AM we say is, go to it, Ferg., go to it, and collect a royalty and a decent royalty from all these Nickelers and make the International pay up all it may happen to be in default on nickel profits.

And is it not too bad that when the Hon. Ferg. is so active that N. Wesley Rowell, the leader of the opposition in Ontario, is away over in Europe studying social uplift for home consumption in Ontario; and that he has left Mr. Joey Atkinson to shoulder all the burdens of social uplift for Canada at large to the almost entire neglect of the more prosaic, but none the less interesting to the people, development of our national resources for the benefit of Ontario and Canada; and the actual safety of our soldiers now on battlefields of Europe? Why should Mr. Rowell and Mr. Atkinson neglect the opportunity of protecting the revenues of this province and securing the industries we are entitled to have, instead of allowing them to be switched away from us to the United States, and our products used to destroy our own men at the

eweltering fronts. And our good friend, The Globe, how I was shouting against the armament trusts that had turned Europe into a slaughter house! And then how it suddenly became dumb armamently when it found out that the International Nickel Co. of the United States was the backbone of this slaughterful trust! And has anybody heard from Sir Wilfrid Laurier yet? We have called the Toronto members of the cabinet to time; perhaps The Globe will tell us something of what Sir Wilfrid proposes to do in this emergency. Sir Wilfrid was in office when the nickel trust company began to entrench itself and he has been in parliament and heard the speeches made about the nickel situain the last two or three sessions; but he sat very still. And he pever The Globe newspaper to at least go in and where they can use five hundred horse

Nickel Co. to get busy and establish refining works in Ontario. We can best illustrate this by quoting from a local paper what took place in Welland last Friday; and after making the quotation offer one or two comments thereon. Here is the news item:

INTERNATIONAL NICKEL CO. IN-VESTIGATE SITES IN WELLAND. For Big Canadian Nickel Refining in-dustry—Hon. G. Howard Ferguson Declares That Nickel Ore Must Be Refined in Ontario.

ALSO VISIT PT. COLBORNE AND

(From The People's Press, Welland, July 25.)

Welland was visited on Friday by four representatives of the International Nickel Co. of New Jersey, for the purpose of investigating the advantages here for the location of a pig Canadian nickel refining industry. As a result of this visit, Welland will be one of four places to which the choice has been narrowed down. The visitors here had been making Hamilton their headquarters for several days, returning to quarters for several days, returning to New York City Friday night. Before from Hamilton one by the New York directors of the com-

* WAR SUMMARY *

THE DAY'S EVENTS REVIEWED

(Continued From Page 1.)

ed with powerful guns and high-explosive shells many years before

terday and captured a group of fortified houses about 170 yards south-

east of Estrees, taking some prisoners. In the battery captured south of

Estres on Monday the French gained five four-inch guns. In the Champagne

operations are warming up, and a rather violent artillery action was fought

advance west of Lutsk and southwest thereof, the Russians still manage

and disintegrated enemy. They are now well across the Slonevka River

and they are engaging in a sort of running fight with the receding

Boehm-Ermolli in southern Galicia, ten miles north of Brody. The im-

mediate object is apparently the envelopment of the Austrian army from

both the north and south and to drive it back on Lemberg, completing its

destruction before the Turkish reinforcements which the enemy is bring-

ing up from the Balkans have time to arrive. The sudden violence of

destined to conceal the weakening of the forces, thereby withdrawing

men to be sent to Galicia or Hungary. It is considered ample confirma

tion of the desperate needs of the central powers for men that they should

have to call on the Turks for aid, especially while the Turkish sun is

Erzingan fell into Russian hands after a battle fought on Tuesday last

with the Turks, and the possession of this town gives the Russians military

occupation of all Armenia. This region of Armenia is mountainous and

its ownership never added greatly to Turkish power, yet it is essential

for Turkey to retain it because its strategical position dominates Asiatic

Turkey. Having ousted the Ottoman, the Russians have now the choice

either the Erzingan-Sivas-Angora route or by the great highway for all

invaders that passes thru the Cilcian gates and strikes the Mediterranean

west of Alexandretta. It is probable that the route of invasion chosen

will be the central one by way of Angora, coupled with an advance along

the Black Sea coast. Sivas will probably be the next objective of the Grand Duke. It can be approached by road direct from Erzingan, 135

miles distant, and also by a road direct from the Black Sea. Under the most favorable conditions it would take the Russians at least three weeks

longer to get to Sivas; but as they will certainly meet with some opposition

Bulgarian attacks with their artillery on the Saloniki front seems

Friday consisted of Frank Ludiam, purchasing agent; W. L. Wotherspoon, consulting engineer; R. Stanley, general superintendent, and C. Bradigan, chief engineer. They ware taken in charge by L. B. Duff, industrial commissioner, and H. E. Timmerman, hydrd-electric engineer, who showed them Welland's chief industrial plants and the available sites and facilities for their industry. The first unit will be erected by the company this fall and for this a site of 100 acress and 500 electrical horsepower is required. The power will be available, the visitors were assured. The company will employ 500 hands at the start.

No bonuses or concessions of any

were assured. The company will employ 500 hands at 'he start.

No bonuses or conpassions of any kind are asked. In fact a number of tempting offers have been turned down, as the location beet suited for this industry will be selected irrespective of any other considerations. This site will almost to a certainty be somewhere on the Niagara Peninsula.

The raw products for the industry are nickel matte from the mills at Copper Cliff and intense quantities of coke and coal.

The International Nickel Co. practically controls the nickel deposits of Ontario, which are the largest in the world, and this is what has given rise to so much discussion about Ontario nickel supplied to Germany. The company is immensely weakiny. Last yoar its net income was \$12,470,106. It paid dividends, of nearly ten million dollars, leaving a surplus of over seven millions, and finally issued a 10 for cent. stock dividend on common to the amount of \$3,803,150. The askerts of the company are sixty million dollars. The party also visited Port Colborne, Thoroid and St. Catalarians.

Must Be Refined in Province.

Must Be Refined in Province.

"We are goins to refine nickel in the Province of Ontario," declared Hon. G. Howard Ferguson on Saturday. "I hope," added the minister of lands, forests and mines, "that it won't us long until we are doing so. I believe that next year will see activity in that direction as a result of the recommendations which the nickel commission will make in their report.

"I think the offer of the International Nickel Company to establish a refinery in Canada is a direct result of the investigations of the nickel commission," said Mr. Ferguson. "We have told them that if we can evoive a process of refining for Ontario, they will be obliged to come to this province and do their refining. We think we have the process. Our staff of experts, consisting of metallurgists and metallurgical chemists, are convinced about it. I want to add that the success of the discovery is very largely due to Prof. Guest of the University of Toronto.

"We won't be satisfied with the In-

to Prof. Guest of the University of Abronto.

"We won't be satisfied with the International Nickel Co. doing their refining in Nova Scotia, where it is announced they may erect their plant. Ontario one must be refined in Ontario. Hon. Mr. Ferguson intimated that the presence of representatives of the company at Hamilton, Welland and other points in Ontario at the present time, looking into the advantages of these places as a point of location for a refinery, might be taken as an indication that the Nickel Company is aware that it must eventually do its refining in this province.

This reads fine-to have four repre sentatives of the International Nickel rushing all over Ontario to see where they can start a refining plant, and where seems to have prodded up Mr. Rowell or they can employ five hundred hands, and bark, if nothing else. But such is the power of electric energy, and how they state in o which Canadian public life has made over twelve millions of profits last year-of which the province got very little-and how Hon. Mr. Ferguson was able to read the riot act to them, and to all the other nickelers in this country!

"Things have changed since Hannah died," as the song says, and somehow they have changed for the better. There isn't anything that a nation with sovereign powers, or a government acting under them, cannot do to protect the interests of the state and of its people. But the trouble in Canada is that our governments hardly ever do it. One case in point of recent occurrence is where the sovereign powers of the Dominion were used to compel the power trust in Ontario, also chaperoned by Hon. Wallace Nesbitt, to give the municipalities of Ontario sufficient juice to run their plants; and if Sir Robert Borden had the courage to tackle this nickel trust in Canada in the same way, and absolutely prohibit export, we would have a great nickel industry, and a nickel-steel industry, and many other industries, located in Ontario. But we read that Sir Robert has gone on a short holiday to fish, and no Hardy. Breheny was lying at the corner one needs a heliday more than he does. He has worked very hard in his office; but he doesn't seem to go about it in quite the right way; and he doesn't seem uid be announced until quite the right way, and it decleagues who ded had been considered to know quite how to tell colleagues who get him and his party into an impossible The party which came to Weiland on position that he's got to change bait.

O. W. BAILLIE.

And how proud the kaiser is of

Krupp munitions! Read this to make

German nickel policy:

Ottawa Citizen: Following the naval battle of Jutland the kaiser sent the following congratulatory telegram to Herr Krupp von Bohlen und Halbach from Wilhelmshaven:
Fresh from the impression produced by the verbal reports of the battle in the North Sea, I desire to express to you how much we owe our successes to the excellent artillery and armor material, and especially to the munitions that worked such destruction. Thus the battle day was also a day of honor for the Krupp works.

There is apparently no limit to German egotism. Where would the "armor material" of Krupp have been but for the generous supply of nickel from Canada? Krupp's is merely one tentacle of the world-wide international armament octopus; and unless the kaiser is becoming niggardly in sending telegrams, he should be ready to congratulate at least the International Nickel Co. with Canadian mires and American and Toronto directors, and the Harvey Steel Co., with directors from the armament firms of Britain, France, Germany, Italy and the United Statescontrolling the process of hardening armor plate.

CANADA EXPENDING **HUGE SUM ON WAR**

About One Million Dollars Daily.

OFFICIAL STATEMENT

Seven Hundred Thousand Dollars Spent Daily in Canada Alone.

OTTAWA, July 26.—According to an official statement issued this afteroon, the war expenditure of the Do-ninion Government in Canada alone now exceeds twenty million dollars a month, or about \$700,000 a day. The largest item in this huge expenditure is for pay and allowances, subsistence and assigned pay and separation allowances of the troops. This item is running at the rate of about twelve

million dollars a month. This is, of course, much more than is paid to the troops at present in Canada, who number less than half the total Canadal forces recruited for the war, over 200,000 having gone overseas.

The pay of the overseas forces assigned to their families and dependents, and their separation allowances, also paid here, constitute a very large near ture. The sterling exchange situation has had much to do with bringing about the payment in Canada of so large a portion of the pay of the overseas forces. As nearly as can be estimated, Canada's present war expenditude in Canada and in Britain, including the maintenance of the rate of about thirty million dollars a month, or three representations are not under the jurisdiction of the month, or three representations are not under the jurisdiction of the magistrate gave well a severa report.

Suggestion.

The following communication was received from Secretary A. D. Cartwright of the Citizons. While mentally depressed, was the verification of the Citizons. Express and Preight Campaign Executive Committee, yesterday. "I would dead in a cistern on her husband's farm near Sharon on the evidence of Dr. Dales of Aurora and the evidence of September or October next.

"To would be filed with the board."

"I am also directed to point out that received with an asseaut on Ariture was charged with an asseaut of the post-morten rate of about thirty million dollars a month, or three rundred and fifty mil-

lion dollars a year.
Million Dollars Dawy.
This averages about a million dollars a day, and is equivalent to about one thousand dollars per annum per one thousand dollars per annum per head, as the total enlistment is about 350,000 men. Of these there are now in Canada about one hundred and

forty thousand. Out of the revenues of the government for the year it now seems probable that a large amount of the principal of the war expenditure will be paid, as the budgets of 1915 and 1916 are both working out most satisfac-torily. The balance of Canada's war expenditure this year will be defrayed partly from the funds of the domestic war loan issued in November last and from future war borrowings.

FARMERS ARE GREATLY IN NEED OF LABORERS

Experience Difficulty in Harvest-

ing Fruit and Grain Crops. ST. CATHARINES, Ont., July 26-Farm labor is scarce between Toronto

said Toronto district recruited 1,199 tion is the main source of income and The cases, according to Dr. Eby, were at times, when farm workers are hard all of children of extreme youth, one of the farmers devote most of their time may be because of adverse natural

> luxuriant, the second crop being almost ready for the cutting but the appearance of crops generally is by no means encouraging. Owing to the shortage of labor great delay has been experienced in harvesting the ordinary mixed hay crop and in order to save time the hay is being gathered up by the luader direct from the swath. It is said here that munition manuare in some measure responsible for the shortage of farm labor. In the towns in the fruit-growing districts, many men who would at ordinary times be engaged on the farm, are making munitions, and manufacturers are paying 25 to 30 cents an hour for ploy of a farmer near St. Catharines, are at present either at Camp Borden or fighting in France.
