have such an immense sale, is that they are always made up to the original standard, of highly invigorating material, and of pure quality, olthough the prices have so largely advanced," &c.

The Tribune just hits the nail on the head. The Plantat ion Bitters are not only made of pure material, but the people are told what it is. The Recipe is published around each Bottle, and the bottles are not reduced in size. At east twenty imitations and counterfeits have sprung up. They impose upon the people once and that's the last of them.

The Plantation Bitters are now used in all the Government. Hospitals, are recommended by the best physicians, and are warranted to produce an immediate beneficial effect. Pacts are stubborn things.

Such evidence might be continued for a volume. The best evidence is to try them. They speak for themselves. Pegsons of sedentary habits troubled with weakness, leastsude palpitation of the heart, lack of appetite, distress after eating, torpid liver, constipation, disbetes, &c., will find speedy relief through these Bitters.

Every bottle for exportation and sale out of the United States has a metal cap and green label around the neck.

Beware of refilled bottles. See that the cap has not been mutilated. Any person pretending to sell Plantation Bitters, in bulk or by the gallon, is an impostor. We sell it only in bottles. Sold by principal dealers throughout the habitable globe.

We may mention the luck of one fishing vessel which came under our own personal observation, as a proof of what may be accompliabed in this invaluable source of our wealth: That splendid schooner, the F. Treat, Clarke, master, arrived at this port on the 18th day of June last, on her summer voyage to the fishing ground, and in three weeks returned with a catch of upwards of 300 barrels of Mackerel, which were discharged on Queen's Wharf, and forwarded to market per steamers to Boston. The F. Treat proceeded again to the fishing ground, and has since made three more trips, making in all four trips, her average catch per trip being about twenty thousand dollars.

It may be said that the extraordinary success of this schooner is owing to the superior tact, courage, and skill of Capt. Clarke, who is so well and favorably known by the general public as master of the Sailing Packets between this port and Boston previous to the days of steam communication, during—which he very deservedly secured the confidence and respect of the whole public.

We admit that much depends upon the careful and judicious management of such men as Capt. Clarke, and we trust there are natives of this Island who, after some experience and practice, would be found to possess all the necessary qualities for becoming successful rivals to their American neighbors in the prosecution of this branch of home industry.
