

## MOULTON COLLEGE.

NOTWITHSTANDING the stormy weather, a number of teachers and students availed themselves of the invitation to the "private view" of the Fifth Exhibition of the Women's Art Association. All agree that the Exhibition excelled those of previous years. The President and other officers are to be congratulated upon their efficiency in making it such a success.

ON the evening of Tuesday, March 21st, we had the pleasure of hearing Mrs. Stevens, of the China Inland Mission. We were much interested in her description of the life led by Chinese women and girls, and of the methods of work among them. As we listened to her words, we realized how great are our privileges here, and how grateful we ought to be that our lot has been cast in a Christian land.

THE musical talent in Moulton is fast developing. It is seeking more and more to make itself heard. There was a time when the fitful dulcet strains of the chapel piano could be but faintly heard outside the chapel door; but now, if seeking soothing tones, go listen on the other side of Lake Ontario. Why is it that girls will not be satisfied with putting themselves in fashion, but even want to give pianos bangs? All are longing for the day when the chapel piano will stop putting on so many airs and will return to its original state of peace and harmony.

THE graphic account which Dr. Caven gave us at the Hall of his trip through the Holy Land, and his impressions of the country and its people, was a real treat for the Moulton students who heard it. A keen observer of men and things, with the power of vivid description, and an under-current of humor which was continually coming to the surface, he carried us all with him from Joppa to Jerusalem, Jericho and the Jordan, then north on "the vicious little horses" to Shechem, Esdraelon, the Sea of Galilee, Cana and Nazareth, and along the sea shore through Tyre and Sidon to Beirut. It was a most delightful trip for us to take, sitting quietly in the McMaster chapel all the while.

---

NEW ORLEANS, LA., March 6th, 1893.

Although we have been down here over three weeks, we have not yet seen all of the interesting places. I have been around the city a great deal and yet feel as if I knew a little bit about it. We have been very fortunate in having fine, warm weather; some days, indeed, are too warm to be comfortable. But the people take things so easy and do so little that the heat does not seem to trouble them very much. You will see them at all hours of the day sitting out on their doorsteps
