Does Your Stenographer Use a
LINE-A-TIME?
It enables her to increase her speed 30 to 50 per cent. daily and frees her from eye-strain, nervousness and headaches. And the cost is comparatively trivial.
The Line-a-time is made in a variety of sizes to support any "copy" from stenographer's note book to any size statistical report sheet, for billing, and copying from mailing lists, etc.
Stands on its base behind and separate from the typewriter, with an operating lever beside the keyboard. May be used on any desk with any typewriter, with a bookkeeping and billing machine, and with a check-writer.
A slight pressure on the operating lever with the right-hand little finger brings up the line next to be copied into view from behind the stationary line-finder, so that the line of "copy" being transcribed is on a level with the typist's eyes. Thus the typist is free from eye-strain, nervousness and headaches that go with following "copy" without a line-finder, or with one that moves.
It practically eliminates the making of errors in transcribing and copying, because it removes the condition that is the cause of errors.
Used by many of the largest firms in town. We will gladly send you one for a day, a week or a month free trial; no obligation to buy.
