YORK COUNTY

BIG CROWD TOOK PART IN THE BARN-RAISING

York County Leads Them All Now
in Fine Structures—North and
West Toronto News.

York County had a surfeit of good things on the go Wednesday, in the Liberal convention at Thornhill, the big garden party at Tommy Shadlock's at Agincourt, the barn raising at Johny Glendinning's at Amber, and the biggest event of the day, the raising of the new barn at Vaughn Township, back of Thornhill. And everyone of them went off without a scratch, even the convention.

Pretty nearly 400 people were at Mr. Fisher's counting the ladies, and the farm house, for miles around were emptied. So keen was the desire to get out a give a hand and share in the good things provided afterwards, that an invalid was wheeled three miles to get there, and he declared afterward that he would have stood twice the journey sooner than miss the fun.

The new barn is 40 by 55 feet, popular size and well when completed, hold an enormous amount of grain and straw. A splendid stone and cement wall about 16 feet in height and giving ample head room and accommodation for a big bunch of cattle and horses adds greatly to the solidity and appearance of the structure.

The ladies provided an abundant report and after everybody had fared sumptuously an abundance still remained.

Men like Harry Fisher, who by good cultivation, render the erection of these big modern barns possible, confer a lasting benefit on the country at large. It means a lot of good hard work, but it brings its own reward.

SWANSEA. June 29.—(Special).—A lodge of the A.O.F. has been installed here with a membership of 28. On Friday evening 12 more members will be enrolled. The new officers are: A. F. Sylvester, chief ranger; Frank Moulard, secretary; and Edward Smith, treasurer. "Pride of Swansea" is the name of the new lodge, and it looks as tho the term is a not inappropriate one.

MALVERN. Villagers Were Invited to Make Their Wants and Wishes Known.

MALVERN. June 29.—(Special).—The first engine drawing passenger cars and carrying passengers passed thru the village yesterday. On board were a number of prominent officials connected with the company and a feature of the trip that gave a good deal of satisfaction to the villagers was the expressed desire of the management to confer with the villagers. Notice had been posted in the post-office, inviting the villagers to make suggestions regarding which station improvements, and in short anything with relation to the road in general. They were also invited to take a run east over the line, an invitation which a number accepted.

NORTH TORONTO. Board of Works Held Session Last Night.

NORTH TORONTO. June 29.—(Special).—At the meeting of the board of works to-night, the engineer was instructed to give Yonge-st. in front of the stores a double dose of oil, and the side streets will be oiled or watered a distance of 200 feet off Yonge-st., and the street car allowances will be oiled with the aid of a sprinkling cart, providing the York Radial Co. will give permission.

The storkeskeepers will be notified to refrain from throwing offal on to Yonge-st. Engineer James desired the committee.

If There Is A Weak Spot In Your System or a Faltering Organ It Will Be Worse at This Time of Year.

Vigor and Energy Run Low in Spring Unless You Use Dr. Chase's Nerve Food

It may be the stomach, the heart, the lungs, the filtering or excretory organs, but if there is a weak point it is likely to show up at this time of year.

The blood is thin and watery. It fails to supply proper nourishment. The all-essential nerve force is lacking, and you feel the effects first in your weakest organ.

Your trouble may take the form of indigestion, you may have neuralgia or twinges of sciatic rheumatism. The cause is the same—thin blood.

Dr. Chase's Nerve Food will help you as nothing else can, because it supplies in condensed and easily assimilated form the elements which are necessary for the strengthening and invigorating of the various organs of the body.

Every dose of this great restorative remedy goes to form new red corpuscles in the blood—to make the blood rich and red. The filtering organs resume their functions, appetite improves, digestion becomes rapid, and gradually vigor and energy find their way to every nook and corner of the body. To keep strong and sell this spring, use Dr. Chase's Nerve Food. 50¢ a box, 2 for \$2.50, at all dealers or J. B. Manson, Bates & Co., Limited, Toronto.

to equalize the sewer connections to the houses, as some would have to pay only for five foot depth, while others would have to pay for 19 feet. Councillor Reid objected to such a flat rate. The engineer was instructed to work out a schedule of flat rates for the next meeting.

Mr. Wilson, of the York Radial, addressed the committee in regard to placing their high tension wire poles on the east side of Yonge-st., instead of the west, and stated that the company has a right to use Yonge-st., and the Bell Telephone Co. is occupying the west side of Yonge-st., and therefore, would not be allowed to use the west side.

Mayor Brown objected and stated that the York Radial was to reconstruct their power system, which is not a necessity. Solicitor Gibson contended that the Metropolitan has no right to place additional poles on Yonge-st.

The members thought this matter should rest till the question of annexation is settled. Not much importance is attached around town to the report that an organized effort will be made to oppose the annexation. Opposition there was in the initial stages of the movement, but this has practically all been removed, and closer relations with the city would be hailed with pleasure by the great majority of the town people. No movement with respect to the Metropolitan Railway has any other company will be taken till the final action of the city toward annexation is known.

WESTON. WESTON, June 29.—(Special).—Weston Methodist garden party will be held on Mr. Walter Longstaff's grounds on Saturday, July 1. A good time is anticipated. The town band is to be in attendance. A good program will be rendered. Tea served from 5 to 8.

WEST TORONTO. WEST TORONTO, June 29.—(Special).—What might have been a repetition of the terrible fatal automobile accident which happened a few days ago at Guelph, occurred this afternoon on Avenue St. near Industrial Avenue. A motor car No. 1198, a large touring car driven by J. M. Farnley of 20 Parkway-ave., and containing four other passengers, all women, backed down the steep side of the embankment on the north side of the street into the ravine below. Mr. Farnley had been going west on Jerome-st. towards Indian-rd., but seeing the rough road and steep hills ahead, he stopped the car and reversed the motor, attempting to turn. Before he could throw off the reverse and put on the brake, the rear wheels of the car had gone over the side of the Indian-rd. ravine and the heavy car rolled to the bottom of the declivity, a distance of over 25 feet, turning turtle in its descent. Most miraculous seems the escape of the five passengers. All were thrown out when the car was about half-way down, and beyond a severe shaking and a few bruises, all escaped unhurt. The other inmates of the car were Mrs. Farnley and daughter, and Mrs. Wm. Brown and daughter of Actonville.

High Park-ave. Methodist Church held their annual congregational and Sunday school picnic to Long Branch. The three hundred who attended, completely filling the three special cars provided.

The Weston-road overhead bridge which is being built by the city, is now well under way, the concrete work being already finished. Contracts have been let for the structural steel work to the Canada Foundry Co. for the amount of \$1740.

The pass and honor list of the successful students in the recent annual form promotion examinations of the Humberdale Collegiate Institute, were published this afternoon. A large number have received their promotion conditionally, and this is particularly noticeable in the lists of those who are admitted into the matriculation or fourth form. The lists have been posted at the northern entrance to the building.

AGINCOURT. AGINCOURT, June 29.—(Special).—Dominion Day will be celebrated here by football and all other games, and athletic sports. Malvern Band will be present.

FRUIT MARKET. A busy market prevailed down on Scott-street, on Thursday and brick trading generally was the order of the day. Strawberries sold from 9 to 12 cents a box, and raspberries, what there was of them, sold from 15 to 18 cents a box. In all other lines there was little change from the published quotations:

Asparagus basket \$2.00 to 3.50
Beans, wax 3.25 3.50
Cabbage (Virginia) crate 3.50
Cucumbers, hot-house, bk 1.50
Eggs (New Zealand) 1.35 1.50
Onions (Egyptian), sack 2.50 2.75
Oranges (late Valencia) 3.50 4.00
Pineapples 2.75 3.25
Strawberries, crate 0.02 0.11
Tomatoes (hot-house) 1.00
Tomatoes (Florida) 2.25 3.50
Texas flats, 4 lb. crate, 1.50
Cherries, cooking, bush 0.75
Eating cherries 1.50
Raspberries 0.15 0.18

SCARBORO BLUFFS. Take a pleasant and profitable afternoon. Lot 55 per foot up. Plan at C. White & Co., 55 Victoria. St. 5495.

An Ideal Summer Home and the Price is only \$4000

Beautiful Alvido, on bay between Lake Rosseau and Lake Muskoka, within ten minutes' sailing distance of Port Carling. Between two and three acres of land heavily wooded with full-growth pine. House is two story, hardwood throughout, seven bedrooms, kitchen, large living room, good big pantry, commodious store-room. House splendidly furnished, including piano. The above price includes everything. Twelve-foot verandah on three sides of house. Two-story boat and launch house, with front verandah, wharf, gasoline launch, rowboat, dinghy. Everything complete for boating and fishing at your summer home. At \$4000 this is the best summer home bargain offered this season, and will double in value in the course of a few years. It is a good purchase anyway you look at it. For particulars apply to H. R. SOMERVILLE, WORLD OFFICE, TORONTO.

RESIDENTIAL STREETS SERVED BY BURIED WIRES

Hydro-Electric Department Arranges For Underground Service on Cash Payments.

The civic electrical department has handed out its rates and regulations governing street and residence lighting in localities where residents object to an overhead service being given. In such localities ornamental standards, carrying single lights, will be installed and current will be supplied from underground wires. These standards must be erected on both sides of the streets and will be about 100 feet apart. All wires for the purpose of supplying current to houses and other structures from these wires to the houses will be placed underground.

Not less than one complete block will be placed underground, and all extensions to this original installation must each consist of not less than one complete block. Variation will be made from this rule only where intersecting streets are not thru streets, under which circumstances the lights need be erected only as far as the first intersecting street.

All underground construction consisting of either mains or services and irrespective of whether such construction is located on city property or private property, or both, shall remain the property of the city.

This underground construction will be undertaken at a price of \$2.50 per foot of frontage per side of street. No charge will be made to any citizen who desires to become a customer, for installing an underground service from the street line into his dwelling, when the wires in front of his house have been placed underground in accordance with the regulations of the hydro-electric department.

The charge of \$2.50 per foot of frontage must be paid in cash to the Toronto Electric Commissioners by all the property owners affected before the work is started. Orders to place any street installation underground and complete payments therefor, must be received by the Toronto Electric Commissioners on or before July 15, 1917.

Streets for which no underground work is requested by the property owners before the date mentioned above, streets on which overhead work has already been erected, cannot be dealt with for some time. A proposition covering the changing of these streets from overhead to underground installation will, if the citizens so desire, be made at a later date.

Underground Construction. Last year when the local improvement department commenced the erection of overhead lines in residence districts, a large number of requests were received for underground construction. It was impossible to undertake such construction with the funds which had been placed at the disposal of the department, and several suggestions were made covering the undertaking of this work upon the local improvement basis. It was found in a great many cases that the citizens were quite ready to bear the additional cost which the underground construction entailed.

The city applied to the local legislature for authority to carry out work of this nature on the local improvement basis, but unfortunately did not succeed in getting rights which were broad enough for the purpose of the department. The time is rapidly approaching when new street lights must be erected on all the city streets and in view of the inability to adopt the underground construction plan at the present time, the Toronto Electric Commissioners have endeavored to outline a scheme whereby streets desiring underground construction could obtain same at once.

Cash Payments. It was the opinion of the board of control that the property owners would greatly prefer the local improvement plan with payments spread over a

number of years, rather than that of a single cash payment, but as the local improvement scheme is not available at present, the cash payment proposition is the only one which could be immediately offered to the citizens.

It is the intention of the Toronto Electric Commissioners to recommend to the board of control that power be obtained from the local legislature to enable the city to handle such matters on the local improvement plan and the present proposal is issued so that property owners who are willing to make a cash payment for underground installation, may have it put in at once.

Cut Out T. E. L. Lamps. It is the intention of the city to cut out the Toronto Electric Light Company's street lights at the earliest possible date and on those streets which order underground construction, the extra time required for installing the cables may mean that lighting will not be completed when the present source of electric lighting is cut off. However, the department will make every effort to get these streets lighted in the shortest possible time.

The electrical department has designed a number of models of the single pillars to be used in residence work. Some of the requests for underground lighting in residence districts call for the five-light cluster standards, which are used on the down-town streets. These standards, while excellent for main thoroughfares and business districts, would look very much out of place when erected upon a residence street, and the amount of light which they give is far in excess of that required for first-class residential street lighting. It will be found that the single-light standard placed on both sides of the street and approximately 100 feet apart on each side, will give splendid illumination without detracting from the appearance of the street.

Anna Swindlehorst Remanded. Anna Swindlehorst, the young woman who was with Harvey Kirvan in his motor boat on Wednesday when he was drowned in the bay, was arraigned in police court yesterday morning and was remanded a week upon the charge of vagrancy. The body of the young man has not yet been recovered.

Inspected Firemen's Apparatus. Fire Chief Thompson visited North Toronto yesterday and inspected the fire fighting apparatus of the town. He will report to the city council.

The Morning World is Delivered before breakfast to any address in Toronto or suburbs for twenty-five cents per month. Phone M. 5595.
