A good many shad are being taken out of the river here. As a general thing the law is being fairly well observed.

Our fishery officer, Eugene S. Dodge, is again on duty. His orders are strict this year, and he intends to obey them, so all interested should take notice and govern themselves accordingly.

There is a bad hole in the river bridge.
Surely some one should have public spirit
enough to nail a board over it. The other
bridge, just to the south of it, is also in need
of repairs. Should an accident occur at
either of these places some one would have
damages to pay.

either of these places some one would have damages to pay.

Mrs. Edwin Dodge met with a very serious accident on Sunday evening last. On going out of the new Baptist church after service, she by mistake made a misstep off the side of the steps, and falling heavily struck her head against a hard substance. The blow fractured the jaw-bone in two places, knocked out several teeth, and cut a deep gash of several inches in length under the chin, which bled very profusely. The wound is very painful, but it is hoped that it will not prove fatal. Much sympathy is felt for both Mr. and Mrs. Dodge in this serious misfortune. Dr. Sponagle is in attendance.

Again Destroyed by Fire.

The Tabernacle church, Brooklyn, N. Y., of which Rev. T. DeWitt Talmage is pastor, was destroyed on Sunday, 13 inst., by fire. The fire broke out just after the morning services were concluded, and while the eminent pastor was in the church shaking hands with friends. The loss on the church is estimated at \$400,000. The Board of Trustees held a meeting immediately afterward, at which it was decided to rebuild.

There is a bad hole in the river bridge.

Surely some one should have public spirit the elessened take of cod, herring and mack erel; these three items when compared with the products of 1892, standing thus:

This loss is to a considerable extent made good by the increased catch of lobsters, alewives and salmon; these items standing thus;

shad and alewives be so changed that no nets be allowed to be set after 10th of June in the municipality of Annapolis." His reasons for this suggestion are that under cover of fishing for shad and alewives the fisherment take salmon, but I state that whitefish and salmon-trout, the product of the Bedford hatchery, are making their appearance in his district.

The overseers state generally that the regulations have been fairly observed, the exception being the too-frequent violations of the lobster-fishing regulations.

In concluding this report, I beg to state that a very undesired phase of the lobster business has been developed by the speculator who having on hand on the 1st of July lobsters legally taken holds themover for the purpose of obtaining better prices. The temptation to illegally fish and claim that the fish on hand were caught before the 1st of July is too much of a strain on the average fisherman, hence the law is violated. It would, I believe, be wise that the words of the regulations be changed by striking out the words "without lawful excuse" and an attack upon our good faith and stand-

Sir,—In your paper of May 9th, you publish an attack upon the Pidgeon Fertilizer Co., by one G. B. McGill, and in justice to us we now request you to publish the foregoing communication, not particularly as a reply to this person, but that your readers may have our statement of the case.

The circular in question, which is so maliciously attacked, was written only in self-defence and not to bolster up or advertise our goods, as the Pidgeon Fertilizers are extensively used and well known throughout the maritime provinces, Mr. McGill himself having used them and testified in their favor.

To give your readers the facts of the case as briefly as possible, as we do not want to encroach upon your space, a circular was issued at Middleton in 1893, and in this circular the values were placed as follows, viz.

Eureka Phosphate (Pidgeon & Mosher), \$23.91 Soluable Pacific Guano, 24.71 Bradley's XL Phosphate, 30.00 Miller's Complete Bone Fertilizer, 35.11 Miller's Complete Bone Fertilizer, 30,11

This circular was extensively used against us, to our disadvantage, and as we were being pressed by our agents and customers for an explanation, we procured the Bulletin of the Ifland Revenue Department for 1893, No 36, "Fertilizers Sold," and replied, giving value of goods drawn by the Dominion Government Inspector, at different places on sale, to consumers in 1893, viz:—
