

# THE PLANSIFTER

This Machine Leads; Others try to Follow!

The floor space required is so little that sufficient room can be spared in the smallest mills.

Its form of construction is such that

It is the most convenient to

Spout to.  
Spout: m.  
Get at.  
Regulate.  
Examine flour stocks.  
Examine separations.  
Examine sieves, } Without  
Repair sieves, } removing spouts.  
Easily Balance.

ABSOLUTELY NO SCOURING ACTION.

## Some Advantages are:

Saves spouting, saves elevators, saves conveyors, saves millwrighting.

Displaces 6 to 10 ordinary reels.

All parts are easy of access without leaving the floor.

(No step-ladder required).

All passages for stocks are straight, large, ample, will not choke, and communicate directly from sieves to outside.

There are no joints at edges of sieves for stock to leak through.

Every separation and flour stock is taken independently from the machine, and can be examined before mixing with other stocks.

Each section of machine handles one reduction and can be independently regulated to produce the exact result desired.

Its bolting and results are completely under the control of the miller while running.

The Plansifter is perfectly balanced, so that it imparts no vibration to mill building.

Requires no bracing whatever.

Impurities all floating to the surface, are carried off and never again mixed with pure stock.

The Plansifter will be placed on trial on its merits, and the miller himself left to be the judge as to its performing all that is claimed. If not perfectly satisfactory machine need not be kept.

THE PLANSIFTER MILL has plenty of light, air and room, with easy access to every stock.

THE PLANSIFTER produces results far superior to any other machine or system.

POWER SAVED—The saving in power alone in steam mills will soon pay the cost of a PLANSIFTER.

THE PLANSIFTER makes pure, white, evenly granulated flour, free from specks, without using fine numbers of cloth.

It Saves Space  
It Saves Power  
It Saves Cloth  
Makes Better Separations  
Makes Purer Stock  
Makes Better Flour

Makes Better Clean-up  
Makes Closer Finish  
Makes Larger Yield  
Makes Milling Easier  
No Vibration  
No Noise

No Dust  
Easily Controlled  
Insures Uniform High Grade  
Increases Capacity  
Must Come into General Use

Big Mills Cannot Afford to do Without them, and they do Charming Work in the Smallest Mills.
