

#### STRAWBERRY PLANTS

EARLY ABERDEEN, the earliest by 10 days of any berry grown in Western Ontario, \$2.00 per 100. We also have everything in plants, both flower and vegetable.

A. R. Murdock, West London, Ont.

#### Shipment of Exhibition Apples

The Department of Agriculture, Ottawa, shipped recently to Wm. Hutchison, Exhibition Commissioner, London, what is believed to be the finest lot of exhibition apples ever sent out of Canada. The apples were collected last fall under the direction of Mr. J. A. Ruddick, Dairy and Cold Storage Commissioner, by members of his staff, who went direct to the orchards at time of harvesting, making their own selections and packing them in a special manner. As soon as possible after packing, the apples were placed in cold storage and held at a temperature of thirty-two degrees. By these means it has been possible to preserve in excellent condition even such early maturing varieties as McIntosh Red and Fameuse.

All the fruit-growing provinces are well represented in the collection which comprises nearly eight hundred boxes. Some of these apples will be shown at the Great International Horticultural Exhibition to be held in London in May, and the balance will be used to continue the exhibition at the Crystal Palace.

#### Correction

In the April issue we quoted Mr. A. W. Peart, of Burlington, Ont., as having stated at the Dominion Fruit Conference that he estimated that the fruit interest of Canada represent an investment of \$78,621,800. Mr. Peart writes us that his reference was to the province of Ontario and not to Canada. Mr. Peart further states: "Mr. Moore, of the Markets Division, gave the acreage of Canada, but from this I inferred, if my memory serves me right, not having his figures before me, there would be about \$128,000,000 invested in Canada."

#### To Make Quick-Growing Plants Grow Quicker; and Slow-Faster

USE

### Bon Arbor

It is a complete plant food. Feed your plants; get results; do it now.

Bon Arbor is favorably known everywhere it is used and it is widely used. Such gardens

ly used. Such gardens as those of the Capitol at Washington, D.C., and the Parliament Gardens, Ottawa, Canada. and the Royal Windsor Gardens, England, on the one side, and over 2000 country estates and farms on the other, represent the field supplied. Show flower and vegetable growers find Bon Arbor indispensable.

Bon Arbor is put up as follows:

pound package, making 15 gallons, by mail ... 30c 1 ... 30c ... 55c ... 150 ..

application.

# Potash for Orchards

Photo taken in Orchard of J. Elliott Smith

The fruit growers of the famous Annapolis Valley realize the importance of Potash in producing large yields of excellent quality.

The system employed by them in maintaining soil fertility is an admirable one and ensures large yields every season. Annual applications of 200 to 400 lbs. Muriate of Potash and 400 to 800 lbs. Bone Meal per acre are given and in a few instances the applications exceed these quantities.

The humus and nitrogen are obtained by growing and plowing down a crop of Red Clover every year. During the early summer, thorough cultivation is given, chiefly with a view to conserving soil moisture.
