It treats 35,000 subjects in all branches of knowledge; its biographical sketches include celebrities of the earliest times down to those of today; it contains a Chronological History of the World from the beginning of all history down to the present; its educational charts record the progress of the entire world. Many families possess a cyclopedia of some kind. Most of them are out of date, and practically all of them are too large to handle. There are no educational advantages to be gained by the use of such a set. The books are too heavy for children to use, and one must search through rage after rage of irrelaren to use, and one must search through page after page of irrelative matter to find the desired information. But in Everybody's Cyclopedia you find your subject in an instant, with all the facts relating thereto, and all set forth so clearly that a child may quickly grasp the meaning. This reliable, ever-ready reference work should be in every home, evn though you may have other sets.

### THIS WEEK--- The Telegraph and Times
