

That the Loch Lomond iron areas are likely to prove extensive enough to justify immediate working is the interim report that comes to Sydney from the prospectors engaged in making an examination of the fields on behalf of the Dominion Steel Corporation. The work of the prospectors will not be completed for two weeks yet, and their final report is being awaited with the greatest of interest here. Iron ore near the coal mines means cheaper steel, and cheaper steel means a greater Sydney.

A. A. McKinnon, Ry. Dept., Springhill—"Have read 'Minerals and Mining' with much interest and profit. Am greatly impressed with the author's splendid optimism regarding the future development of the mineral resources of Nova Scotia. The book contains a wonderful fund of useful information hitherto hidden from the writer, who will treasure the book on account of its own worth, as well as for form and friendly association with its author."

A. S. McNeil, District Superintendent, Glace Bay: I have received a copy of your book. It is very interesting, instructive, and to the point. I congratulate you on the completion of this valuable work and trust it will meet with the appreciation which it deserves.

MINERALS AND MINING.

WHAT IS SAID OF IT.

"May I join my voice in the concert of eulogies that have more than consecrated the value of your work"—P. Lechien.

Dear Sir:—Accept my hearty congratulations on the production of your invaluable book, "Minerals and Mining," which I have read with intense interest, presenting, as it does a complete history of the mining industry of the Province, and from so authentic a source it should prove very helpful, to every mining student. To myself the book is especially interesting on account of our intimacy at a mining center, in the seventies, and the reminder of old and lasting recollections.—John Fraser

Thomas Cantley, Chairman of the "Scotia" Board, writes: "I wish to congratulate you on your book. It is certainly creditable, well printed, good clear type, in short, the binding, the size of the volume, and general make-up leave nothing to be desired. Altogether it is a most creditable production, and I have no hesitation in saying that it will be looked on as an authoritative history of the Iron and Coal industry in this Province, the value of which as the years go by will be continually enhanced, and in it you are leaving that which will keep your name alive so long as Nova Scotia is interested in civilization's great basic industry."

J. Macgillivray, Receiver and Manager, Inverness Railway & Coal Co.: I have been reading your book "Minerals and Mining, Nova Scotia", and find it highly interesting and instructive, containing, as it does, much useful information in very readable form.

LENTEN BREAKFASTS

When people have begun having the lightest possible breakfast they are surprised to find that nothing clears the brain so well, to meet the day's work and worries, as a meatless breakfast.—Daily Sketch.

IRELAND'S PAST.

"Have we forgotten it already, this lesson of the war—when Ulster drew her sword and stood by our side, and Dublin drew her knife and crouched at our back?"—Morning Post.
