

employs, and which he knows "to be efficient and to be the simplest consistent with certainty in results."

THE YEAR BOOK OF TREATMENT FOR 1895. A comprehensive and critical review for practitioners of Medicine and Surgery. In one 12mo volume of 501 pages. Cloth, \$1.50. Philadelphia: Lea Brothers & Co., 1895.

The eleventh consecutive issue of this annual summary of medical progress will interest the wide circle of readers who have learned its substantial value. To have the real advances in treatment in all departments of medical practice culled by recognized specialists from the immense mass of medical literature, and presented with critical remarks in a classified form for immediate use, is assuredly a help towards success which busy practitioners will not neglect, and which other practitioners will consult for the soundest of business reasons. The reader interested in a special subject can quickly post himself on whatever is new and good in treatment by a perusal of the chapter devoted to it, and the general practitioner can with facility turn to any topic by a glance at the index. Those desiring to read up the literature of any subject can find no more convenient guide than the selected list of new books, new editions and translations. The volume is exceedingly cheap in proportion to intrinsic value and serviceableness.

CLASS-ROOM NOTES.

Prof. Keen says warty tumors are best removed by the application of a caustic, such as sulphuric acid or nitric acid; and if removed by mechanical means their bases should invariably be touched by a strong caustic.

In cases of rheumatic fever, Prof. Wilson says the heart may become affected in all kinds of cases. The mildest cases suffer as well as the severest. The heart may also become affected at any stage of the disease, but very seldom during the earlier stages of an attack.

PUBLISHERS DEPARTMENT.

MALARIAL CONDITIONS.

For all malarial conditions quinine is the best remedy we have. But associated with this condition there is always more or less pain, which often renders the life of the individual uncomfortable, if not positively miserable. Antikamnia will remove these unpleasant symptoms, and place the system in the best condition for the quinine to

do its work. There are a number of ailments, not closely defined, which are due to the presence of the malarial poison. All such conditions are greatly benefited by the use of antikamnia and quinine. In headache (hemikrania), in the neuralgias occurring in anæmic patients who have malarial cachexia, and in a large number of affections more or less dependent upon this cachectic condition, the regular administration of this combination will produce the most happy results. In cases of malarial fever it should be given as a prophylactic and curative.

"Antikamnia and Quinine" are put up in tablet form, each tablet containing two and one-half grains of antikamnia and two and one-half grains of quinine, and is the most satisfactory mode of exhibition.

A NEW ART EDITOR.

WILLIAM MARTIN JOHNSON, who illustrated the "Garfield" edition of "Ben Hur" for the Harpers, and also their editions of "The Cloister and the Hearth" and "Hypatia," becomes the art editor of the *The Ladies' Home Journal* on June 1st, leaving New York to reside permanently in Philadelphia. Mr. Barton Cheyney, a clever newspaper man, who has been attached to the press of Delaware and Pennsylvania, is also added to the *Journal's* editorial staff as one of Mr. Bok's principal associates.

JULIA MAGRUDER'S NEW NOVEL.

Miss JULIA MAGRUDER, whose story of "The Princess Sonia," in the *Century*, is attracting such favorable comment, has given her new novel to *The Ladies' Home Journal*. It is called "The Violet," and deals with the question of second marriage. Mr. C. D. Gibson, the illustrator, is making a series of pictures for the novel.

While at this time other magazines are pressing their claims to the favor of the intelligent public, those of *Littell's Living Age* are not likely to be forgotten by those who know what its services have been in the spread of the best periodical literature throughout this continent.

The price of the magazine, \$8.00 a year, is small in view of the vast quantity and high quality of its contents, a year's numbers forming four large octavo volumes of 824 pages each. As a special inducement, to any who desire to make a trial subscription, the twenty-six numbers, forming the first half of the year 1895 (January to June inclusive), will be sent for \$3.00. To anyone remitting \$6.00 in payment for the nine months, April to December inclusive, the thirteen numbers forming the first quarterly volume of 1894 will be sent free.

Perhaps no better exhibit could be found of the progress and expansion of thought in the different fields of literature, politics and science during the last half century than a complete set of *Littell's Living Age* would present. Each volume is a mirror reflecting the living literature of the month it covers.
