SPRING PLANTING.

TORONTO NURSERIES.

AS the season for planting is approaching, the proprietor of the Toronto Nurseries would call attention to the excellent stock which he has to dispose of this spring. It consists largely of the following:—Standard and Dwarf Apples, Pears, Plums, Cherries, Peaches, Hardy and Foreign Grapes, Currants, Gooseberries, Strawberries, Esculent Roots, &c.

In the Ornamental department will be found Deciduous and Evergreen Trees, Flowering Shrubs, Roses, Herbaceous Flowering Plants, &c. Especial attention is invited to the following articles, the stock of which is particularly large:—Grape Vines, comprising all the new and hardy kinds; Roses—Hybrid Perpetual, in very great variety and quantity; Hedge Plants, viz., Buckthorn, Berberry, White Cedar, and Privet. The demand for Hedge Plants is steadily increasing,—that for Buckthorn more especially, which is beyond doubt the best plant grown for fencing purposes. Specimen Hedges to be seen at the Nurseries.

Parties near town about to plant are invited to inspect the stock on the ground. Descriptive catalogues furnished upon the receipt of two cent stamps.

COE'S

SUPER-PHOSPHATE OF LIME.

MR. COE has received the following letter from the Rev. Mr. Papineau, of Bishop's Palace, Montreal:—

MONTREAL, March 2nd, 1864.

SIR,—Having been appointed Superintendent last spring of the garden attached to the Bishop's Palace, Montreal, I applied to our esteemed seedsman, Mr. Evans, for a few pounds of Coe's Super-Phosphate of Lime, in order to judge personally of its fertilizing effects as a manure, and to satisfy myself whether it really deserved the high reputation in which it was commonly held. [I generally distrust the reliability of widely-advertised articles.] But now, sir, I deem it my duty to assure you that the success of the Super-Phosphate greatly exceeded my anticipations, and that I believe it to be superior even to its reputation. I planted a piece of very dry, hard and barren land with potatoes and Indian corn, manuring a portion with stable compost, another portion with common kitchen salt, and the remainder with Super-Phosphate of Lime. The crop gathered from the plot manured with this latter substance was far more abundant, and was taken out of the ground fully ten days earlier than the crops manured with compost and salt. I have used the Super-Phosphate with equal success on onions, cabbages, beans and peas. The Super-Phosphate of lime, in my opinion, is one of the most powerful and economical fertilizers known for the cultivation of gardens. It does not force all sorts of noxious weeds into existence like stable manure, but, on the contrary, imparts rapidity of growth and vigor to the useful herbs. I cannot recommend it too highly to gardeners and others, convinced, as I am, that they will be well pleased with it.

Allow me to thank you, sir, for the powerful fertilizer you sent me, and believe to be, sir,

Your very humble servant,

T. V. PAPINEAU, Priest.
