protection of its Insurers. This step has been taken upon the principle enunciated by one of the directors at the last Annual Meeting of the proprietors—that the interests of the assured have a paramount claim on the directors—a claim superior even to that of the shareholders themselves.

From that moment, as might be expected, the Company attained the highest and most enviable position throughout the country, and has retained it ever since. The result is shown in the unexampled fact that its Fire Revenue alone rose in about five years from little more than £30,000 to about £130,000.

A further cause of this rapid growth lies somewhat more below the surface, but is yet of importance. From inquiry we learn that no fire office possessing half the above revenue annually deposits its account with the Registrar-general.

The resources and balance-sheet of the great Company are, on the contrary, annually registered, and unmistakable evidence is thus given periodically of its capacity to meet its engagements.

Morning Herald, December 26. 1856.

Indeed, the bonds of the Royal are pronounced to be large than any declared by the mass of the English.

Here is an office which yields a fairly estimated and wholesome extraordinary bonus per centum in its Life Branch, in regard to fire operations, can make very enviable boast, that it has no other fire business of all but two of London fire offices—viz., the receipt nearly £130,000 per year in Fire premiums alone—some of which ancient offices have been in existence for a century!

Equally successful and singular in both departments. Indeed, the Life Department may be said to present results equally worthy of mention.
