

THE
MARITIME MEDICAL NEWS.

A MONTHLY JOURNAL OF
MEDICINE AND SURGERY.

Vol. XI.

HALIFAX, NOVA SCOTIA, APRIL, 1899.

No. 4.

PANOPEPTON has been characterised by a medical correspondent as a "happy thought." Obviously, it satisfies to the fullest degree the dictates of experience and science, combining as it does, the prime food elements, albuminous and farinaceous, in a perfectly assimilable and agreeable solution. The beef and bread having been physiologically converted into the soluble and diffusible form absolutely essential to their appropriation by the system, are sterilised and concentrated and preserved in sherry wine.

IN PANOPEPTON, as we may therefore confidently anticipate, we have a resource which conserves and imparts energy, sustains the system against the inroads of disease; and quickly enables the digestive functions to resume their normal power, and thus appropriate ordinary foods.
